

Supporting labs across multiple industries all within one laboratory information management platform.

Laboratories depend on accuracy, efficiency, and strong data integrity to deliver reliable, high-quality results. The Clinisys™ Laboratory Solution (CLS) brings these priorities together in a single, scalable platform—automating routine workflows, enabling interoperability across systems, reinforcing quality processes, and providing analytics that support informed decision making.

Across healthcare, environmental testing, water quality, food and beverage safety testing, contract services, crop sciences, and public health, CLS offers discipline specific capabilities through industry content packages. Built on more than forty-five years of laboratory experience, the solution supports essential processes for organizations of every size, helping labs operate consistently and confidently as their needs evolve.

Maximize operational efficiency

- Automate and simplify laboratory workflows across industries.
- Optimize staff time by reducing manual and compliance-heavy tasks.
- Access advanced dashboards, reports, and analytics to support informed decision-making.

Boost productivity & collaboration

- Reduce data silos and improve integration across instruments and systems.
- Facilitate standardization across sites, geographies, and processes to help lower total cost of ownership.
- Support seamless communication and data sharing.

Support quality & regulatory confidence

- Achieve comprehensive traceability and audit trails.
- Support compliance with international and national standards.
- Enhance result accuracy and reinforce customer trust and laboratory reputation.

Drive growth with scalable technology

- Accelerate turnaround times and support increasing test volumes.
- Utilize analytics for strategic planning.
- Configure workflows to scale locally or globally through secure SaaS deployment.

Clinisys™ technology drives the future

Clinisys™ Laboratory Solution is the technology foundation for the industry content packages providing the capabilities and flexibility needed to run efficient, compliant, and successful lab operations. The data-centric approach eliminates the need for laboratories to choose between an LIS or LIMS, supporting both patient- and sample-centric models, serving the diverse needs of different industries – now and in the future.

Healthcare

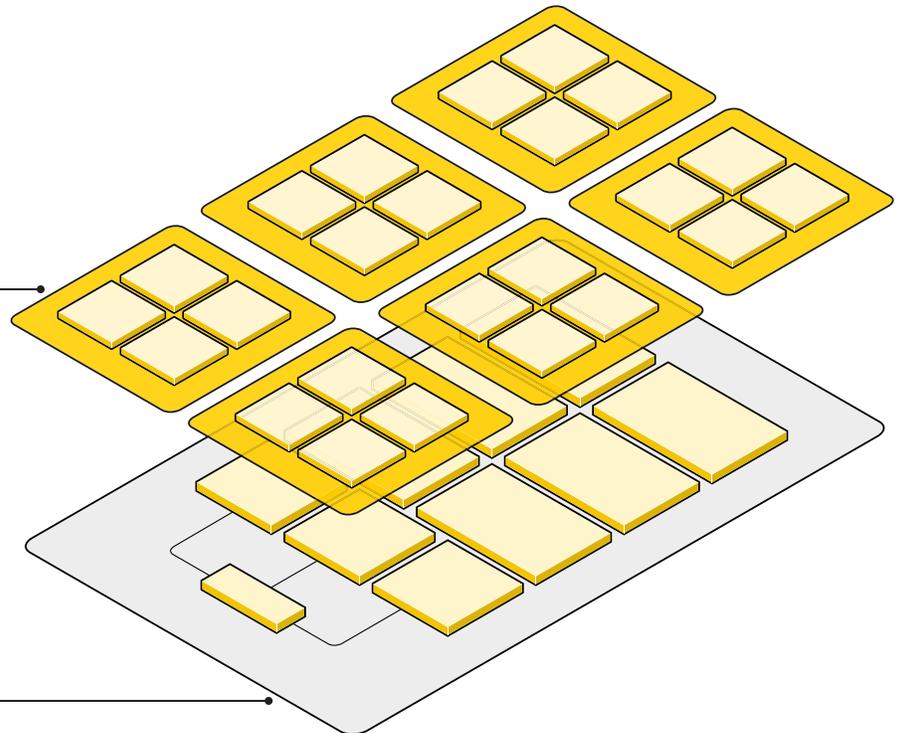

- Clinisys™ Toxicology Laboratory
- Clinisys™ Clinical Pathology Laboratory
- Clinisys™ Genomics Laboratory
- **Additional future planned offerings**
 - Clinisys™ Anatomical Pathology Laboratory
 - Clinisys™ Blood Bank Laboratory
 - Clinisys™ Order & Results Management

Scientific

- Clinisys™ Toxicology Laboratory
- Clinisys™ Contract Services Laboratory
- Clinisys™ Food & Beverage Laboratory
- Clinisys™ Environmental Laboratory
- Clinisys™ Water Quality Laboratory
- Clinisys™ Public Health Laboratory

One Platform

A data model, workflow engine and platform services that scales from the smallest to the largest multi-country laboratories and across different sectors, disciplines, and specializations. Solutions are delivered as **industry content packages** overlaid onto the CLS platform.

*Clinisys™ Clinical Pathology Laboratory and Clinisys™ Genomics Laboratory are exclusively available in North America and in US-English.

About Clinisys™

Clinisys enables healthier and safer communities as a global provider of intelligent laboratory informatics solutions and expertise that redefine the modern laboratory across healthcare, life sciences, public health and safety.

Millions of laboratory results and data insights are generated every day using Clinisys' platform and cloud-based solutions in over 7,000 laboratories across 39 countries.
