Sicame Group

1955
2023

Over 65 years of
worldwide success

One of the key players in
the electrical equipment
business worldwide

Who are we?

Sicame Group is specialized in **products and services** related to transmission and distribution of **electrical energy**, renewables, electromobility, safety equipment and industrial applications.

 **567** M€
2023 TURNOVER

 **3,600**
EMPLOYEES

Group's values

CSR approach

Among the 17 United Nations Sustainable Development Goals, 7 are priorities for the Sicame Group.

Locations

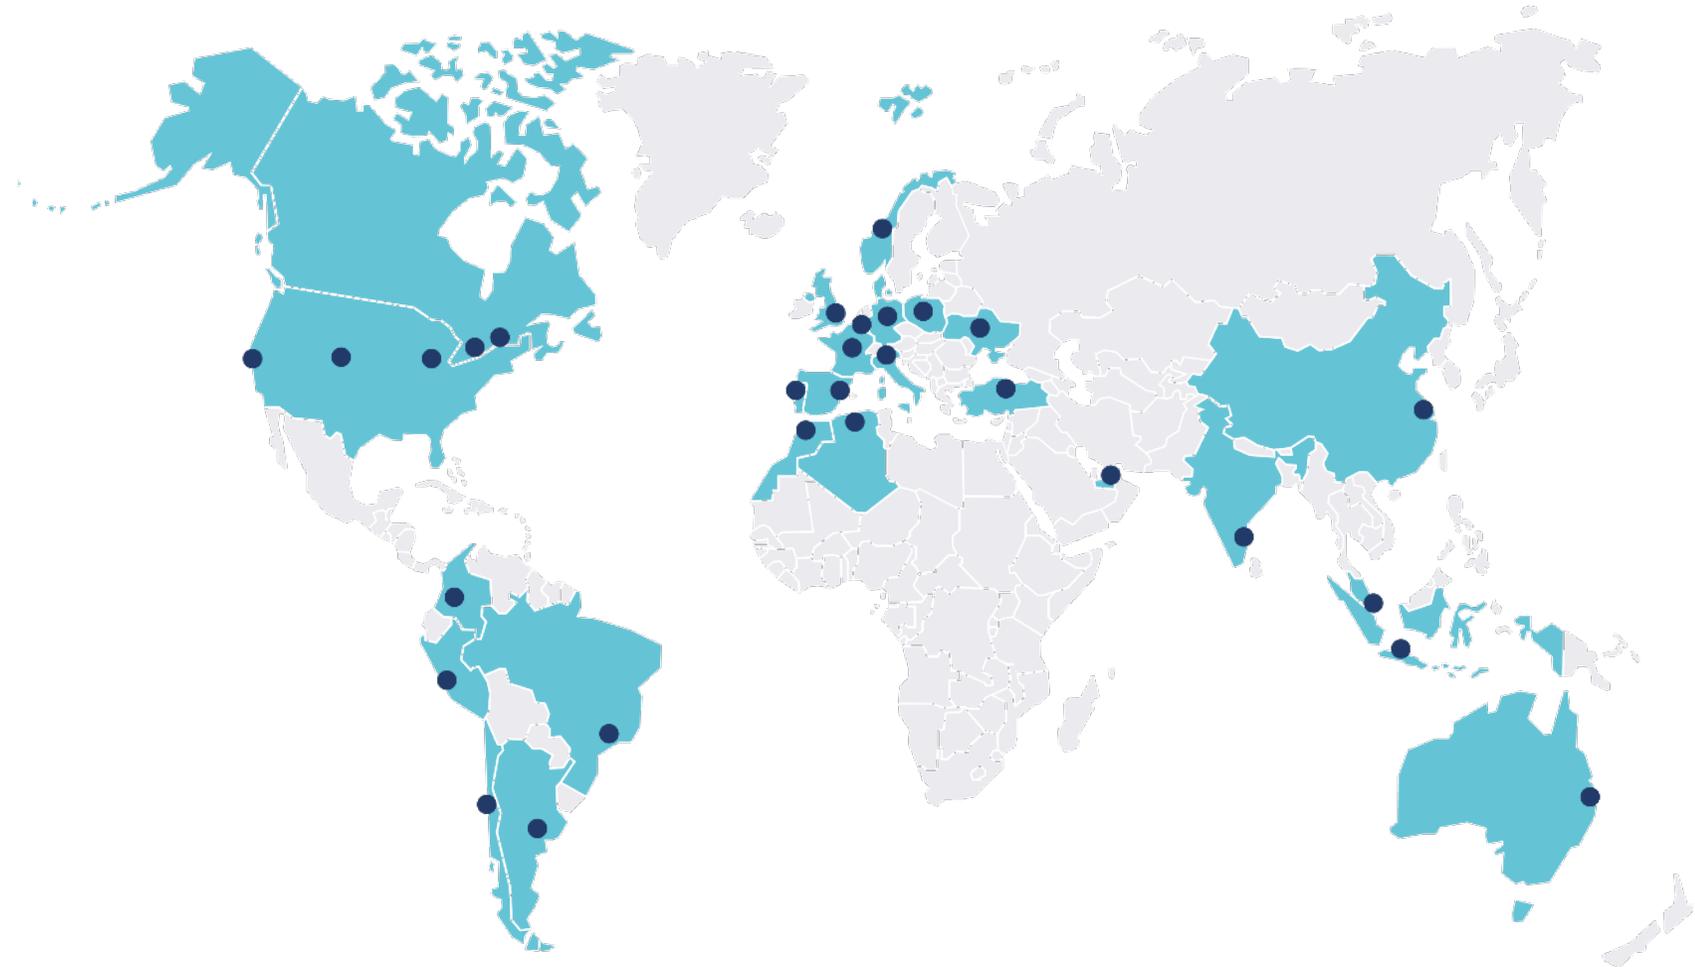

→ 5 continents

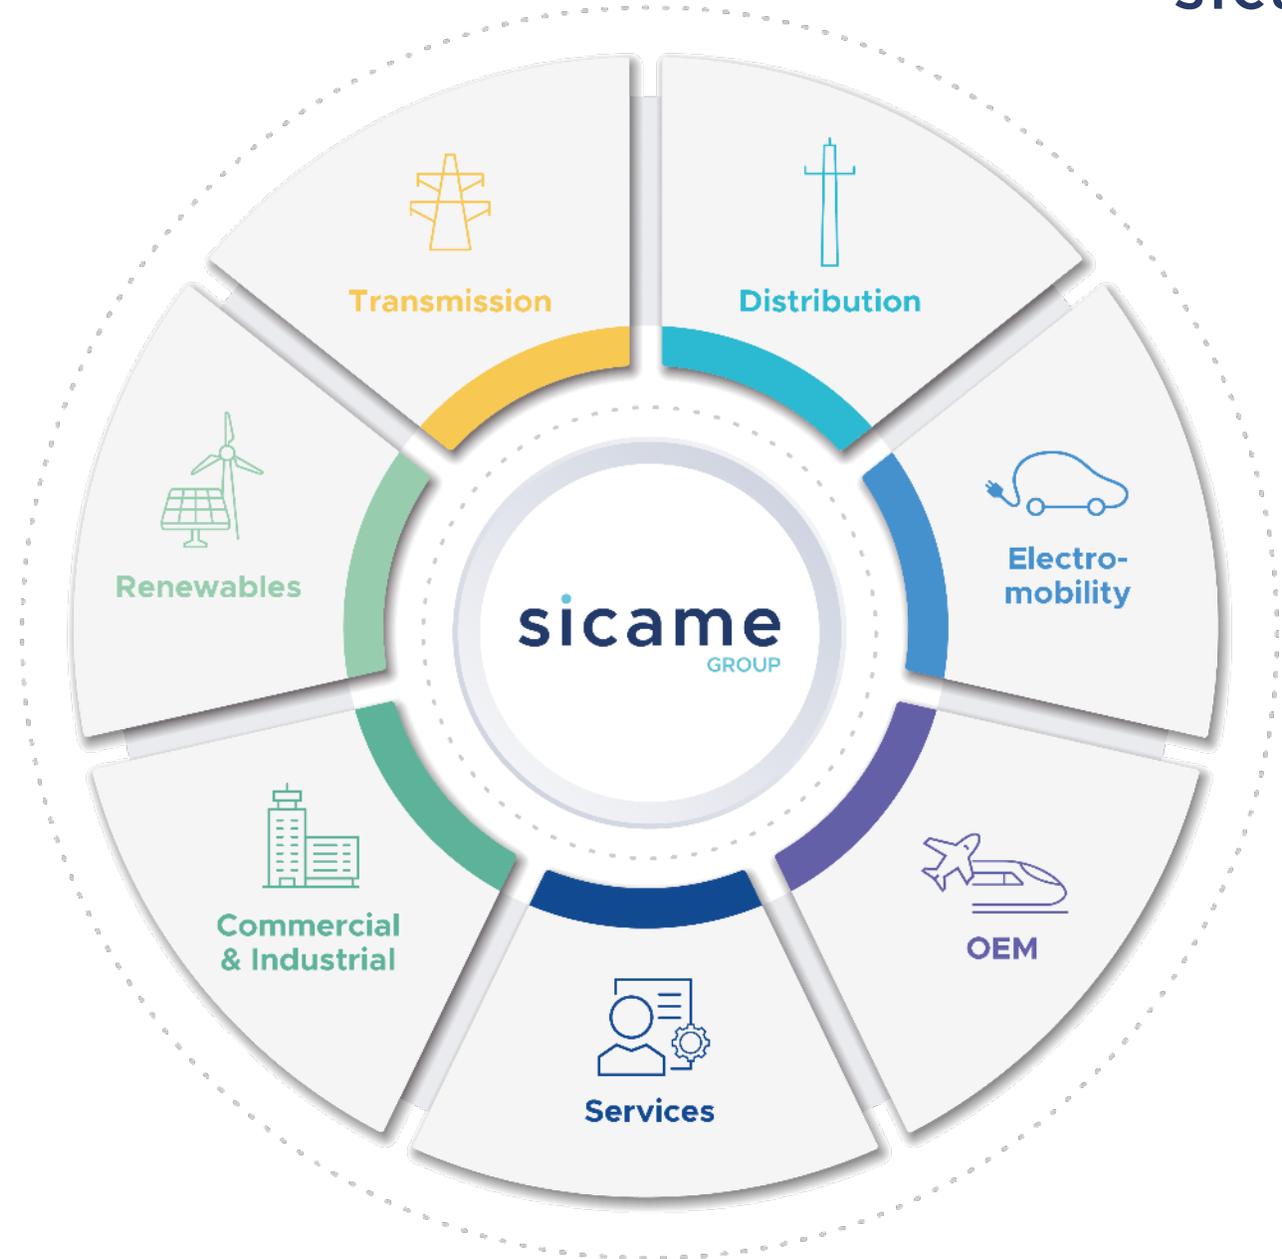

→ 26 countries

→ 50 companies
around the world

→ Products distributed
in 157 countries

Fields of activity

Expertise

With over **65 years of experience**, the Sicame Group has created **privileged technical relationships** with its customers in order to provide them with solutions and products adapted to their **specific needs**.

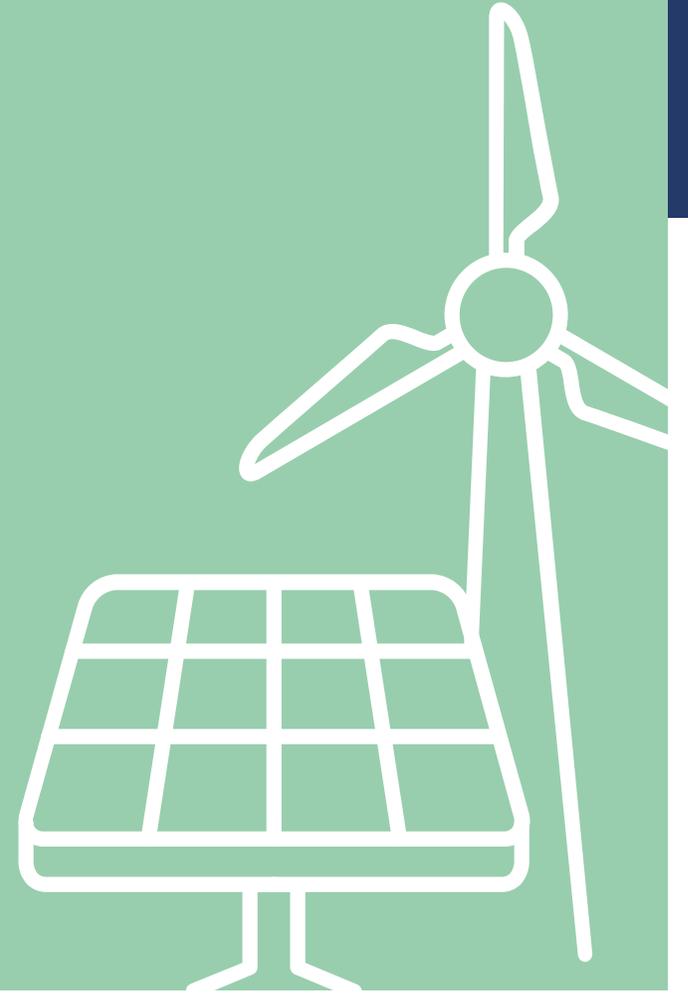

- 1 Conception
 - 2 Simulation, test, qualification
 - 3 Integrated production and control of all our processes
 - 4 Flow and project management
 - 5 Technical leadership and actor in standardization
- 

Fields of activity

Renewables

A large set of connection solutions

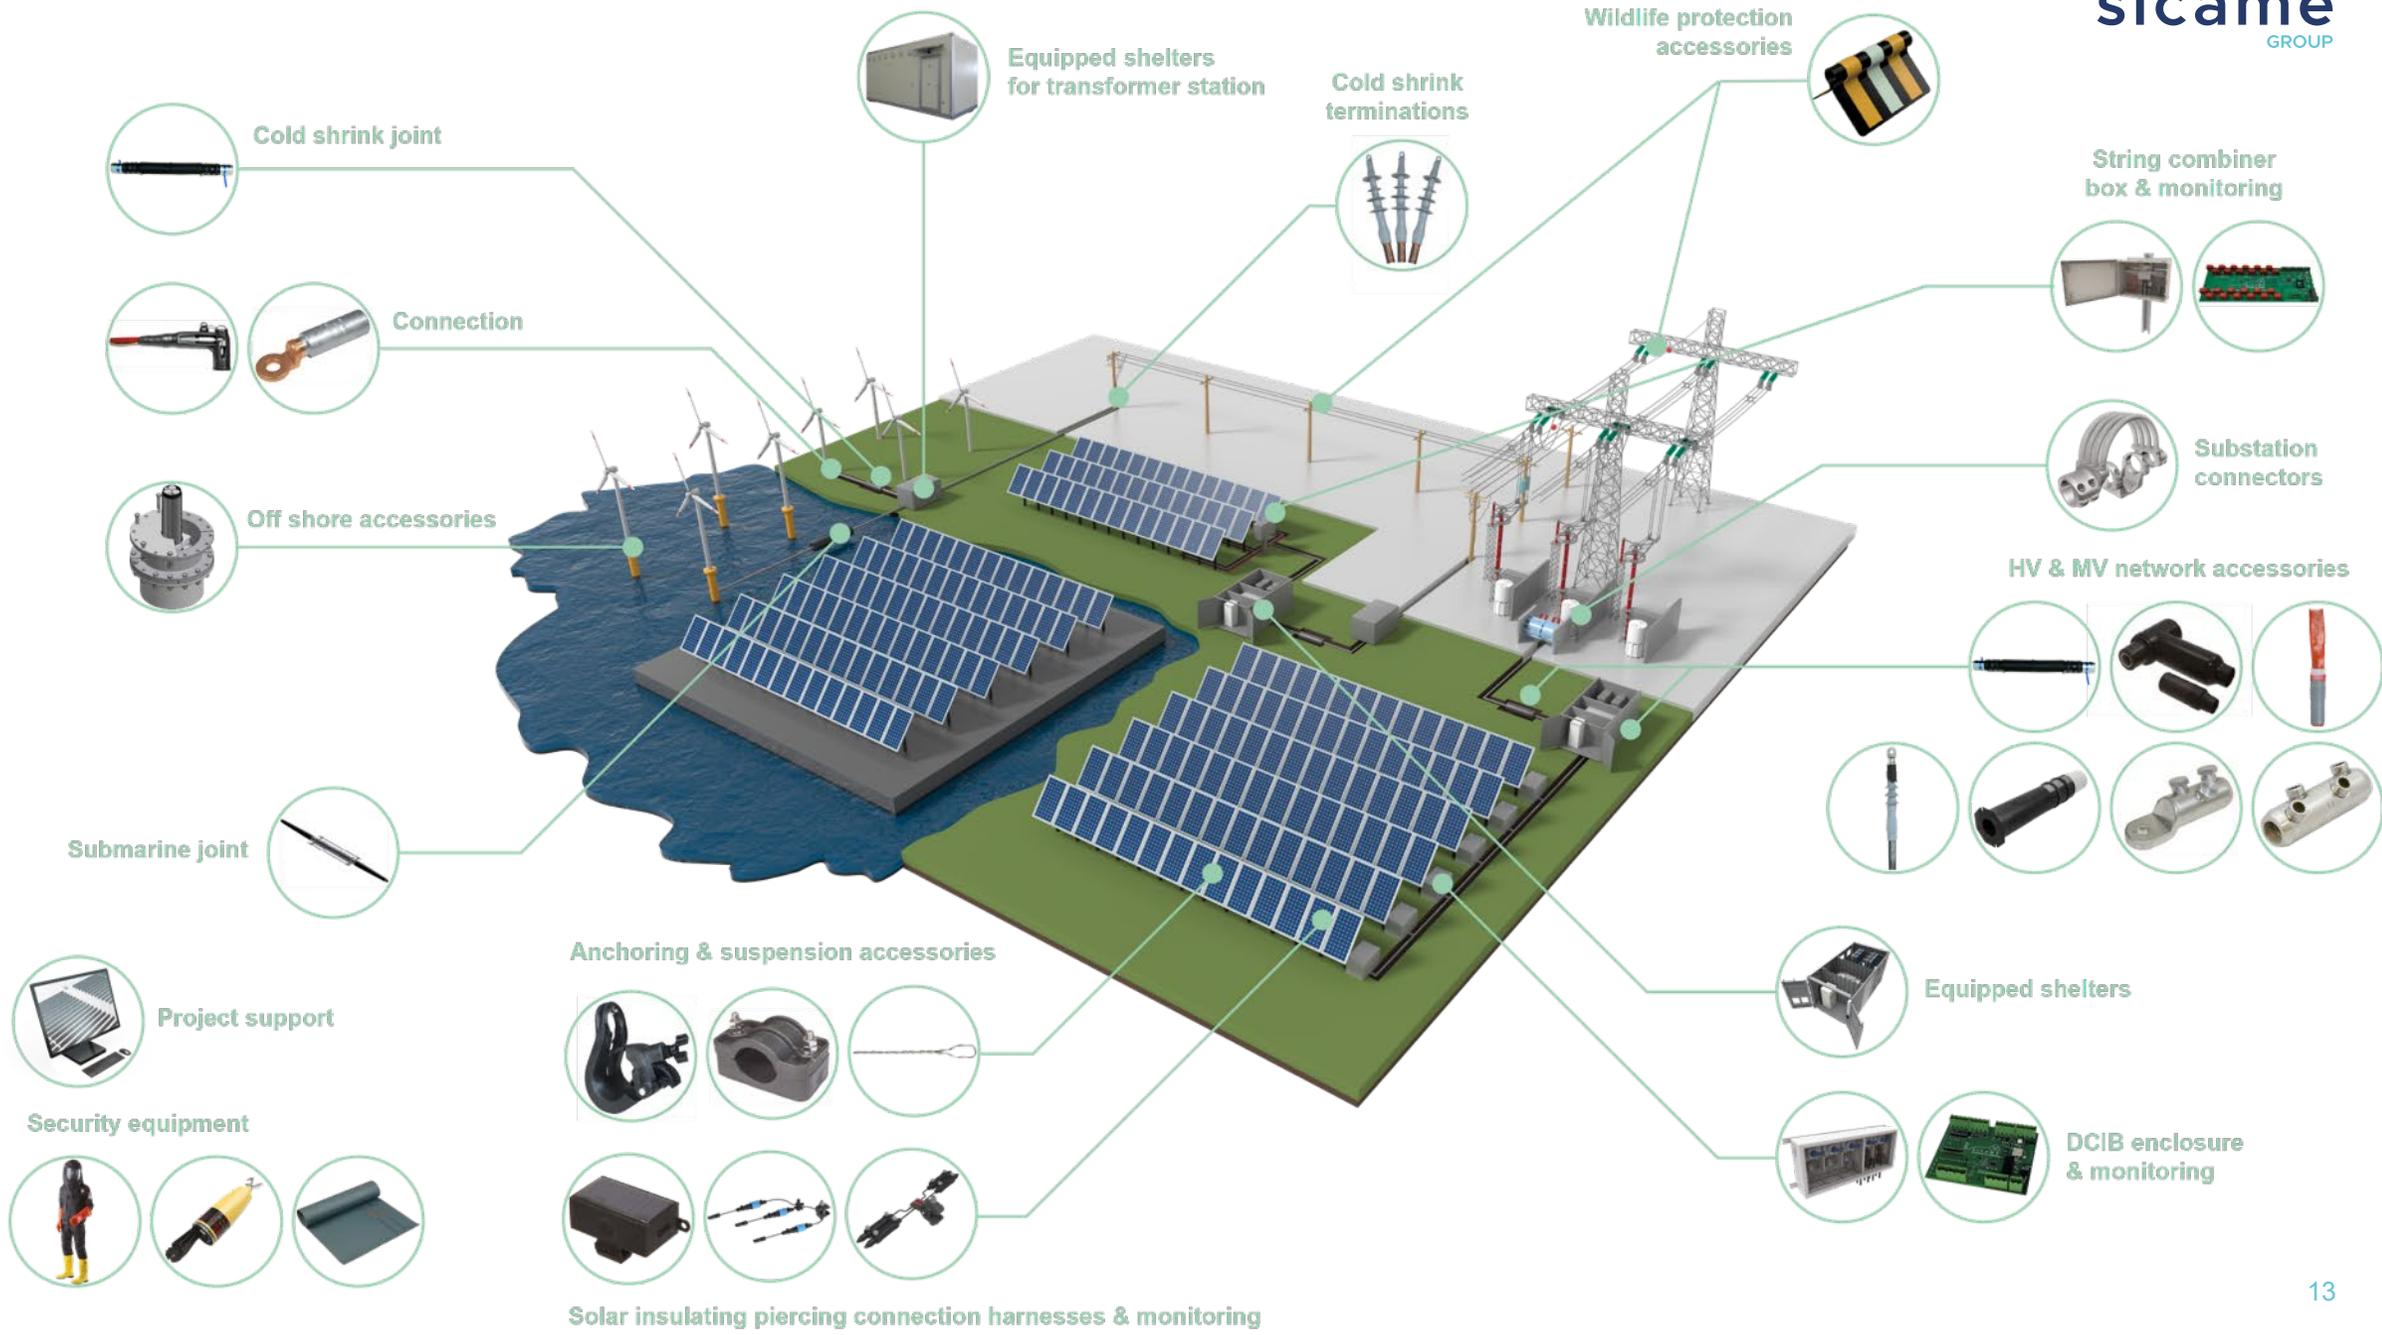

for AC and DC solar applications

Backed up by our 60 year long experience in distribution systems our products are designed to last, they are environment-ready and mostly maintenance-free.

Our solutions have also be engineered to facilitate on-site installation and reduce overall installation costs.

- DC-Bus system for utility scale solar reticulation networks including harnesses and bus management
- Engineered pre-wired cabinets and enclosures
- Shelters and embedded solutions designed to project specs
- Battery storage systems and enclosures
- Grounding, DC and AC connectors and accessories

Transmission

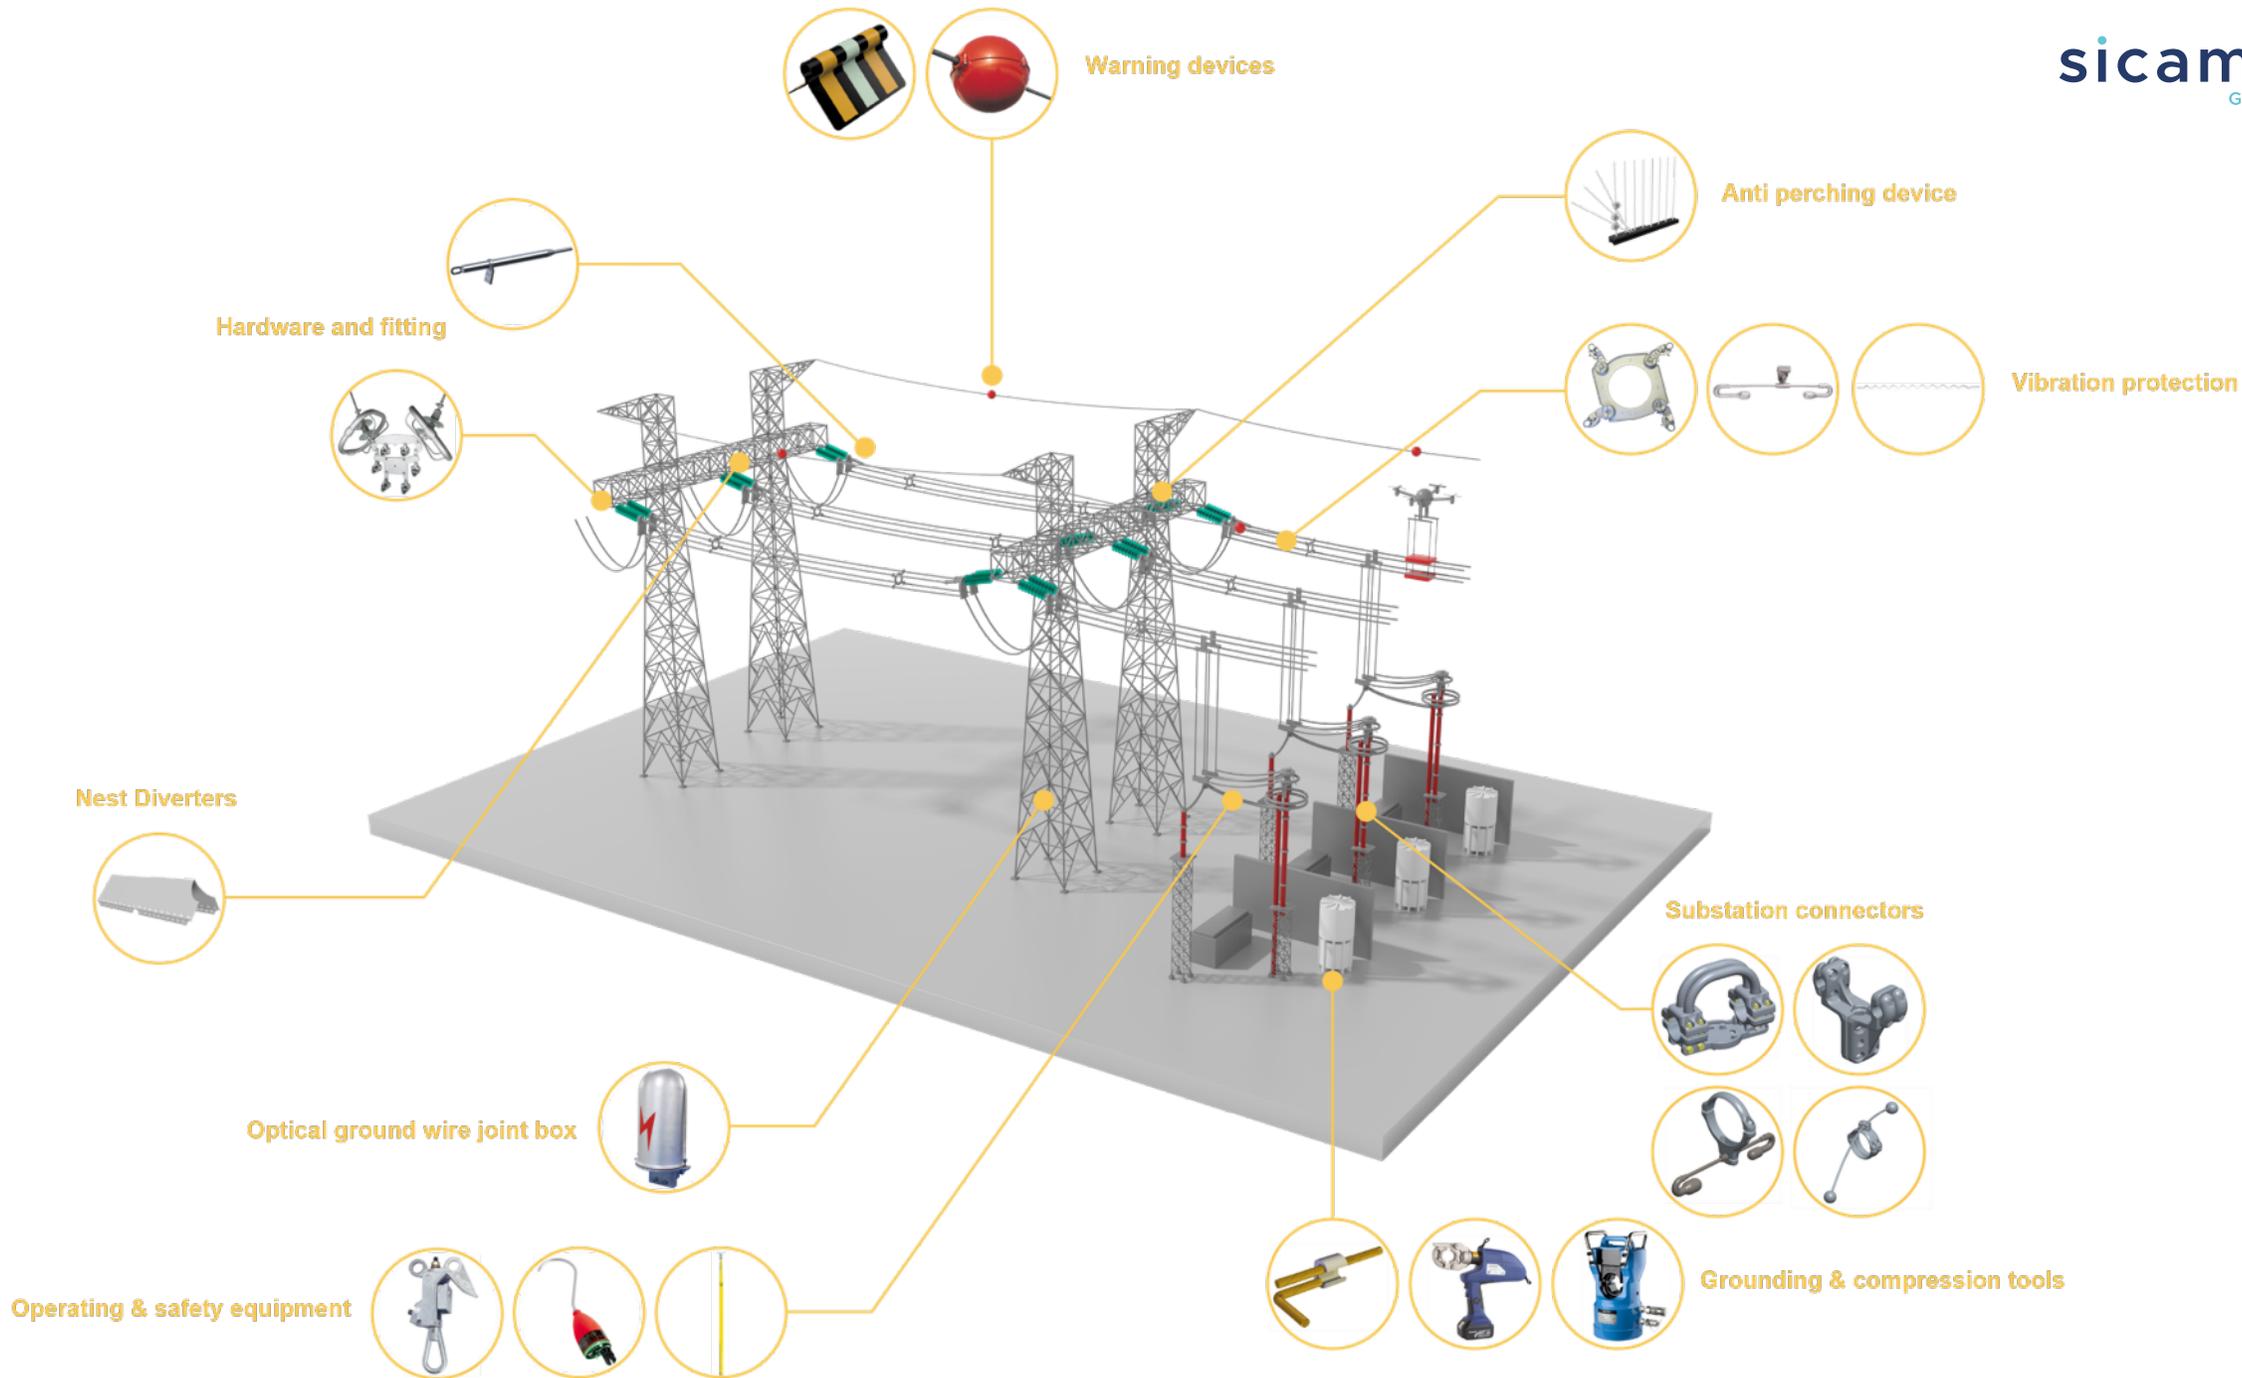

Decades of expertise

in transmission line accessories

With decades background and recognized expertise, Sicame Group is specialized in designing, manufacturing and producing comprehensive ranges of Transmission lines accessories and substation connectors adapted to the most technical configurations such as 8-bundle Spacer dampers, UHV HVDC connectors or innovative High Temperature conductor's accessories.

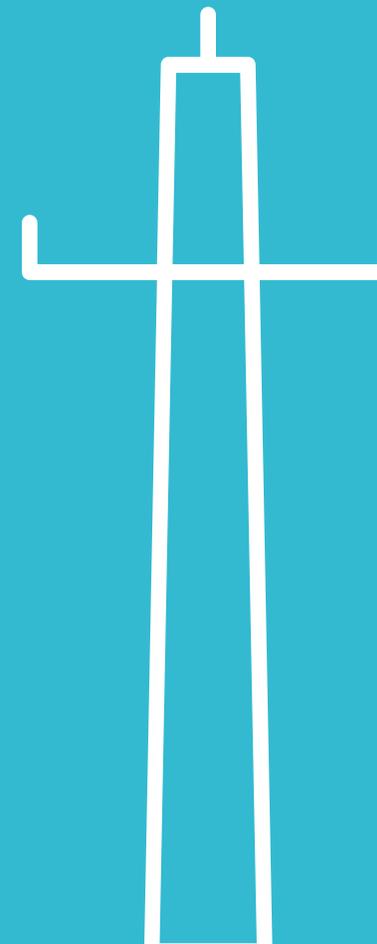

- Transmission line hardware and fittings
- Aeolian vibration protection
- Accessories for HTLS cables / low sag
- Substation accessories (connectors and busbar vibration solutions)
- Obstruction warning and bird diverter devices
- Optical fiber cables accessories (OPGW, OPPC...)
- Safety equipment & tools

Distribution

A wide range of line accessories

since 60 years

Supported by Global experience and continuous technical exchanges with our customers, our connectors, fittings and hardware provide utilities with a wide range of accessories necessary to build resilient networks – just right to their quality and technical expectations.

- **MV Overhead networks:** Pole line hardware innovations, MV Covered networks, Innovating connection technologies, Smart sensors, Solutions for storm and wildlife mitigation.
- **MV Underground:** Cold shrink joint technology acclaimed by leading DSOs, 3-layer robust heat shrink joint technology, shear bolt connectors
- **LV Overhead:** Global leader in IPC technologies and accessories associated with LV ABC networks
- **LV Underground:** Resin / cold shrink / heat shrink accessory technologies, single-core underground IPCs
- **Equipment:** Stringing tools, compression hydraulic tools, electrical safety equipments
- **Services and digital:** Network sensors, asset management & traceability solutions, network design and dimensioning solutions

Overhead

Safety equipment

Anti theft devices

LV mechanical protection

LV surge arrester

Wildlife protection devices

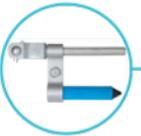

Equipped shelters

Underground

Commercial & Industrial

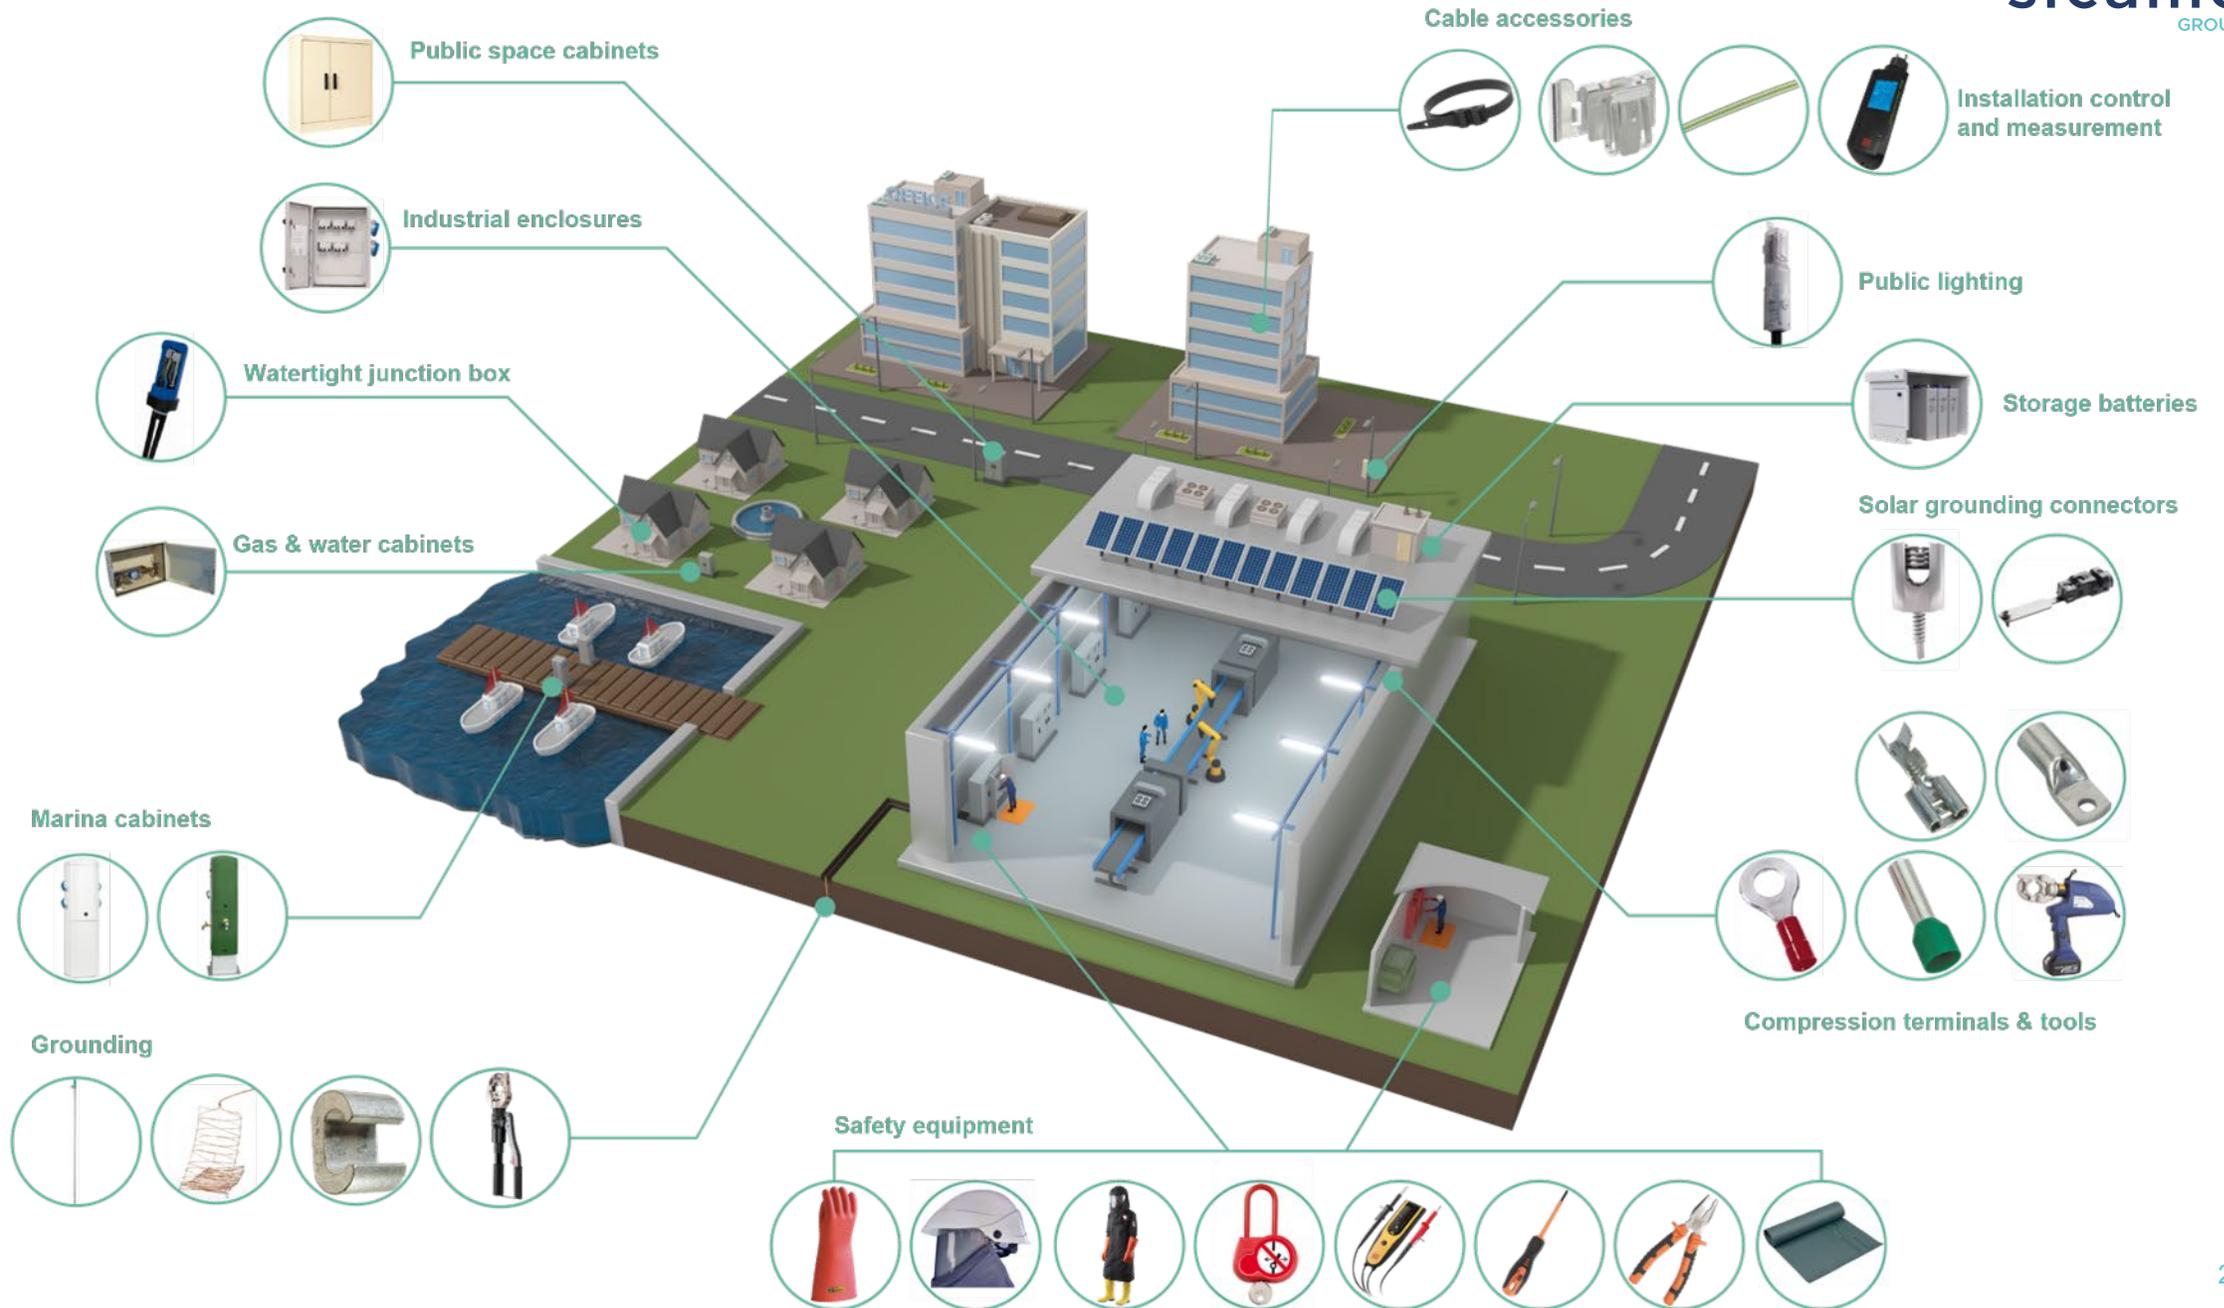

Develop electrical energy

in the commercial and industrial sector

Sicame Group supports the development of electrical energy in commercial and industrial sectors by providing following solutions:

- Connection, insulation, fixing accessories and associated tools for electrical wiring
- Individual and collective protective equipments, insulated tools, voltage detectors, signaling and consignment accessories for working on electrical equipments or installations
- Accessories and connection boxes for public lighting
- Taylor made shelters and technical sheds

Electromobility

A player in the electromobility transition

Sicame Group offers solutions for charging infrastructure deployment and safety on interventions.

- Connecting solutions from upstream & downstream network to charging points
- Electrical sizing solution for EVSE connection
- Solutions for the protection of people working on electrical installations
- charging measurement and control solutions
- Training on EVSE and electromobility purposes

**Protection & switch
disconnection cabinets**

**EVSE insulating
piercing connectors**

End of span accessories

Metering solutions

**Fire & electric
shock rescue**

**Service entrance
enclosure &
metering solution**

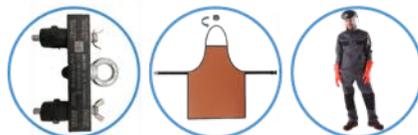

GARAGE

Power and grounding terminals

Battery lift up & protective equipment

Roller cabinet & insulated tools

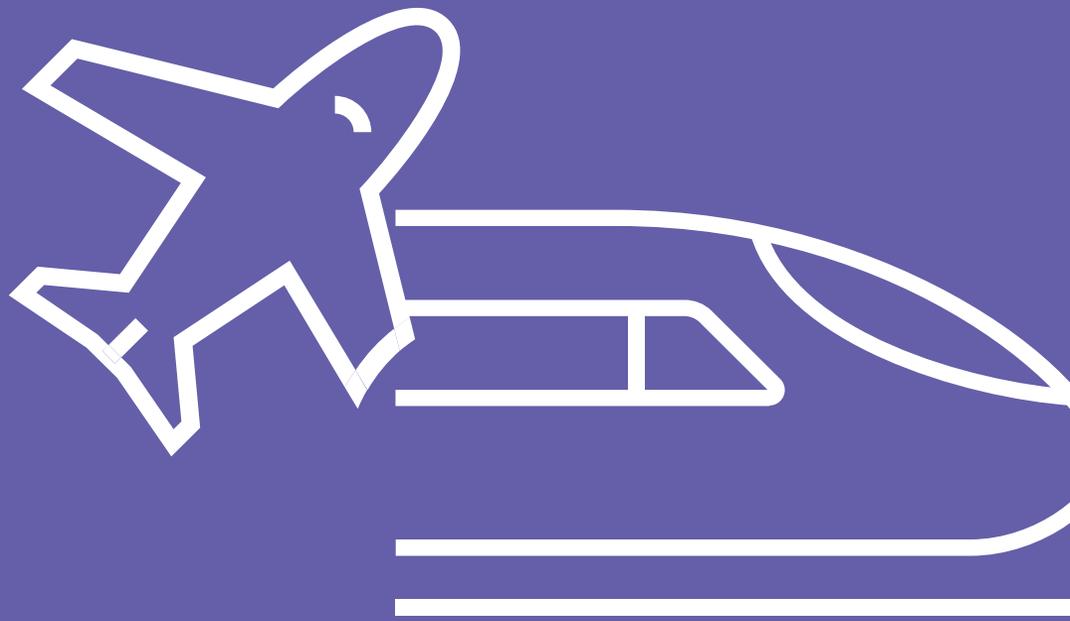

Test, measurement & lock-out tag-out

OEM

Reliable and robust solutions

Sicame Group contributes to energy efficiency by designing and developing reliable and robust solutions to establish optimized connections for:

- Railway rolling stock
- Thermal, hybrid and electric vehicles
- Airplanes, eVTOL and satellites
- Systems and equipments for electrical networks
- Technical cables

Power & battery lugs

Lugs for copper and aluminum cables

Power & battery lugs

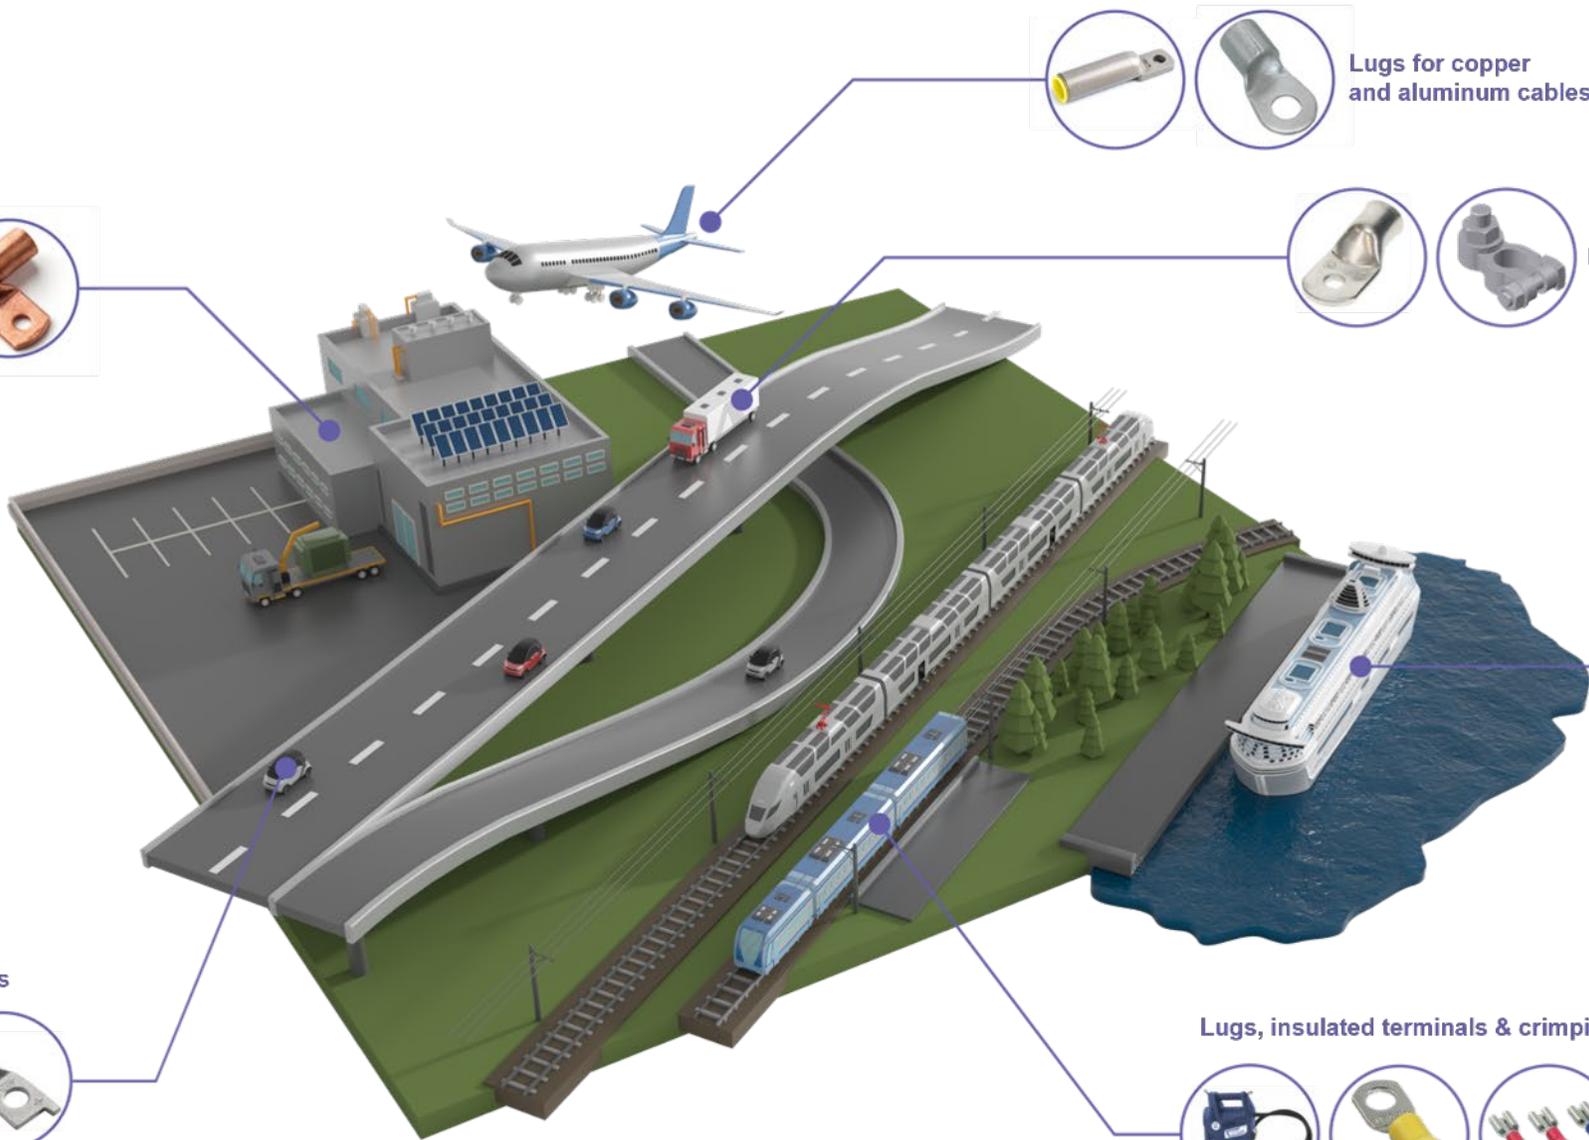

Lugs & cable accessories

Power and grounding terminals

Lugs, insulated terminals & crimping tools

Services

Associated services

to maintain and increase the level of satisfaction

Sicame Group offers a series of services that bring high added value to our clients' operations:

- Training, certification
- Technical audits
- Maintenance
- Laboratory tests (for equipment, for components, etc.)
- Repairs, upgrades
- Connected services

To go further

Innovation in the Group

We develop **efficient and sustainable products** and services that meet our customers' needs by relying on our **innovation ecosystem** (collaborative and international).

A wide field of expertise

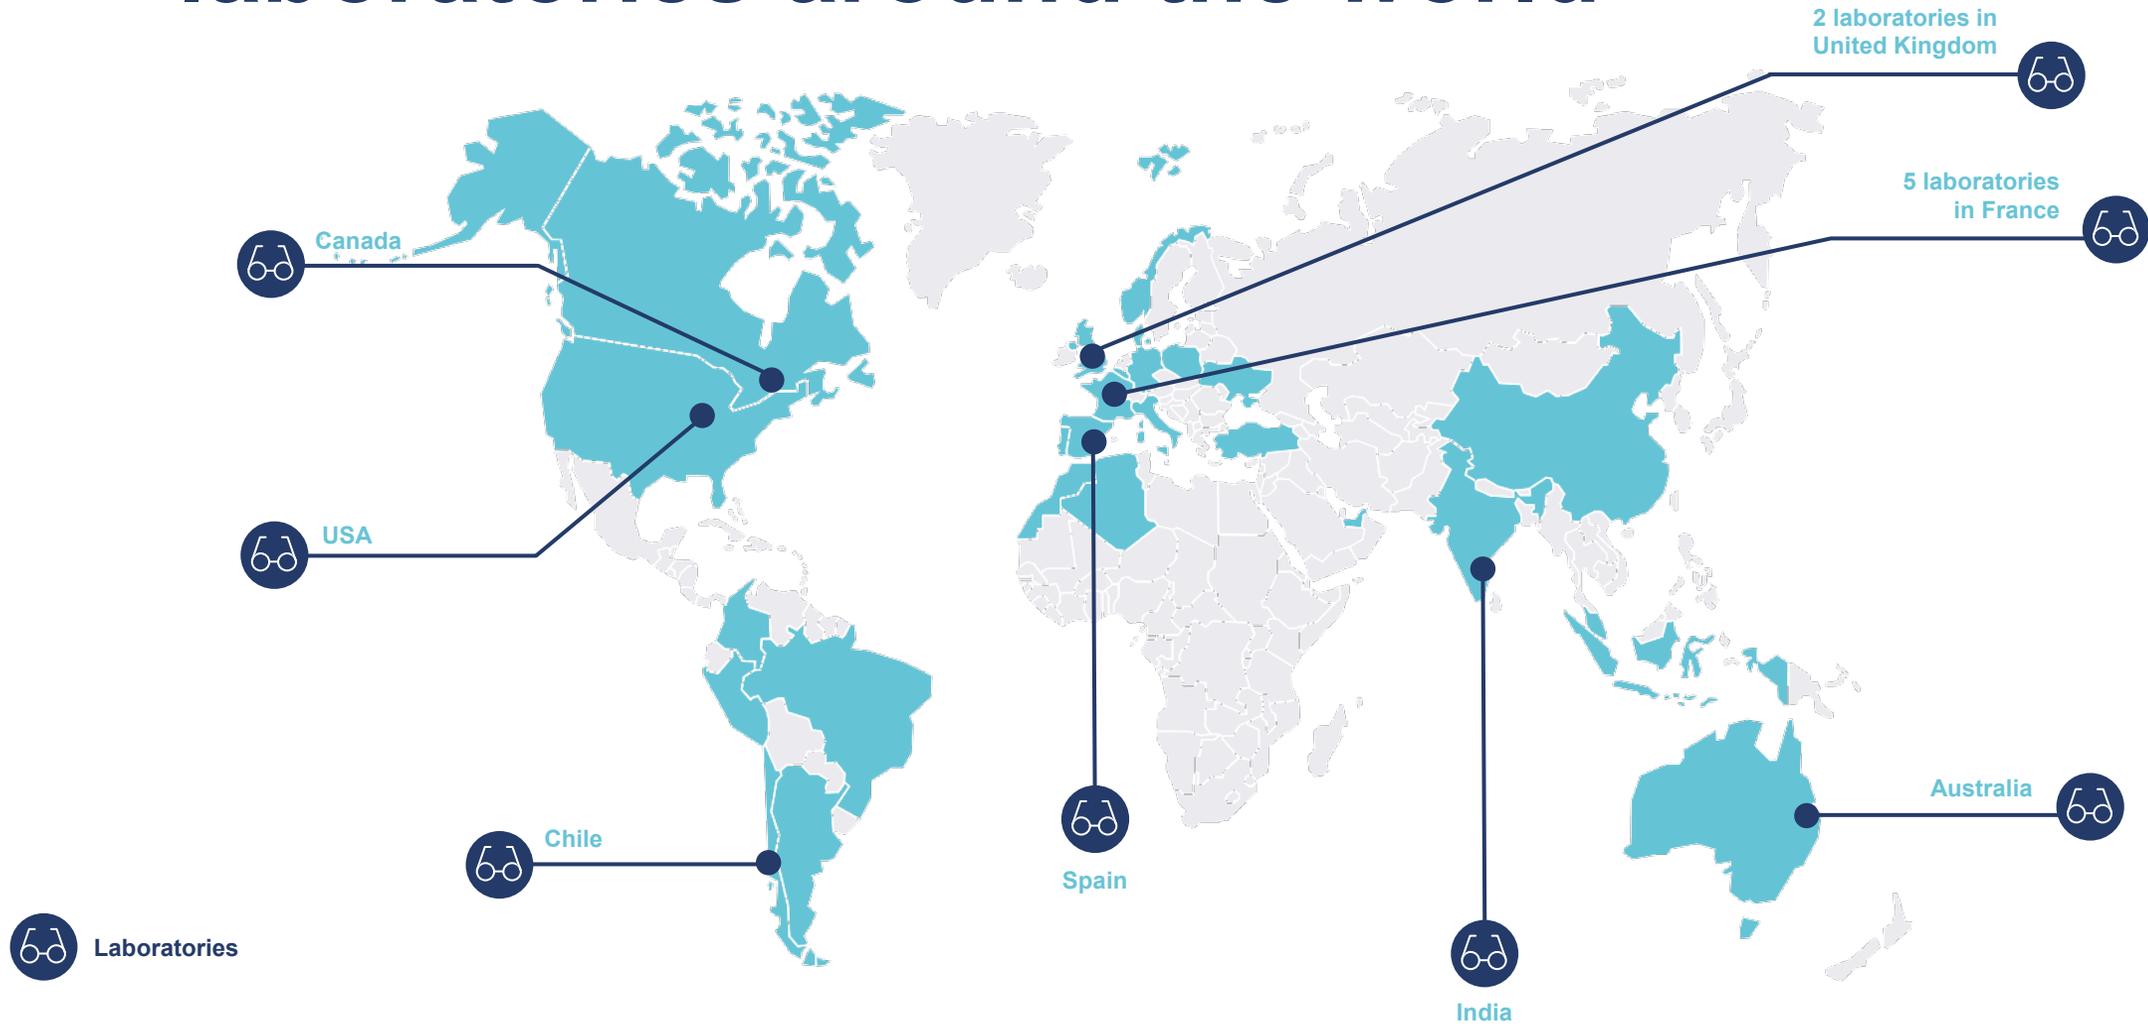

- Electrical phenomena and tests
- Energetic efficiency
- Networks' digitalization
- Digital simulation
- Materials and processes

Our markets of the future

- Electrical networks and installations (LV, MV and HV)
- Electromobility (Safety and EVSE)
- Renewables
- Smart grids and smart city

13 testing and research laboratories around the world

Product quality and customer service is at the heart of Sicame Group's concerns.

All our subsidiaries collaborate with each other so as to achieve permanent improvements in processes and towards a "QSE" (quality, safety, environment) evolution.

Some certifications and authorizations examples

Certifications

Quality in the Group

Foundation

For many years, Sicame Group has been clearly committed to **social and humanitarian actions** in perfect harmony with **its values and mission**.

Because for us, the **social work** participates in reinforcing the will to be part of a **dynamic of solidarity** and is part of a **responsible approach** for the common good.
