

# AI diffusion in firms – what do we know and what does it mean for policy?

## OECD opening remarks

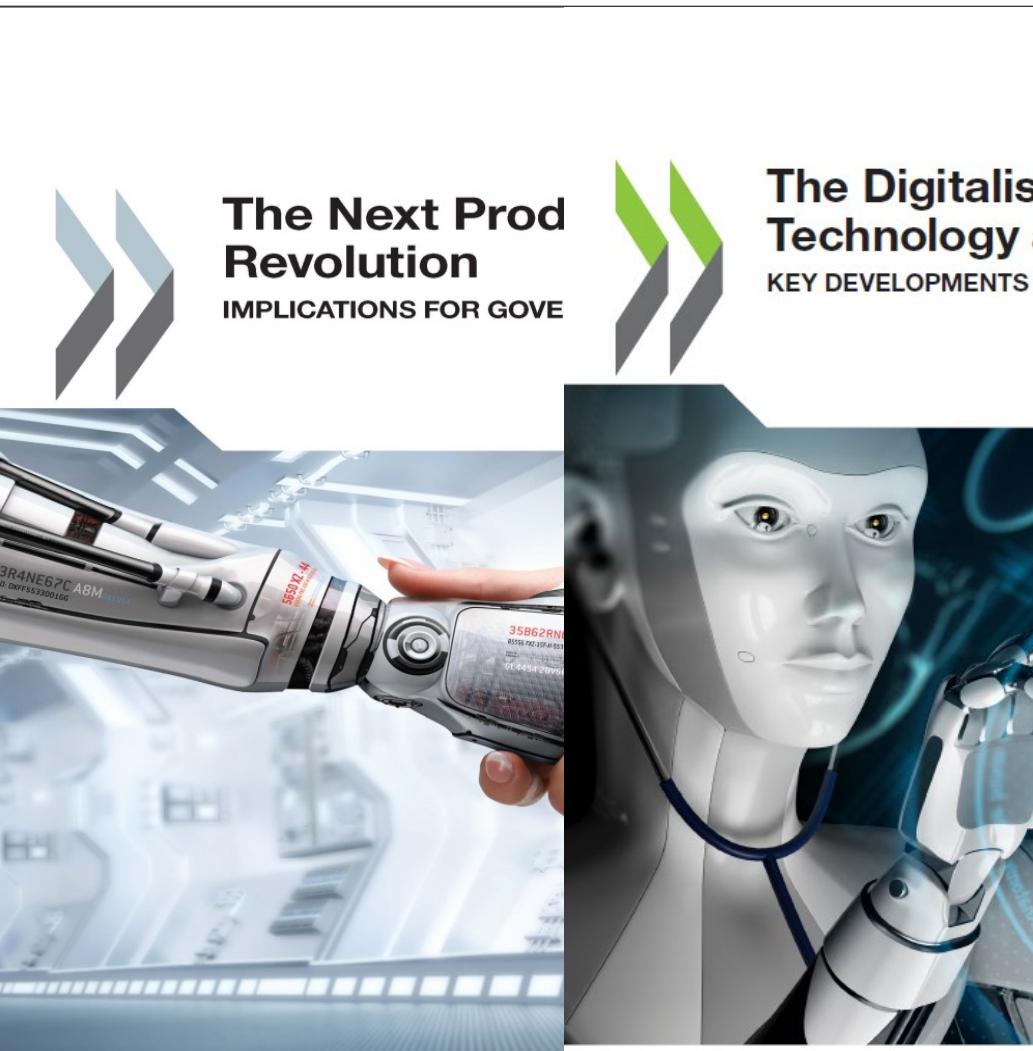

**Alistair Nolan**  
Directorate for Science, Technology and Innovation  
OECD

AI-WIPS, Germany

February 3<sup>rd</sup> 2021

# Recent OECD work

**The Digitalisation of Science,  
Technology and Innovation**  
KEY DEVELOPMENTS AND POLICIES

---

Why does understanding diffusion matter?

# Labour productivity growth in the OECD (GDP per hour worked, annual percentage rate)

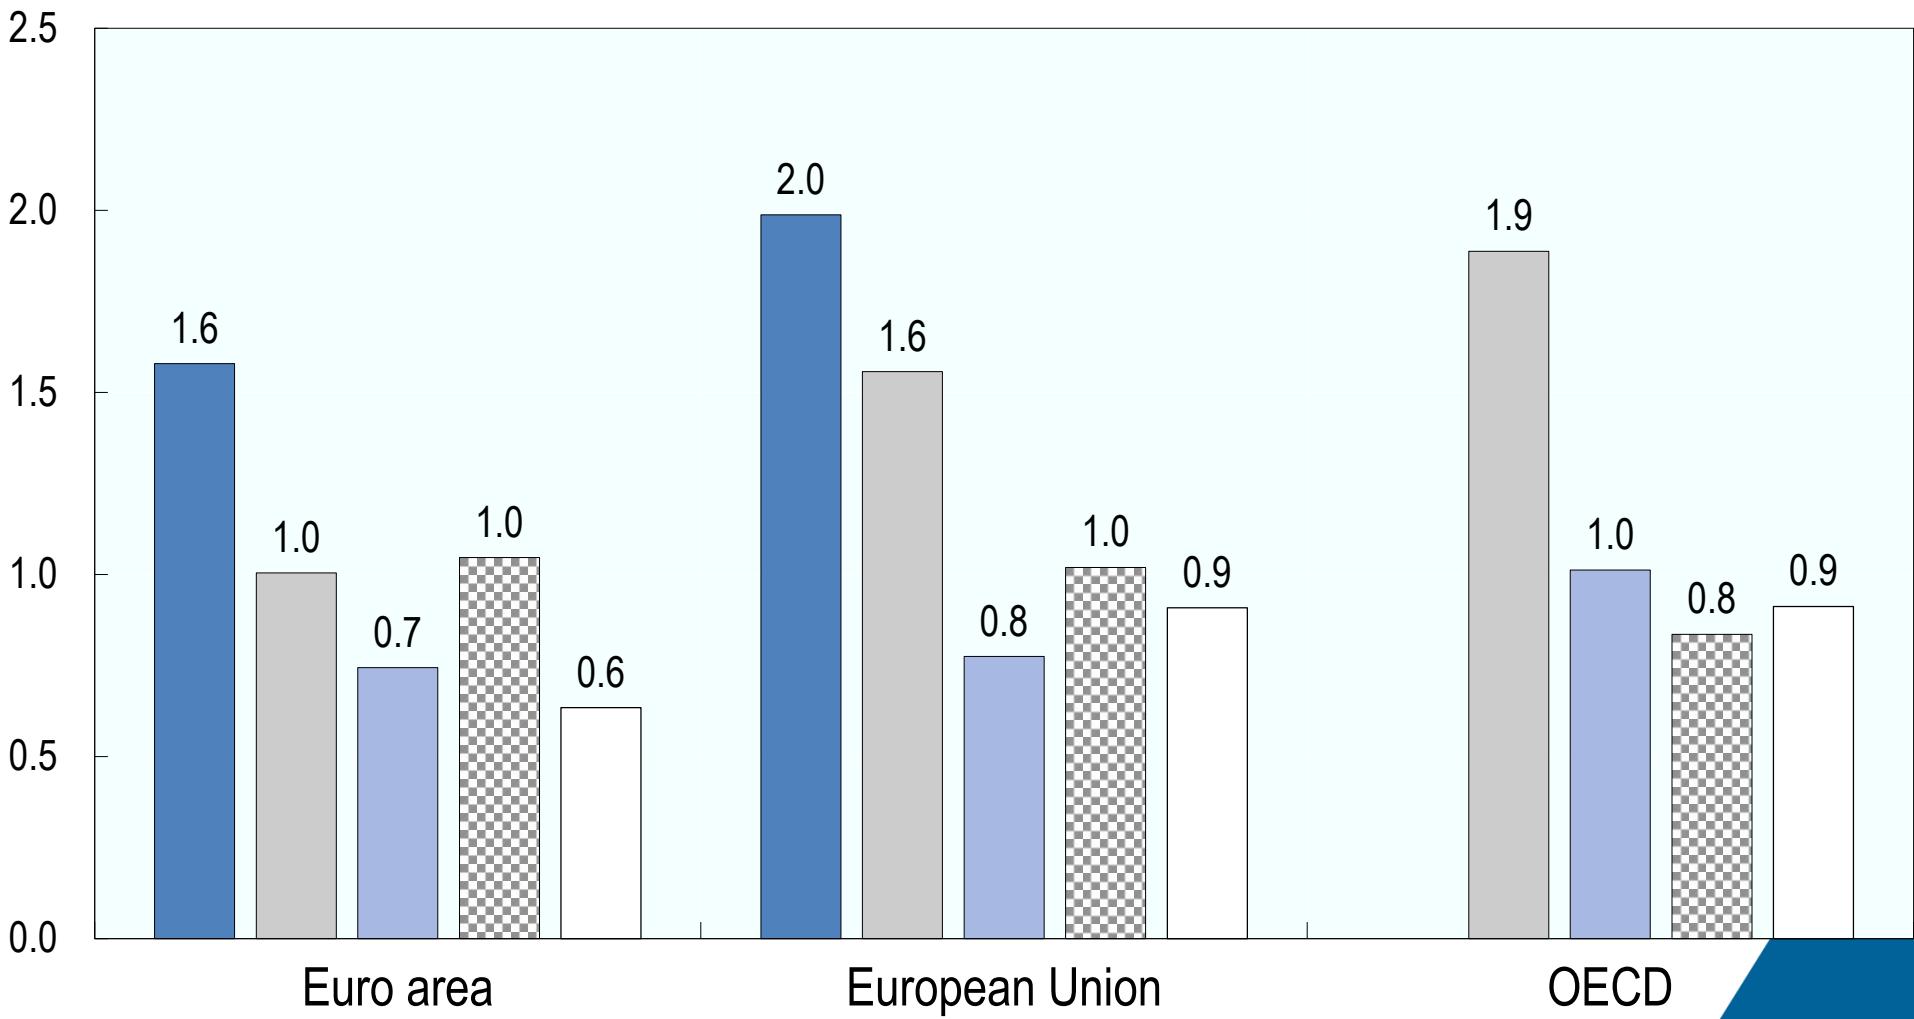

■ 1995-2000

□ 2000-2005

■ 2005-2010

□ 2010-2014

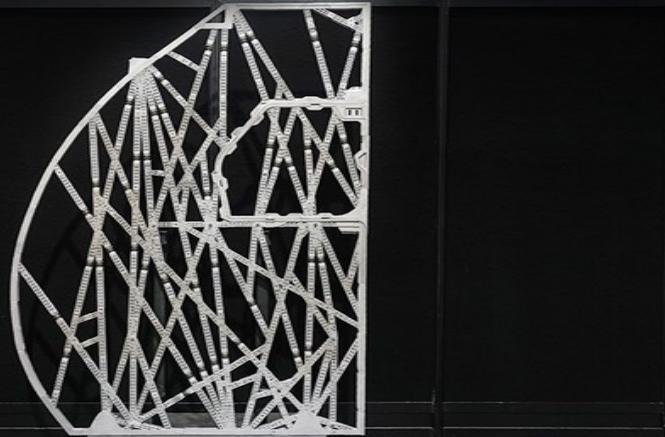

□ 2014-2018

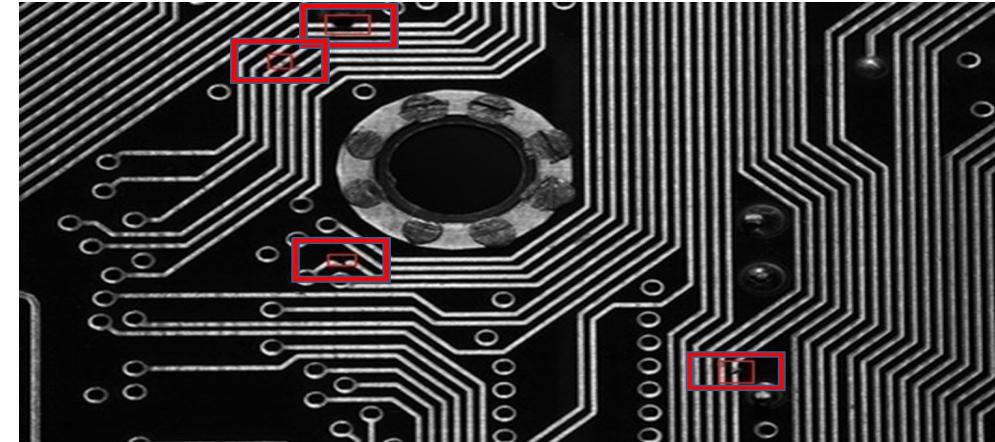

# AI Can Now be Applied in Every Stage of Production

## Product Design

## Fabrication

## Process control

## Training

# AI systems will also help and train workers

# Untangling productivity, when AI is everywhere ?

# Diffusion effects on the labour market

THE FUTURE OF EMPLOYMENT: HOW  
SUSCEPTIBLE ARE JOBS TO  
COMPUTERISATION?\*

# Measuring diffusion

## Time-line of AI (ICT) and other surveys<sup>(\*)</sup>

United States –  
Machine learning used  
by

2.2 – 5.4 % of firms

**United  
States**  
Results  
available

**Statistics  
Sweden**  
Results  
available

**Statistics  
EC-  
Eurostat  
2021**  
Results

Canada - AI adopted by  
Large enterprises  
(10.1%), medium-sized  
(7.1%), small (3.2%).

(\*) Not exhaustive.

New survey work

# AI diffusion – a new survey

**A new policy-oriented survey of AI diffusion and use in firms**

# AI diffusion – a new survey

## Starting development of a conceptual framework and analysis plan:

- **How to add value relative to existing surveys ?**
- **International comparability – or deeper and narrower?**
- **Business insight with statistical rigour.**
- **Relate firm data to policy settings ?**

# Survey work complemented by case studies

# Institutions for technology diffusion

## Diffusion mechanisms

### Dedicated field Services

### Technology-oriented business services

### Applied technology centres

### Targeted R&D centres

### Knowledge-exchange and demand-based instruments

### Open technology mechanisms
