*Anti-Money Laundering: Current Trends, Prosecutions,
and the Challenges around Cryptocurrencies*

Ethereum Blockchain Explorers

ETHEREUM 101

Ethereum Basics: Ether

- Ether (ETH) is a cryptocurrency, just like Bitcoin
- Ethereum uses a blockchain to store transactions.
- All transactions on the Ethereum blockchain are public.
- Ethereum addresses can hold balances and require authorization (typically in the form of private keys) to spend from them
- Unlike Bitcoin, Ethereum transactions send exact amounts from one address to another.

Ethereum Basics: Smart Contracts

- The Ethereum network can store and run programs.
- Ethereum has a programming languages that enable the creation of:
 - Fungible tokens (i.e. cryptocurrencies)
 - Non-fungible tokens (e.g. Bored Apes)
 - Smart contracts (i.e. computer programs)
 - DeFi Platforms (i.e. financial services programs)
- Ethereum addresses typically store their owner's ether as well as their tokens.

Information displayed by Ethereum Blockchain Explorers

- **Block information:** dates, times and transactions
- **Transaction information:**
 - Amounts of Ethereum transferred
 - Tokens transferred
 - Senders and recipients
 - Dates and times
- **Ethereum Address information:**
 - Balances
 - Token holdings & activity
 - Address type: Contract Account or Externally Owned Account (EOA)

Some Ethereum Blockchain Explorers

- [Etherscan.io](https://etherscan.io) - English, Chinese, Korean, Russian, and Japanese
- [Etherchain.org](https://etherchain.org)
- [Ethplorer.io](https://ethplorer.io) - English, Chinese, Spanish, French, Turkish, Russian, Korean and Vietnamese
- [Blockchair.com/ethereum](https://blockchair.com/ethereum) - English, Spanish, French, Italian, Dutch, Russian, Chinese, etc.
- [Blockscout.com](https://blockscout.com)
- [OKLinl.com/eth](https://oklinl.com/eth)
- [Otterscan.io](https://otterscan.io)

Important features

- What language do they support?
- Do they present information clearly?
- Is the information that they contain comprehensive?
- Do they allow you to export information (e.g. in CSV files)
- Do they allow you to identify an address' Ethereum based assets?
- How comprehensive is the list of tokens/projects that they identify?
- Timeline graphics?

ETHERSCAN.IO

The most popular Ethereum Blockchain Explorer

Etherscan - Search

The Ethereum Blockchain Explorer

All Filters ▼

Search by Address / Txn Hash / Block / Token / Ens

- Ethereum Address
- Transaction Hash
- Block number
- Ethereum Name Service name (ENS)

Two Ethereum Address Types

Externally Owned Accounts

- May have an ETH balance
- No associated code
- Can initiate transactions
- Ability to send crypto is controlled by private keys

Contract Accounts

- May have an ETH balance
- **Has associated code**
- The code is initiated by transactions or messages from other addresses
- Its code must be deployed by another address

Contract Accounts

- Contract accounts are identified in Etherscan by the word Contract.
- Contracts must be deployed by other contracts
 - Tracing the deployer account may help you identify who is behind the smart contract's project (e.g. Bored Ape Yacht Club)

Eth: \$1,327.16 (+2.27%) | 29 Gwei

Contract 0xcDA72070E49

Etherscan Addresses/Accounts

- The Address page will tell you:
 - The address type (Contract or EOA)
 - The address deployer (if it is a Contract address)
 - The address' ETH balance
 - Warning information about the address

Exercise

Etherscan Address

<https://etherscan.io/>

Search for the following Address:

0x3DD59DE66e2AD31A7D663Df977Ddd6E5F2a5F6b6

1. Is the address a Contract or an EOA?
2. What is the balance of the address?
3. What name has the address been given by Etherscan?
4. Click on some transaction hashes:
 1. Can you identify any Ether being moved **into** the address?
 2. What type of NFTs did the address transfer?

Address 0x3DD59DE66e2AD31A7D663Df977Ddd6E5F2a5F6b6

Balance:

ETHERSCAN TRANSACTIONS

Some Basic Transaction Types

1. Simple ETH transfer

- Moves ETH from one account to another
- Requires payment of a fee

2. Simple Token Transfer

- Moves a token from one account to another
- Requires a fee payment as well as interaction with the token's smart contract

3. Transfer using a Smart Contract

- Initiated by another address (EOA or Contract)
- Requires fee payment as well as interaction with smart contracts

Etherscan Transactions

- You can search for a specific transaction using its hash.
- You can view an address' different types of token transfers
 - ERC20 fungible tokens
 - ERC721 NFTs
 - ERC1155 tokens (multiple token types)
- You can view the address' activity timeline

ETHERSCAN AND NFT_s

Etherscan & NFTs

- Etherscan allows you to search for individual NFTs and will display their history of their sales as well as their transfers.
- A simple sale will include:
 - A transfer of ETH from the buyer to the seller.
 - A transfer of the NFT from the seller to the buyer.
- Transfers may become more complex if the sales or transfers are made through marketplaces or decentralized platforms.
- When NFTs are stolen no sale transaction takes place – the NFT is just transferred.

Etherscan URLs

- A fast way to get information on specific tokens is to query Etherscan directly with a URL.
- The URL will take you directly to the information you need.
- Simply clicking on links may not get you to the information page that you are looking for (e.g. one containing an image of the NFT).
- You need to know:
 - The token contract address
 - The token ID number

`https://etherscan.io/token/<CONTRACT_ADDRESS>/<TOKEN_NUMERIC_ID#>`

List of and links to all transactions conducted involving a specific token.

Some Useful URLs

https://etherscan.io/token/<CONTRACT_ADDRESS>?a=<TOKEN_NUMERIC_ID#>

List of and links to all transactions conducted involving a specific token.

https://etherscan.io/nft/<CONTRACT_ADDRESS>/<TOKEN_NUMERIC_ID#>

Image of NFT, owner, transactions involving the NFT.

<https://etherscan.io/address/<ADDRESS>#tokentxnsErc721>

List of all the **ERC-721** token transfers conducted by an address.

<https://etherscan.io/tokentxns-nft?a=<ADDRESS>>

List of all the **ERC-721** token transfers conducted by an address.

Welcome to Blockscan Chat Beta

A messaging platform for users to simply and instantly message each other wallet-to-wallet, powered by  Log-in With Ethereum

You can use the same technique on some NFT platforms like OpenSea

<https://opensea.io/assets/ethereum/0xd4e4078ca3495de5b1d4db434bebc5a986197782/509>

The screenshot shows the OpenSea interface for the NFT 'Autoglyph #509'. On the left is a large image of the artwork, which is a square composed of many small, black, cross-like symbols. To the right of the image, the title 'Autoglyph #509' is displayed, along with the owner's address '0xef764bac8a438e7e498...', view count '1.0K views', and favorite count '46 favorites'. Below this, a 'Sale ends April 8, 2023 at 12:44pm GMT-4' timer is shown. The current price is listed as 345 ETH (\$448,465.50). There are two buttons: 'Add to cart' and 'Make offer'. Below the price section is a 'Price History' graph showing the price trend over time. The graph has a dropdown menu set to 'All time' and shows an 'All time avg. price' of £106.75. The graph's x-axis represents dates from 2/11 to 7/31, and the y-axis represents price from 0 to 300. A blue line shows the price increasing steadily over time.

Description

By **C352B5**

Autoglyphs are the first "on-chain" generative art on the Ethereum blockchain. A completely self-contained mechanism for the creation and ownership of an artwork.
