

ABSTRACT TITLE (TIMES NEW ROMAN, BOLD, 12PT, CAPS)

FIRST AUTHOR¹, SECOND AUTHOR², ..., NTH AUTHOR^N (TIMES NEW ROMAN, 11PT, CAPS),

¹*Author1 Institutional Affiliation, author1@mailserver.com (Times New Roman, italic, 11pt)*

²*Author2 Institutional Affiliation, author2@mailserver.com*

^N*AuthorN Institutional Affiliation, authorN@mailserver.com*

Keywords: 3 to 6 keywords. (Times New Roman, italic, 10pt)

This document provides the L^AT_EX template for abstract submissions to the MicroFluidics 2024 conference, to be held at IFPEN in Rueil Malmaison, from the 13th to 15th November 2024.

Keep two lines of space minimum between keywords and the text.

The body of the text uses the Normal style, which is formatted in Times New Roman 10 pt, with the paragraph justified, single line-spacing and no spacing after paragraph. If you use sections, we recommend using two section levels at most.

Page set-up is A4 format, single column, margins all equal at 2 cm on left, right, top and bottom of the page. Do not indent the beginning of the lines. **The maximum abstract length is 2 pages**, including figures, tables, and references. The document must **not** have page numbering.

Do not use footnotes.

This L^AT_EX template goes along with a Makefile file that can be adapted to your needs. Inside the Makefile, the distrib target can be used to create an archive of your abstract files. Papers can be submitted as PDF files.

The template should not be modified. Authors tend to change margins, fonts or font size, paragraph spacing to adjust the paper to the maximum number of pages, **please do not do this**.

Figure 1: Taylor flow regime: a nice example of microfluidics

Figures, tables, equations or other elements should be centre aligned, and as close as possible to the text where they are referenced. The caption should use Times New Roman, Bold, 9 pt, as shown in Figure 1. Text may flow around figures or tables. The caption of tables should be below the table.

Table Heading (Times New Roman, Bold, 11 pt, left aligned)	Column 1	Column 2
Table Text (Times New Roman, 10 pt, left aligned)	Data 1	Data 2

Table 1: Title of table

Equations should be indented and numbered:

$$V = \frac{4}{3}\pi r^3 \quad (1)$$

Referencing uses IEEE style [1, 2]. For a quick reference, please consult:
