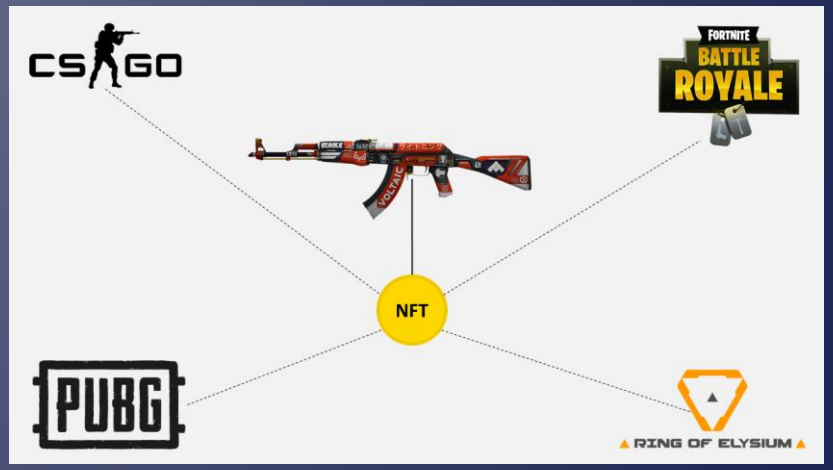
WHAT IS A NFT?

NFT'S EXPLAINED

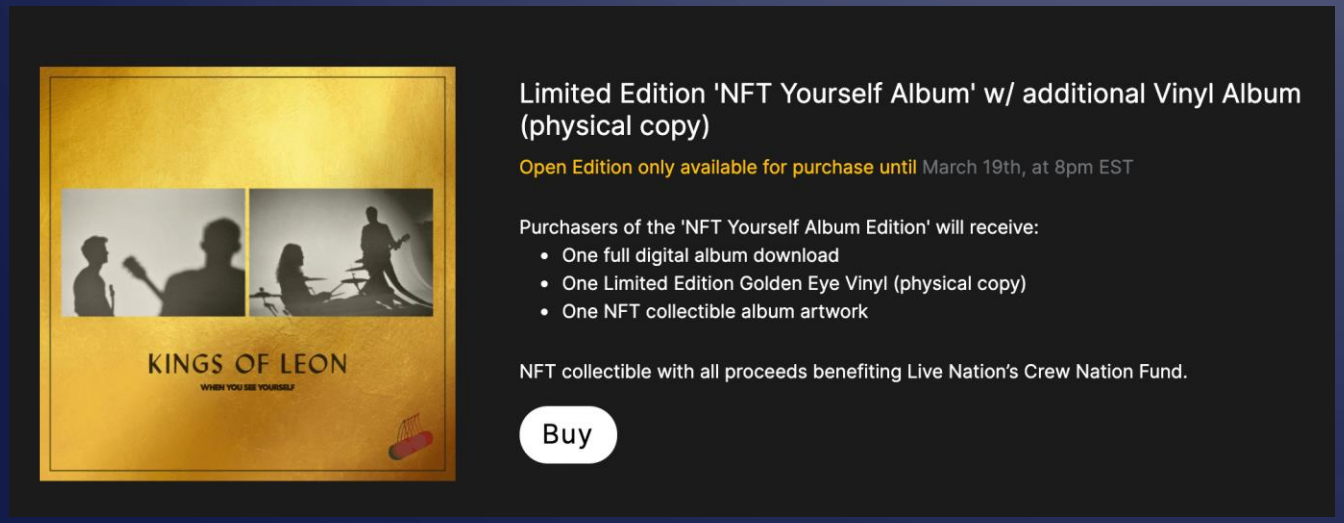
NFT stands for **'non-fungible token'**.
A NFT is a digital asset that links ownership to **unique physical or digital objects!**

Art

Real estate



Gaming



Music

NFT'S EXPLAINED

NFTs are sold **online,** via cryptocurrencies, and are the **digital proof of ownership** of an item.

NFTs are recorded on the **blockchain,** which ensures that the asset is **unique.**

NFT-projecten: Bored Ape Yacht Club, Meebits, Mutant Ape Yacht Club, RTFKT Clone X, Azuki

The **blockchain technology** ensures that the NFT cannot be changed or falsified. The registration on the **blockchain** is tied to a digital wallet. Theis crypto wallet contains a digital key with which you can prove that the NFT is your property.

NFT'S EXPLAINED

Smart contracts:

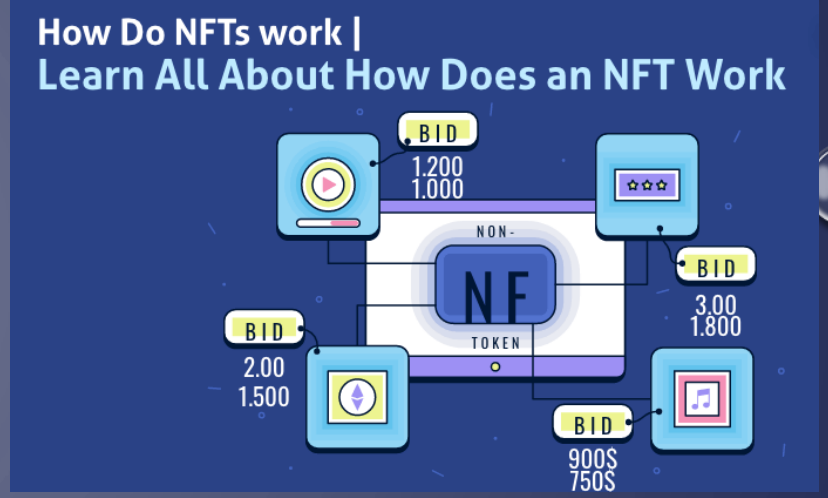
A **smart contract** is a piece of a code with which certain information is stored on the **blockchain**.

Smart contract are supported by multiple blockchains like, Ethereum, Solana, Tezos, Binance Smart Chain, etc.

A **smart contract** regulates 2 actions:

- Verifying ownership;
- Ensure that it is possible to tranfer the NFT.

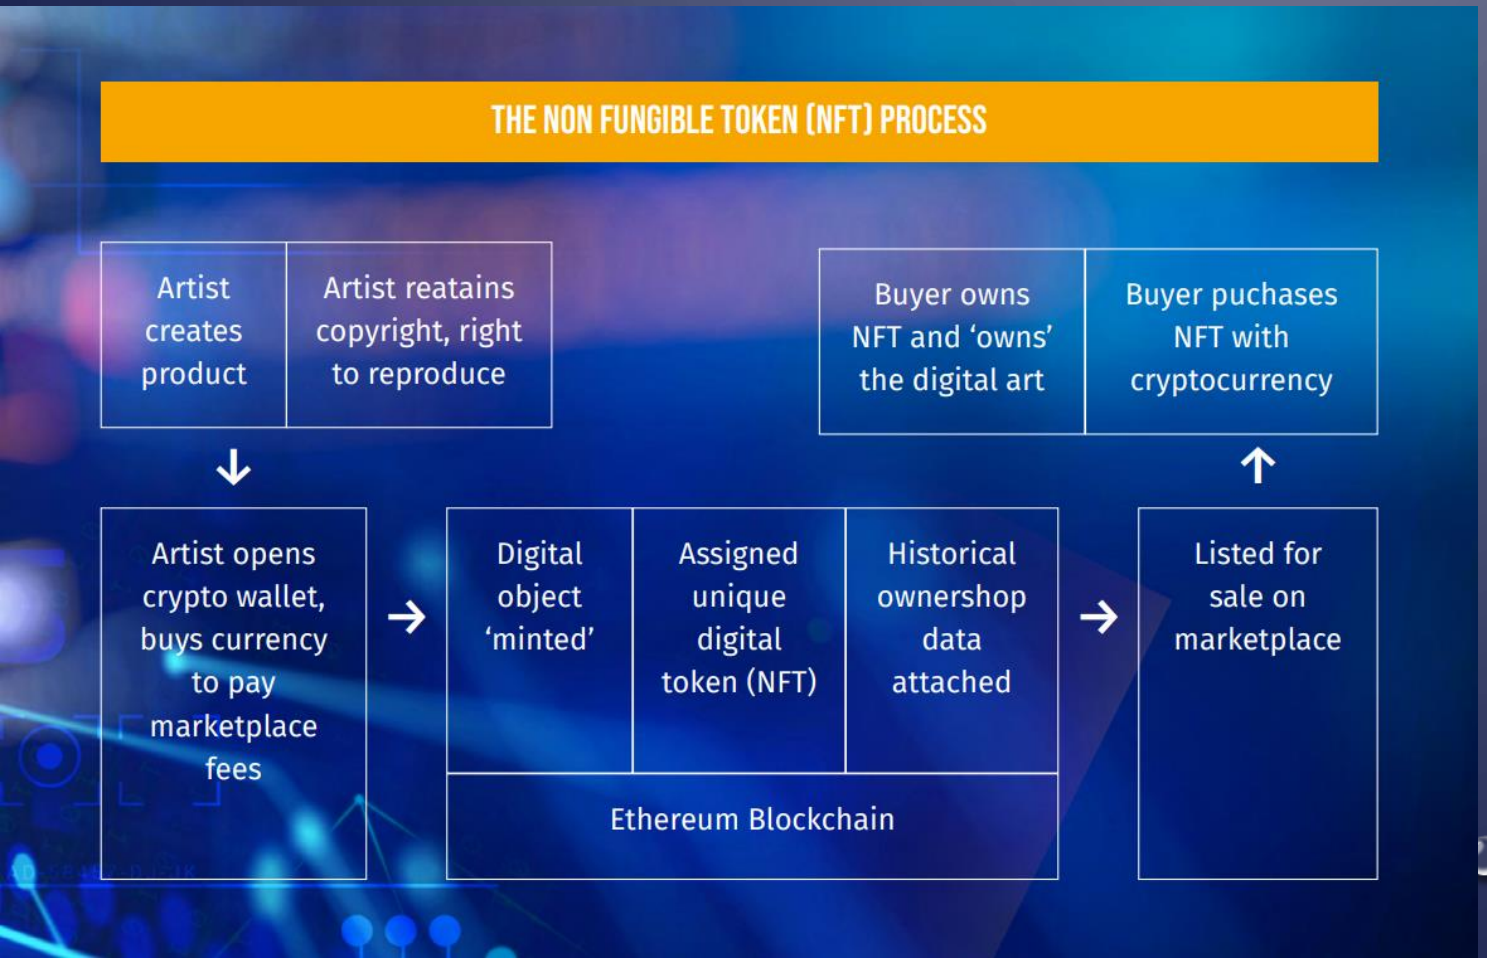
The **smart contract** ensures that the transaction is only executed when the predefined conditions are met and verified.



Voor NFT smart contracten wordt een ERC-721 of ERC 115 contract gebruikt.

NFT'S EXPLAINED

NFT-transactions, just like bitcoin transactions, **are visible** on the **blockchain.** Because everything is registered on the **blockchain**, it is possible to trace which address the NFT has created, to which address the NFT was sent, who the current owner is, etc



NFT PLATFORMS

Artists can offer NFTs for sale on these platforms/markets.

Buyers can then search the platform and buy the item of their choice.

This is usually done by bidding!

OpenSea has processed more than 10 billion dollar in transactions since its launch in 2017.

Description

By **EtherCardsPlatform**

The Association is a collection of dynamic NFTs by the NBA and NBPA. Please read the NFT terms and conditions here: https://theassociationnft.com/nft-terms-and-conditions

A crypto airdrop is **a marketing tactic where developers of a specific blockchain project send free tokens to users**. New projects use this strategy to **promote themselves prior to the official launching date.**

Startups use both **crypto airdrops and NFT airdrops to create buzz**. It also increases awareness about their non-fungible token (NFT) collection or cryptocurrency. Airdrops can also boost the price of a token if there is a lot of publicity.

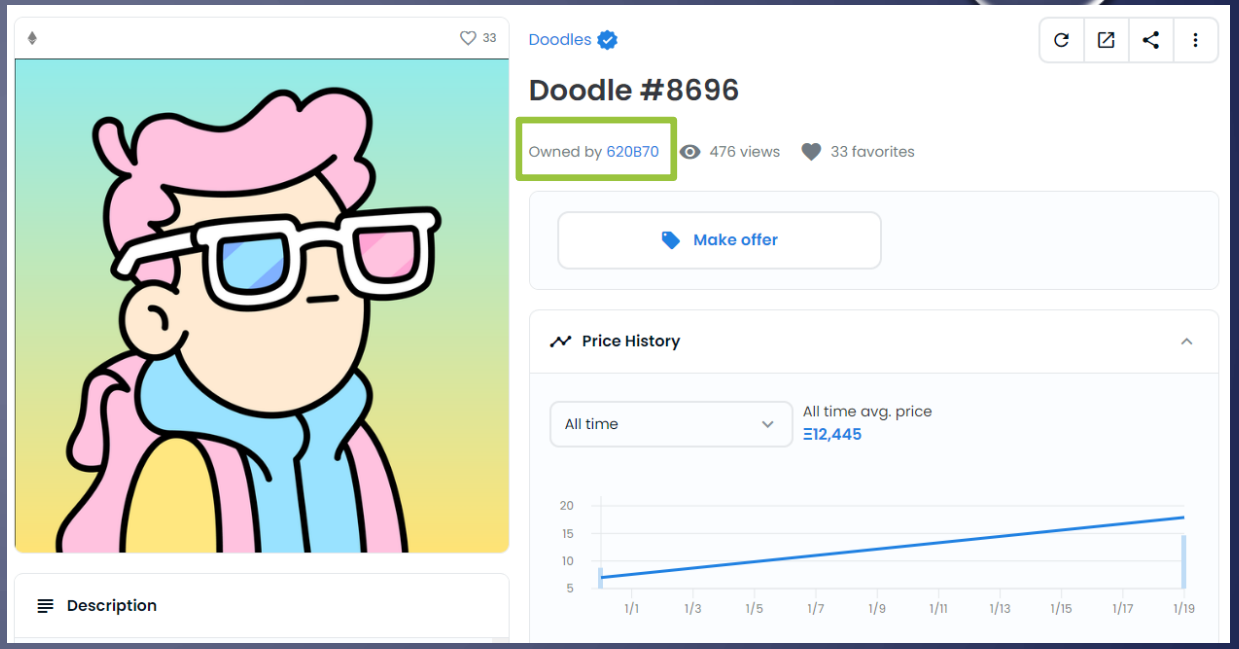
PURCHASE A NFT

What do you buy?

OpenSea

A buyer purchases a NFT containing the digital item, along with an indelible signature from the creator and all transactions associated with the digital item. It is in fact a digital proof of authenticity and uniqueness.



The digital object itself cannot be stored on the **blockchain**. The buyer effectively becomes the owner of a token that represents the digital object, along with a link pointing to metadata.

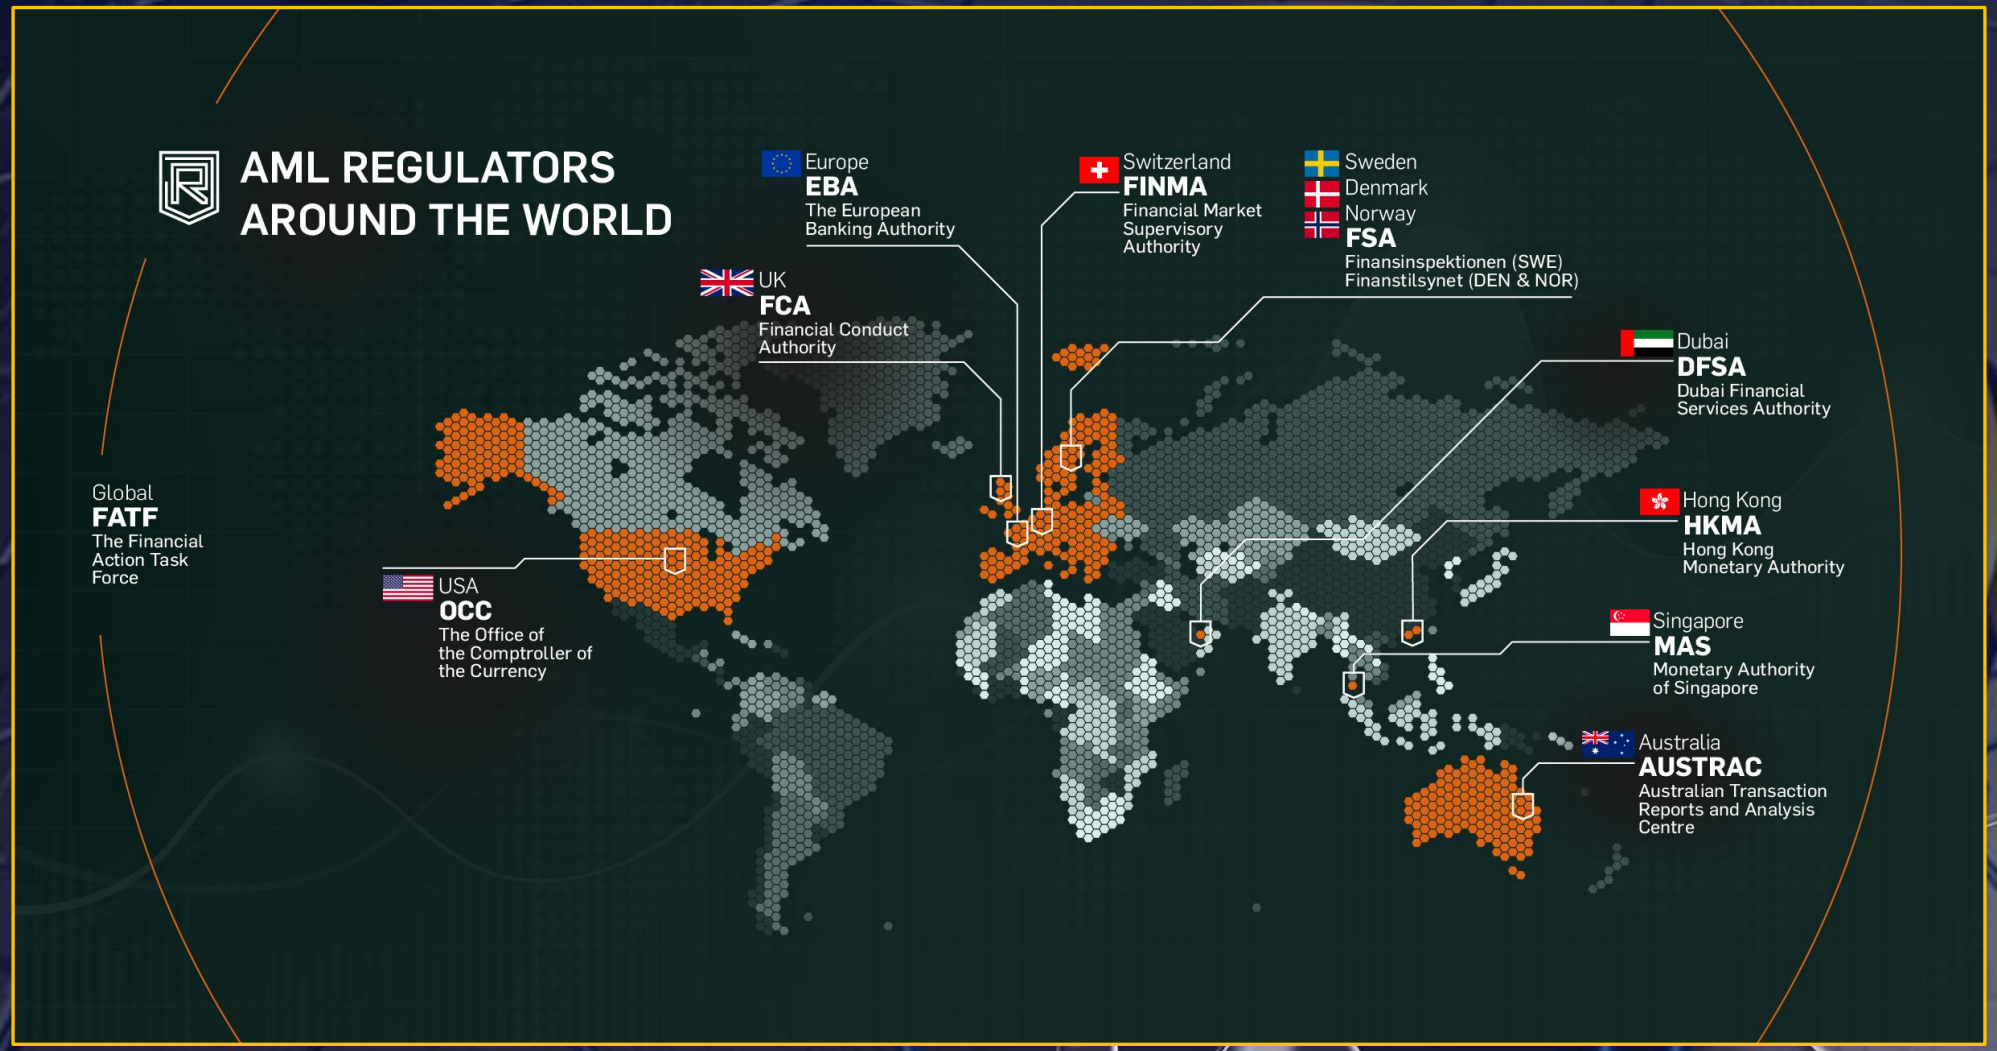
VULNERABILITIES



NFTs are currently NOT bound by laws and regulations!

VULNERABILITIES

Many NFT platforms do not perform KYC/AML checks!

VULNERABILITIES

Shifting large amounts of money in a borderless, partly anonymous market!

VULNERABILITIES

The most expensive NFTs are exchanged between a small number of wallets!

Ability to add/create value to something trivial!

NFTs and Money Laundering

WASH TRADING

A wash trader would buy and sell their own NFT so that it will show inflated volume and interest and possibly a price increase. (The wash trader controls both the buy and sell prices so they can buy it at a higher price from themselves.) This behavior can be repeated over and over.

As a result, outsiders seeing this increased activity might consider buying the NFT at an inflated price. Once the NFT is sold to an outsider, the NFT creator pockets the difference.

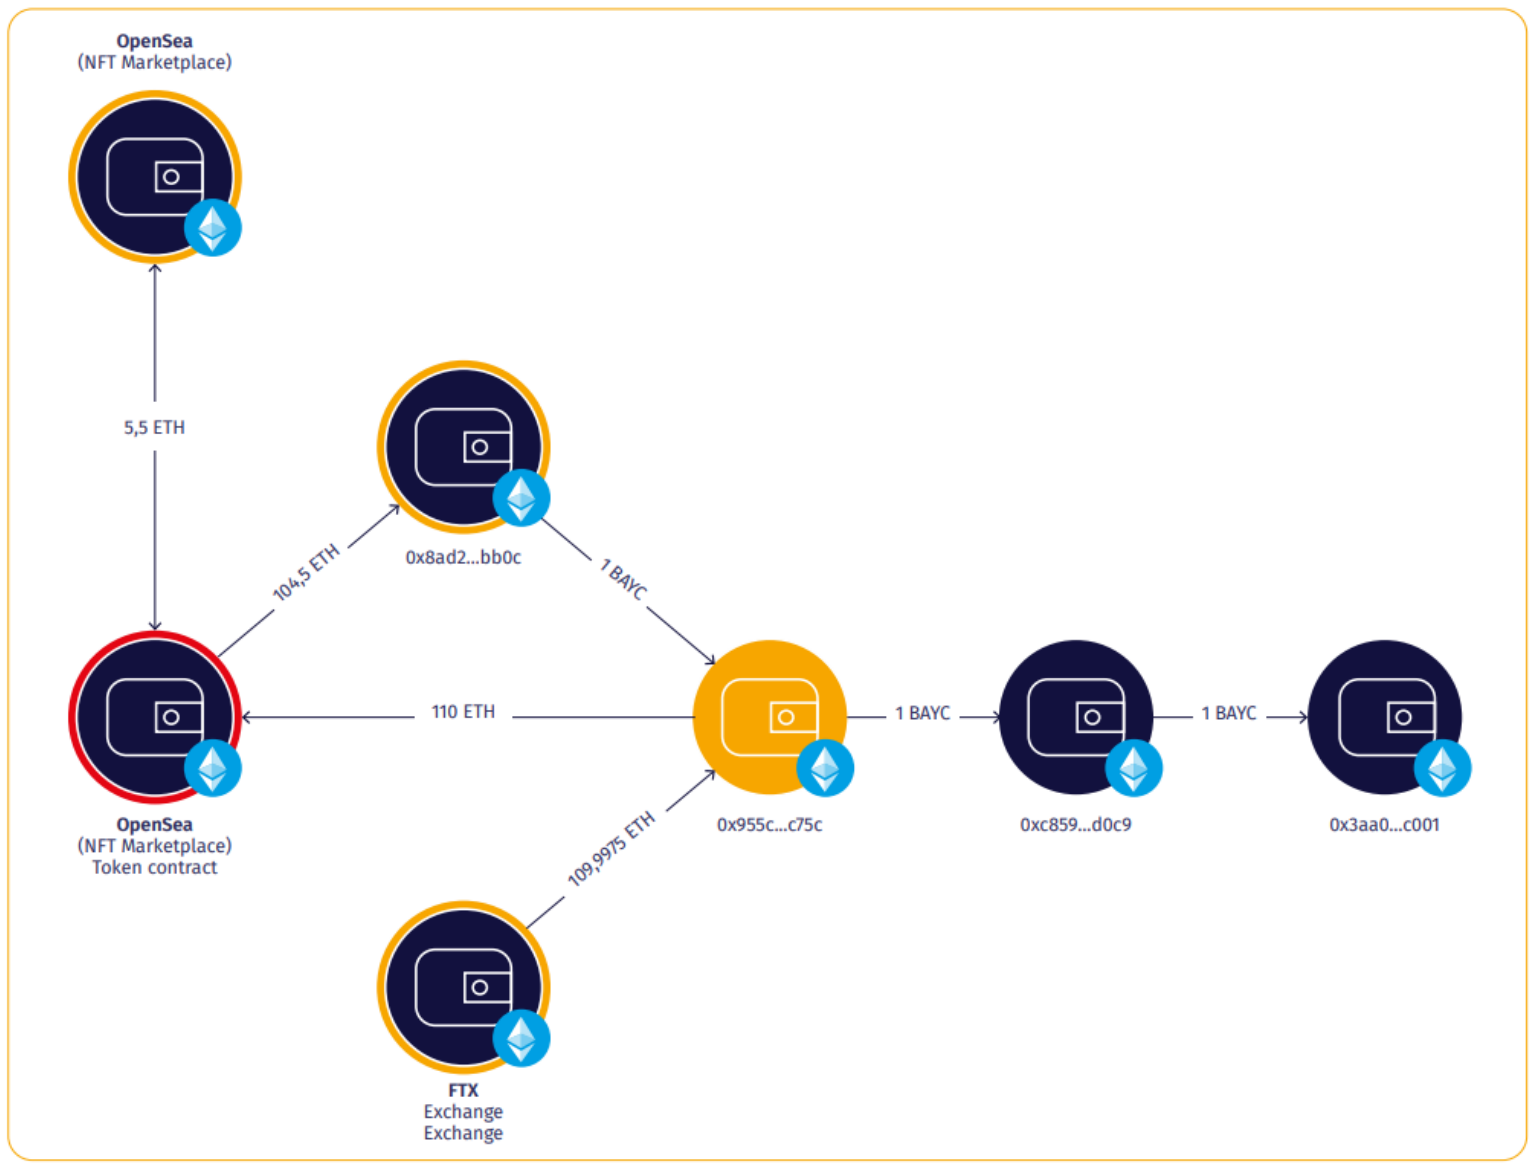
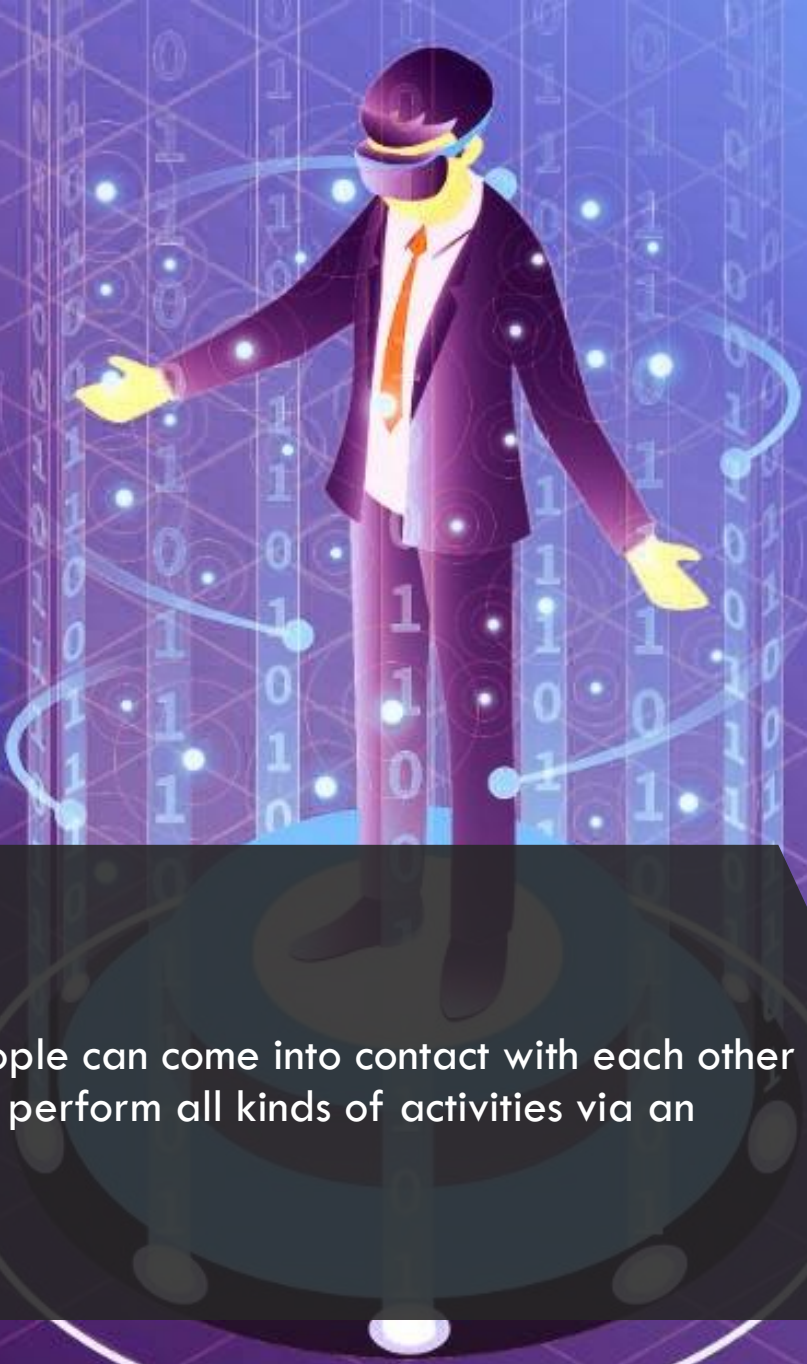
WHAT DOES A NFT TRANSACTION LOOK LIKE?



METAVERSE



‘The Metaverse’ usually refers to a virtual world in which people can come into contact with each other online. It is a network of virtual 3D spaces in which users can perform all kinds of activities via an avatar, a digital doppelganger.

Advertising and Marketing

In the context of advertising and marketing, the metaverse can be defined as an enduring, 3D and virtual space where users can spend their time and be targeted with branded content and sales promotion tactics. The closest analogy these days would be social media, where users log in, interact with their friends, family, and peer network — and in the course of these interactions, they come across brands, ads, sponsored content, and calls for conversion. Over time, social media has evolved with direct-to-customer stores where you can pay for products online and have them shipped to your address. Likewise, the metaverse may have 3D "stores" where you can not only watch ads, but also try out products and make purchasing decisions.
