

OPTIBELT
PRESS BROCHURE

2025

A STRONG BRAND. SINCE 1872.

The Arntz Optibelt Group is one of the leading global producers of high performance drive belts and develops sophisticated drive solutions for customers all over the world.

The family-run company controls nine production sites in seven countries from its headquarters in Höxter and maintains its own logistics and sales centres in Europe, North and South America, Southeast Asia and New Zealand.

Optibelt offers the highest engineering quality in the form of customised drive solutions and industry-specific products.

More than 2,400 employees worldwide ensure excellent service, optimal customer proximity and high quality and safety standards.

A small, dark grey sphere representing Earth is the central focus. It is surrounded by a variety of industrial and household objects, including a red truck, a large crane, a washing machine, and several smokestacks, all arranged in a circular pattern around the sphere. The background is a light blue sky with a few wispy clouds.

IMPLEMENTING QUALITY.

Whether in mechanical engineering, the automotive branch, the agricultural engineering sector or the household appliance industry – Optibelt, already in its fifth generation, has made durability and uncompromising quality into a tradition.

THE BELT AS A HIGH-TECH DRIVE SYSTEM.

Since 1948, the Optibelt company has been manufacturing a wide variety of drive belts, drawing on more than a century of experience of working with rubber.

Constant investment in materials research and production technology as well as growing knowledge about the constraints associated with various uses have pushed the boundaries of machine capacity to new limits thanks to further development of the belt into a high-tech drive system.

THE HIGHEST QUALITY. WORLDWIDE.

Whether the drive solution is manufactured in Germany, Ireland, China or Mexico – our nine production sites in Europe, Asia and North America guarantee consistently high quality. Because quality is the foundation of our success. In order to continuously maintain and optimise these high standards, we implement an intensive quality management system.

NETWORKERS WITH SYSTEMS EXPERTISE.

Development excellence relies on expertise. And total commitment to the customer. We invest a great deal in research and development, to make sure that our technological and conceptual capabilities are always right up to date.

Our engineers are at the forefront when it comes to advancing the boundaries of the possible:

more power, less installation
space, different pulley
sizes. We listen to you
carefully – and then
find the right solution.

THE DRIVE FOR ALL INDUSTRIES.

The world is in motion – and we are driving it forward. In recent years, Optibelt has transformed itself from a product-oriented company into an industry-oriented provider of solutions. The best solution for the customer – this is our promise.

QUALITY IS BUILT ON EDUCATION & TRAINING.

Optibelt has been very successful for a very long time, and for this we have to thank the people who work here. And their ideas.

Well trained staff with up-to-date qualifications are the key to our success – which is why further education and training play a central role at Optibelt. We can only maintain our high quality standards if we have properly qualified specialist staff.

WITH A BROAD PERSPECTIVE.

The future belongs to the coming generations. For this reason, we believe it is important to shape the future responsibly and leave future generations a world worth living in. Optibelt is committed to sustainability – the ambitious environmental protection goals that we set ourselves are checked annually and certified.

Sustainable operations are not merely a question of image. They demand far-reaching and forward-looking decisions. The Arntz Optibelt Group is no longer just at home in Höxter, Germany. We now produce at nine sites in seven countries, and we own 32 sales locations in 27 countries, and 25 logistics centres in 20 countries. Around 2,400 people belong to the Arntz Optibelt family.

The company headquarters is still in Höxter, in Eastern Westphalia.

Year after year, a kestrel nests in a niche in the wall of our production hall in Höxter. Our symbol of sustainability – and we do everything to ensure that the kestrel keeps coming back...

**ALWAYS AT THE
HIGHEST LEVEL.**

Optibelt drive solutions are renowned for their extreme durability and optimal economic efficiency. Our production facilities work reliably and on schedule. With proven processes, many years of expertise, a tenacious spirit of research, and uncompromising precision. Reproducible precision at the highest level is an essential quality feature at Optibelt, whether we are producing costly customised products or tried-and-tested standard items from our solutions catalogue.
