High Quality Original Spare Parts

Arsopi Thermal recommends genuine (original) high-quality spare parts that give you a sense of security and stability.

The use of original spare parts guarantees that the compounds and dimensions are perfectly fit to the customer's requirements.

Original replacement parts are always available to be immediately shipped and ensure confidence in Arsopi Thermal's After-Sales Service reliability.

Why ORIGINAL Spare Parts?

- Swift response
- Original highest quality, performance, and warranty
- Reliable compatibility with applicable equipment
- Long-term durability for maximum performance lifetime
- Excellent cost effectiveness

High Stock Level on Plates and Gaskets

For immediate dispatch, Arsopi Thermal always maintains the high stock levels of our spare parts no matter what material the plate/gasket is composed of.

Fast Delivery and Installation Time

Arsopi Thermal genuine spare parts are quick, easy to obtain.

Preventive Maintenance

Equipment should be inspected on a regular basis to avoid any unforeseen events that could have a significant impact on product productivity. Arsopi Thermal's highly skilled specialists conduct a condition audit of your equipment and evaluate the necessity of cleaning, repair or upgrade etc. to propose and implement the optimal measures and solutions according to the condition.

- Reduce the risk of equipment damage
- Maintenance plan and cost management
- Reduce equipment cost and deterioration
- Ensure safe equipment operation and secure production stability
- Extend equipment life

Update & Modification

As the efficiency decreases after long-term operation, it becomes necessary to change the device status and performance. In addition, operating conditions change over time, necessitating redesign of equipment to meet changing process, condition, and function requirements.

Arsopi offers a wide range of services to take your operations to the next level with a variety of upgrade and modification solutions that incorporate the latest technology to improve productivity.

- Minimize wear and damage
- Extend equipment life
- Improve productivity and stability through performance optimization
- Optimize operating costs

Consulting

Our diligent technical maintenance team offers a variety of training programs that effectively combine technical and hands-on training to enhance your technical team skills and broad knowledge of PHE. A tailored training menu is also available to meet the specific needs of particular products, industries or applications.

- Safety training
 - Operator training
 - Technical and maintenance training
-
- Improve production efficiency
 - Extend equipment life
 - Contribution to equipment safety and worker safety measures
 - Improve operational reliability and security
 - Reduce maintenance time cost

Repair

Our specialists repair the equipment upon your requests and can offer a set of standard service packages according to your needs.

- Minimize downtime
- Maximize production capacity
- Extend equipment life
- Prevent indirect damage and accidents
- Reduction of energy and operating costs
- Maintenance cost reduction

Diagnostics & Maintenance

Regardless of industry or application, there is a need for more reliable heat exchangers.

Based on our rich experience, Arsopi Thermal will advise you on regular maintenance periods and methods to maintain the performance level of your equipment and provide optimal maintenance services that keep operating costs low. A periodic maintenance contract for your equipment is also available through various types of service packs.

- Maintain safe equipment operation
- Ensure operational reliability and security
- Extend equipment life
- Reduce operating costs

Services can be conducted site or at our service factory.

Arsopi Thermal Services Packs

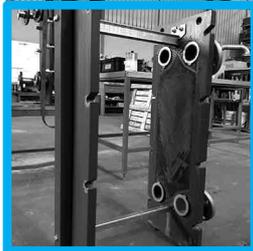

Arsopi Thermal can offer a set of standard service packages that can be adapted to your needs.

- **Aqua Service:** Water washing service for all heat exchanger plates
- **Xpress-A Service:** AQUA service with Hydraulic Test
- **Super Service:** Chemical washing service for all heat exchanger plates
- **Xpress-S Service:** SUPER service with Hydraulic Test
- **Premium Service:** Chemical washing service and dye penetrant testing of all heat exchanger plates
- **Hydraulic Test:** Hydraulic testing on plate heat exchanger
- **Frame Renewal:** Frame overhauling to improve the plate heat exchanger frame
