- More than 28,000 members of the EM Normandie Alumni association

To conduct change while being socially and environmentally responsible and sustainable, organisations are increasingly using social innovation methods which incorporate their various communities and stakeholders. These strategic methodologies can be activated by designing and delivering participatory experiences likely to engage people and foster collective intelligence. Be they live or digital, community stewardship and purpose-driven meetings and events might be powerful instruments for building and developing enhanced relationships with stakeholders. They also contribute to strengthening organisations' capabilities to cooperate and co-innovate with them, and ultimately to secure their acceptability by civil societies.

This programme is aimed at training future experts in new methodologies based on relationships, creative experiences and meeting & event designs. These can be used by socially responsible organisations to engage their stakeholders, and cooperate and innovate with them. The programme features multicultural classes and internationally-focused content hinged upon a combination of CSR approaches, collective intelligence methods and complex event project management. Students are expected to act as professionals in the making: insightful, proactive and trailblazing.

LAURA LITRE VALENTIN, PhD ACADEMIC DIRECTOR
