

Streamline and secure your third-party assessments

AprovaLL, the end-to-end Third-Party Risk Management (TPRM) platform, helps organizations reduce supplier-related exposure, protect their reputation, and strengthen operational resilience through unified governance, risk, and compliance management.

### Customizable workflows

Optimize your processes with fully configurable alert rules and validation paths.

### Real-time alerts

Monitor supplier assessments in real time and track progress at every stage.

### Powerful integrations

Leverage seamless integrations with leading market tools and centralize all third-party risk management within a single platform.

### Dynamic and intuitive dashboards

Access real-time visibility into supplier files, statuses, and required actions through modern, interactive dashboards.

### Assess maturity levels

Clearly identify your suppliers' maturity across the key risk domains that matter to your organization.

### End-to-end evaluation management

Streamline risk assessments across the entire supplier lifecycle, from onboarding to continuous monitoring.

### Our clients

« Supplier data collected internationally through the AprovaLL onboarding process has significantly streamlined master data management for our procurement teams. Thanks to the customized automation of our internal governance rules, the platform now enables us to effectively manage supplier risk. »

Corinne Petriaux, Business Application Manager, Vallourec

# Our solutions

## Human Rights

Assess your suppliers' human rights practices and ensure they operate locally and globally in line with your ethical standards and compliance expectations.

## Legal Compliance

Strengthen legal oversight by automating document updates and ensuring full alignment with local and international regulatory requirements.

## Environment

Improve visibility into the environmental initiatives of your suppliers by integrating ESG workflows that support internal reporting and collaboration.

## Finance

Evaluate the global financial health of your suppliers, detect potential banking fraud, and anticipate risks that could disrupt your business operations.

## Ethics & Compliance

Consolidate supplier information to generate accurate integrity scores, identify ethical risks, and take informed actions to strengthen both supplier assessments and your organization's reputation.

## Cybersecurity

Collect and analyze cyber-risk documents, automate your internal actions, and rapidly assess your suppliers using a global data repository.
