

WHAT IS THE METAVERSE?

IS IT JUST THE INTERNET IN 3D?

It is a version of the internet as a unified, universal immersive world.

Accessed via the use of virtual reality and augmented reality headsets.

It is a place which runs parallel to the real, physical world where you can spend your digital life in the form of an avatar

Interact with other avatars in real time

Term "Metaverse" first coined in 1992 Sci-Fi novel "Snow Crash"

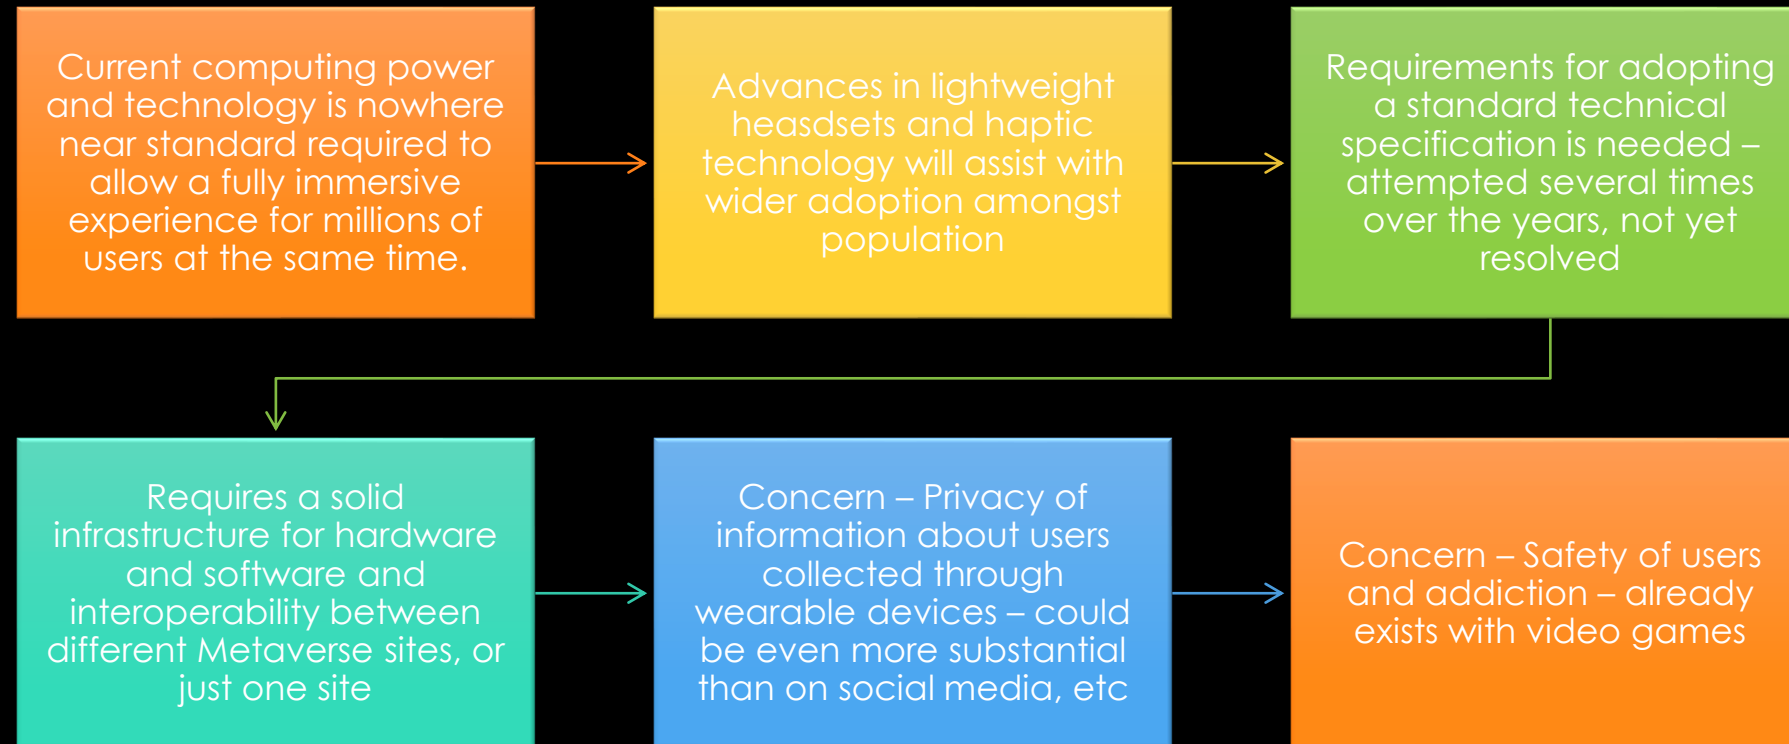

Recent development interest centers around Web3 concept of a decentralised iteration of the internet

Parts in existence in video games – World of Warcraft, Second Life, Minecraft

Augmented Reality, Mixed Reality and Virtual Reality.

Think of it like Cyberspace

DUDE, WHERE'S MY ISLAND?

WHO ARE THE BIG COMPANIES BUILDING IN THE METAVERSE?

In 2020 – in-game
purchases in Fortnite
was \$5.1 Billion

SO WHY THE BIG INTEREST?

SO WILL IT BE LIKE “READY PLAYER ONE”?

Presently it is highly unlikely that there will be a unified single Metaverse

There will be multiple Metaverses for various reasons – closed & open platforms – based on how they operate with others

Computing capability and competing large companies building to their own requirements

Walled Gardens – closed platforms controlled by one company ie: Meta, Nvidia and Alibaba

DAOs – Decentraland and The Sandbox – development decided by network members – Web3

Merchandise opportunities – new revenue opportunities – digital fashion

HOW CAN I ACCESS IT?

Virtual Reality headsets are an entrance point for most people to access

Web2 Metaverse accessed through gaming consoles, laptops, mobiles

Web3 expected to be a much more immersive experience

Technological advances in Haptic suits (physical experience) and also treadmills (realistic mobility) will offer a more immersive experience

Technological advances will also allow a larger number of people to access the same space at the same time –
(Fortnite concert 2019 – 10M+ audience, 2020 April concert – 12M+)

WHAT IS THERE TO DO THERE NOW?

Meta – Horizon

WHAT CAN I BUY THERE?

- Land – you can buy virtual plots of land – as an investment or to build on it
- Build your own gallery to show of NFT collection
- Create a game and charge Cryptoassets to play it
- Land is represented by NFT – ownership stored on blockchain
- Currently plot for sale - \$1.6M. Average plot - \$6K
- The Sandbox – plot up for sale for \$450,000 as Snoop Dogg is virtual neighbour
- Secondary market on NFT sites, ie: OpenSea, purchase land from owners
- Prices effected by facilities – near to roads, plaza, places of interest, etc

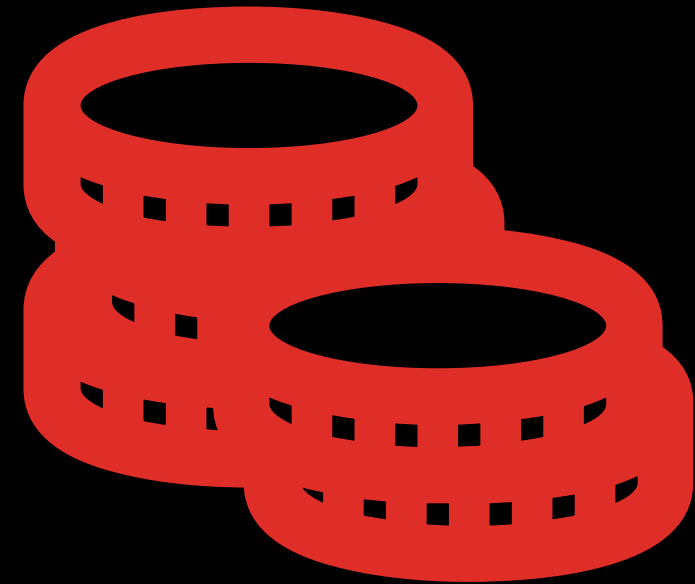

WHAT ELSE CAN I BUY THERE?

- Wearables – Skins. Clothing and accessories for avatars
- Digital fashion houses
- Real world fashion houses – Gucci, Balenciaga, Nike sneakers, Snoop Dogg
- All are NFTs stored on a blockchain
- Certain wearables are statements of wealth and social standing
- Can denote you belong to a certain faction, attended a concert or work somewhere
- Active second-hand market
- Decentraland – over 71,000 created items
- March 2022 – 1st Metaverse Fashion Week – Tommy Hilfiger, catwalks by D&G, events offering limited edition wearables

CURRENCY OF CHOICE?

- The sale of goods and service needs a payment method to facilitate trading
- Each Metaverse will have its own cryptoasset or token
- Decentraland – MANA
- The Sandbox – SAND
- Otherside (soon to launch from Bored Ape Yacht Club) – APE
- All are ERC20 tokens on Ethereum (MANA also available on Polygon)

WILL THERE BE CRIME WITHIN THE METaverse?

OpenSea 42.8%
LooksRare 57.2%

POTENTIAL AVENUES FOR CRIMINALITY

Money Laundering

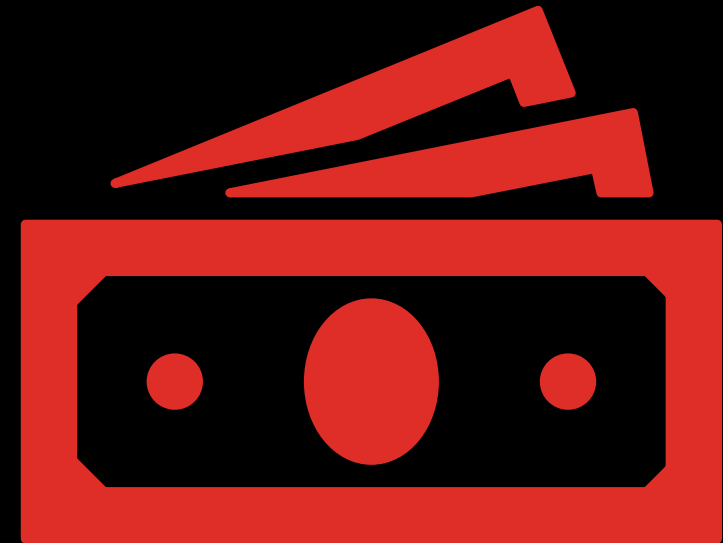

2021 total sales of assets/land exceeded \$500M on four sites

2022 estimated to rise to \$1B

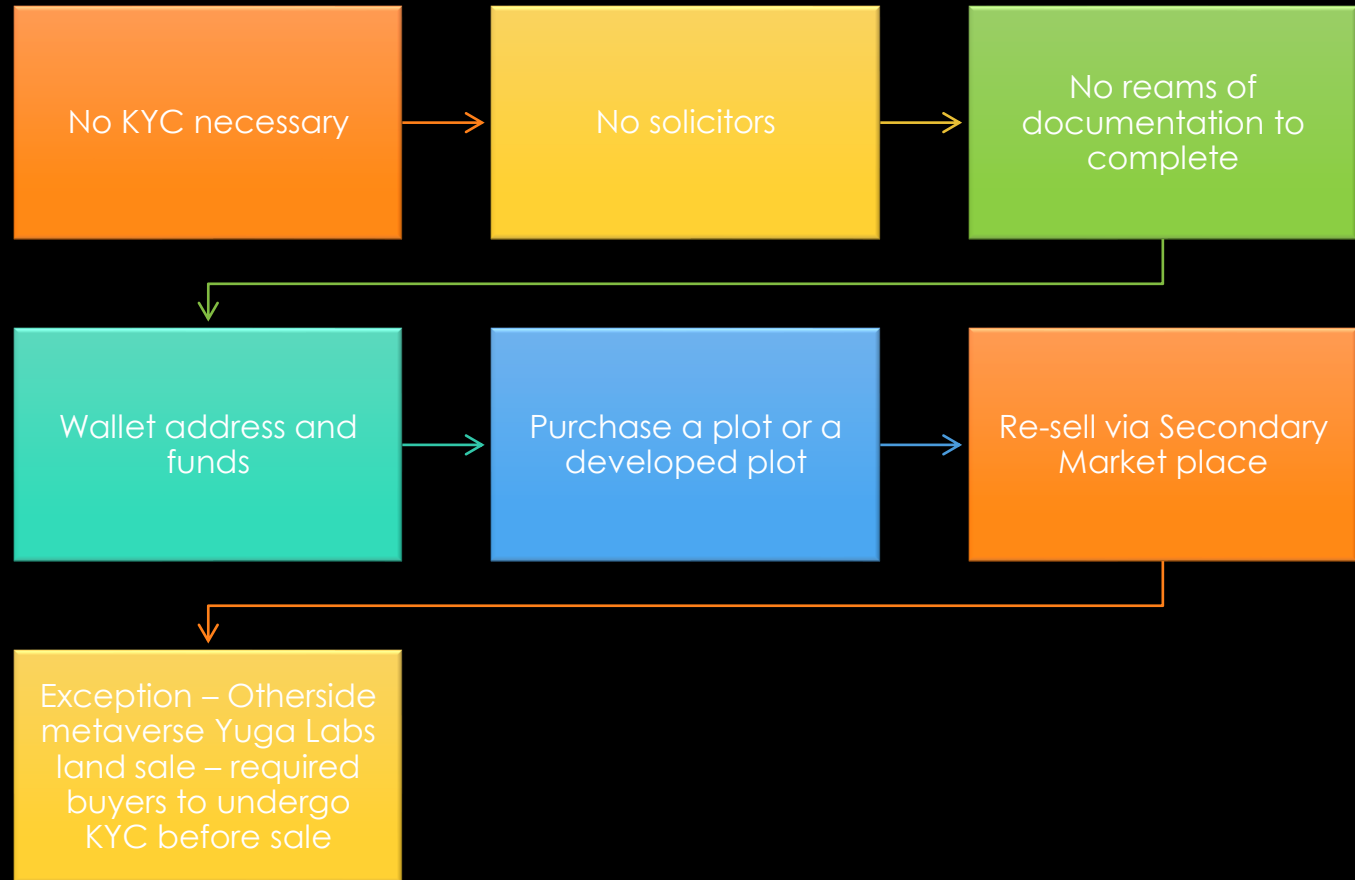

December 2021 – Sandbox sold 166,464 plots for \$12,700 (96 x 96m) (Ethereum)

Decentraland – 90,600 plots at \$14,440 (16 x 16m) (Ethereum)

BrandEssence Market Research – virtual real estate will grow by 31% per annum to 2028.

SO WHAT
MAKES LAND
SO
ATTRACTIVE?

HOW ABOUT WEARABLES?

- Less market liquidity – infinite number and rarity
- Judging as to what will be a good investment
- Average Decentraland wearable under \$100
- Exceptions – Decentraland bloody knife - \$12,000
- Coca Cola Bubble Jacket – on sale for \$1.5M
- The Sandbox – Super yacht - \$650,000
- Currently limits usefulness as ML tool
- Wearables can be moved across Metaverses
- Metaverse Wearable Market estimated to be worth \$3 Trillion by end of 2023

Decentraland Wearables NFTs were sold 37 times in the last 7 days. The total sales volume for Decentraland Wearables was \$619.83. The average price of one Decentraland Wearables NFT was \$16.8. There are 10,930 Decentraland Wearables owners, owning a total supply of 72,283 tokens.

Decentraland is an Ethereum blockchain-powered virtual world, developed and owned by its users, who can create, experience, and monetize content and applications. Wearables are worn in game by avatars, and collecting and trading these unique NFTs is a great way for users to integrate themselves into the growing community. The digital assets are dropped in limited-edition collections, and will be available to purchase right here in this store.

In Brief

CryptoSlam says that 95% of trading comes from wash trading.

LooksRare has a lifetime trading volume of \$22.2 billion.

Chainalysis has previously said that the NFT marketplace is rife with wash trading.

HOW DOES WASH TRADING WORK?

Movement of tokens/funds in a meaningless manner

Participants are buyer and seller

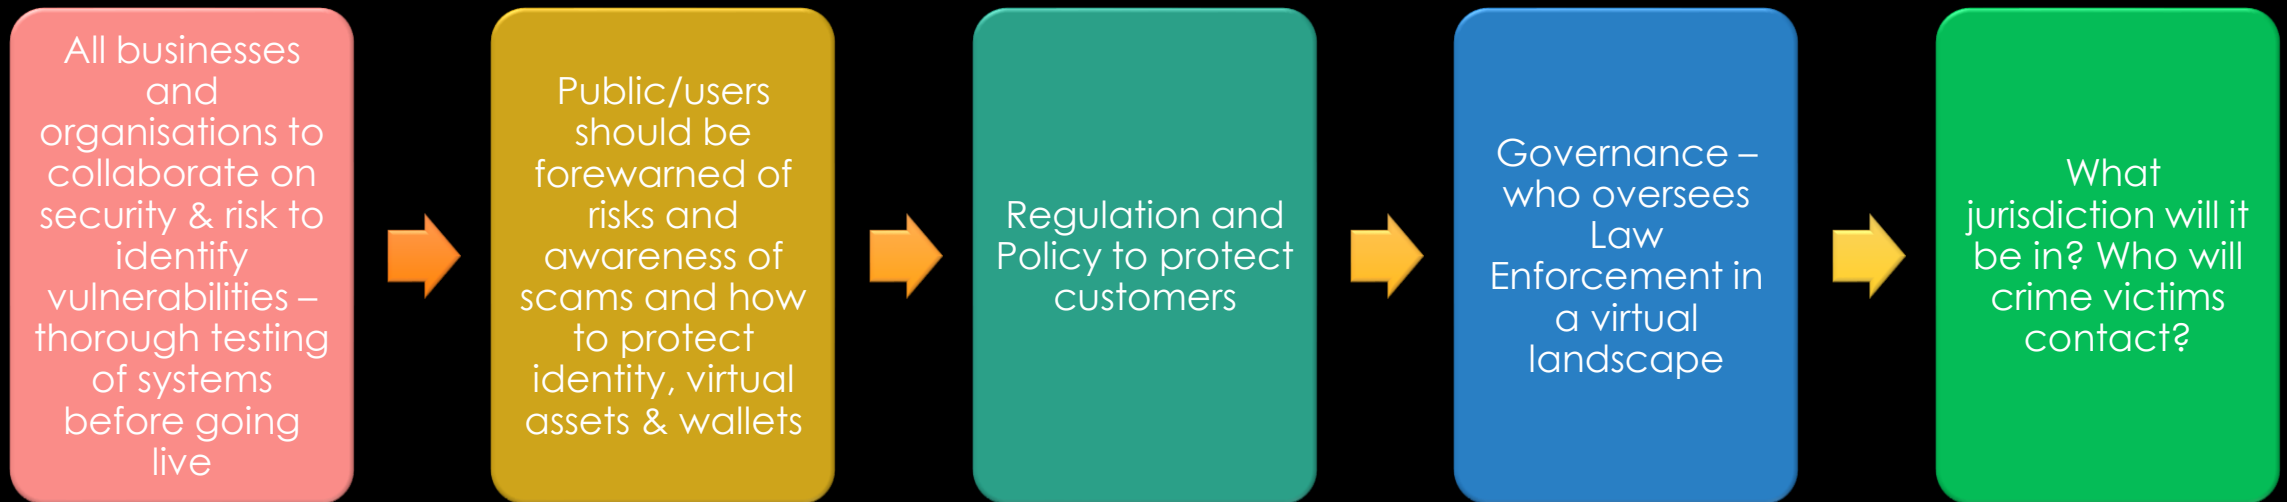

Artificial inflation in price of asset

Trade movement makes it look like it is more desirable than it really is

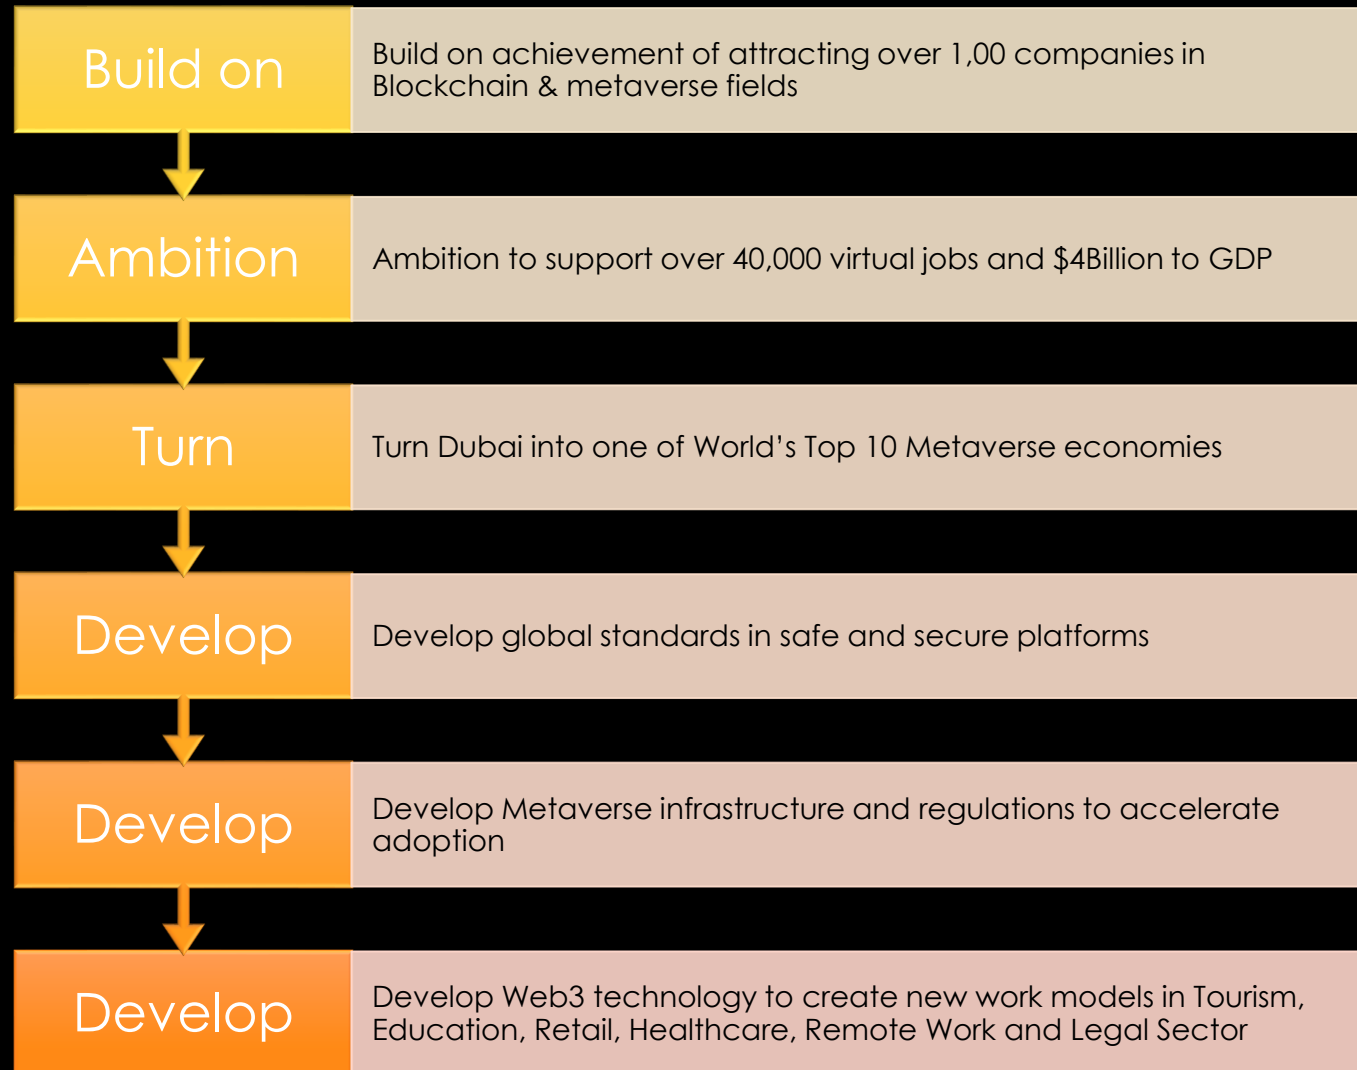

Movements generate fees for the platform additionally

Chainalysis report February 2022 – 262 users sold NFTs to addresses they were associated with
