

# Inspire

the EU and the ocean value chain: global mobilization

## Thierry Ranchin

Scientific Coordinator of Horizon  
Europe Project *EuroGEOSec*  
Mines Paris PSL

# EuroGEO – A Regional initiative of GEO

## An engagement framework:

**With Action Groups:** practitioner forums and think tanks, as well as agents of change for improving R&I impact in Europe.

**With National GEOs** and Copernicus NCPs: enhances the European representation in GEO initiatives.

**With Regional GEOs:** Support the uptake of EO solutions globally, particularly by promoting Copernicus services.

## A hub for the mobilisation of resources and engagement to enhance the delivery of Earth Intelligence:

**Cooperation, Coordination, Combination:** expand EuroGEO as a coordination forum for Earth Intelligence.

**Innovation Support and Market Development:** a portfolio of externalised activities that help the EuroGEO community maximise the impact of Research & Innovation (R&I) on Operations and Market uptake (e.g. with EUSPA)

**Integration of in-situ data:** catalyses ongoing European efforts, primarily under Copernicus, to strengthen the synergies between in-situ and EO (e.g. with EEA)

**Capacity Building and Best Practices:** gathers initiatives to empower Action Groups by organising targeted training sessions, workshops, and knowledge exchange initiatives.

**Communication and outreach:** strengthens the visibility and impact of each Action Group while reinforcing its connection to EuroGEO's overarching mission of leveraging EO data for tackling global challenges.

**EuroGEO**
