

# Joint Call High-Performance Computing 2023

Information Session

19.09.2023 | 11:00 – 12:00

# Agenda

- **Introduction: Joint Call High-Performance Computing 2023** – 10 min  
Speakers: Christian Pauly (Ministry of Economy)  
Sakthivel Sundharam (FNR)
- **National HPC Competence Centre** – 5 min  
Speaker: Ralf Hustadt (Luxinnovation)
- **Presentation of the Joint Call High-Performance Computing** – 25 min  
Speakers: Christian Pauly (Ministry of Economy)  
Sakthivel Sundharam (FNR)
- **Luxinnovation Support** – 5min  
Speaker: Maximilian Przybyl (Luxinnovation)
- **Q&A** - 15min

# Who is Who in the Joint Call HPC

**Granting authority for Companies (R&D aid schemes)**

**Granting authority for Research Organisations (R&D grants)**

**Research Industry Collaboration Platform Manager**

**HPC Community Manager in Luxembourg**

# National Research Priorities

## Luxembourg's National Research & Innovation Strategy

### PERSONALISED HEALTHCARE

- Better health with personalised solutions
- Innovation in disease prevention, diagnosis, treatment and monitoring
- Collaboration and technology in biomedical research

### INDUSTRIAL AND SERVICE TRANSFORMATION

- Digital innovation for industries and services.
- AI, data, security, and smart systems.
- Value creation by collaborating with different stakeholders.

### SUSTAINABLE AND RESPONSIBLE DEVELOPMENT

- Research on sustainability and responsibility for global challenges
- Energy, environment, society and ethics
- Interdisciplinary and participatory approach

### 21ST CENTURY EDUCATION

- Innovative and inclusive learning environments.
- Teacher education and development for diversity.
- Digital technologies and data science for learning.

# Innovation Challenges TRL 4 to TRL7

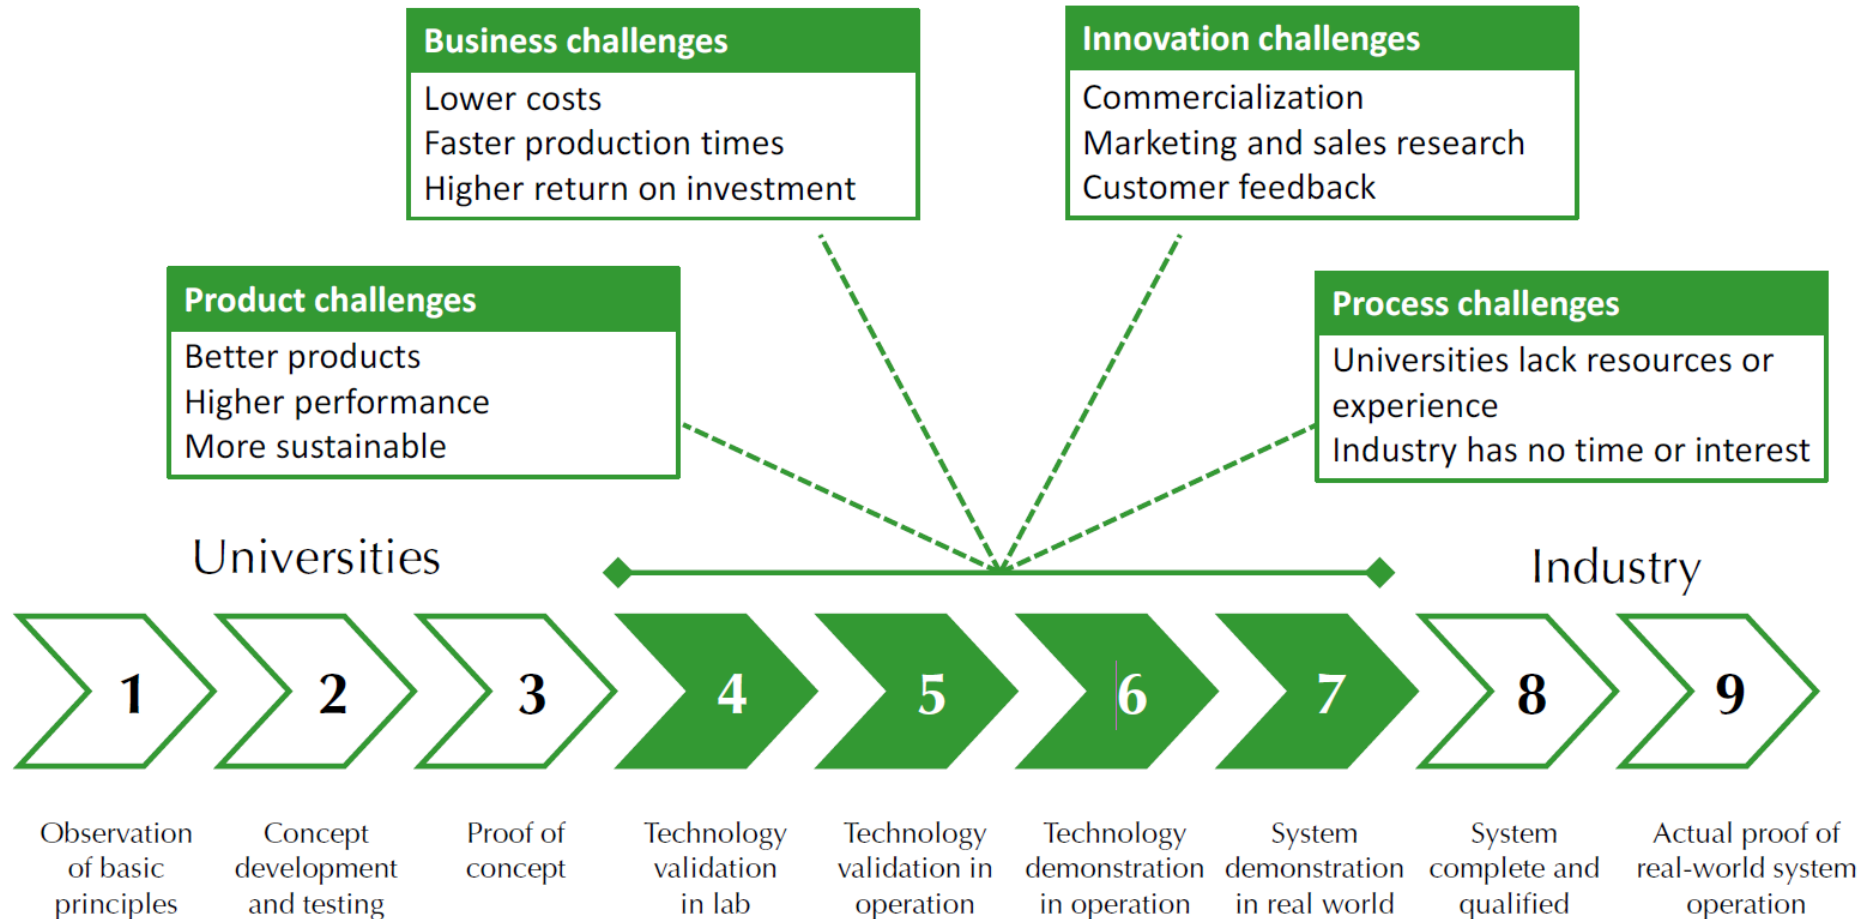

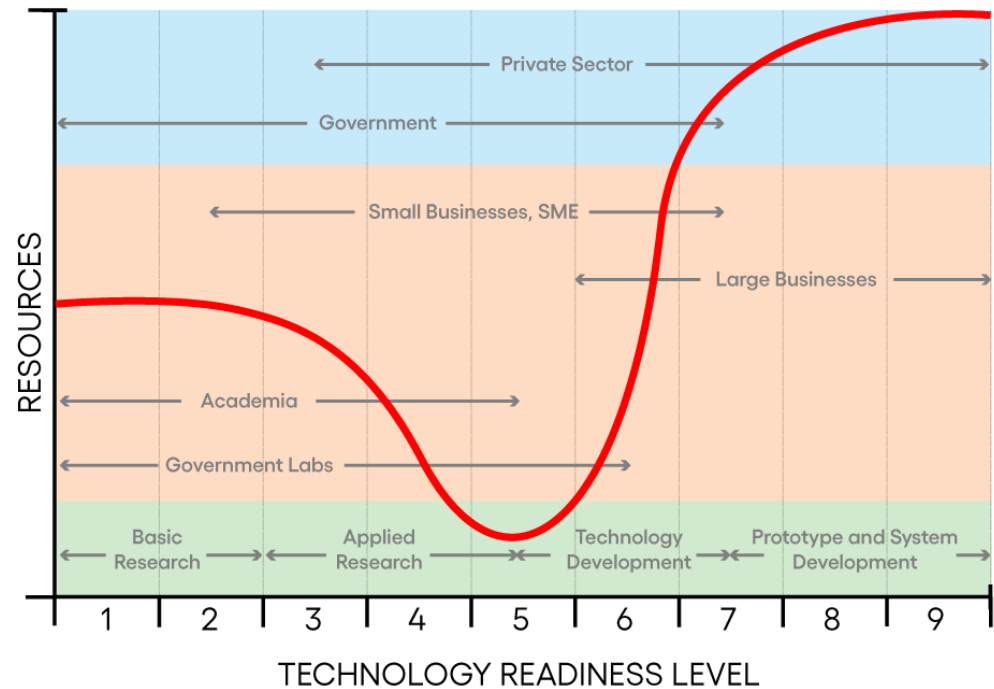

Image from : Hensen, Jan & Loonen, Roel & Archontiki, Maria & Kanellis, Michalis. (2015). Using building simulation for moving innovations across the “Valley of Death”. REHVA Journal. 52. 58-62.

# FNR Innovation Programmes

Source: Hensen, Jan & Loonen, Roel & Archontiki, Maria & Kanellis, Michalis. (2015). Using building simulation for moving innovations across the “Valley of Death.” REHVA Journal. 52. 58-62.

Universities along with public funding sources focus on TRLs 1-4

Private sector focuses on TRLs 7-9

‘Valley of Death’ represents often neglected addressing of TRLs 4 to 7, where **neither academia nor the private sector** prioritizes investment

Consequently, many technologies, albeit promising, finish their maturity journey prior to deployment

To **bridge (jump)** the valley of death, collaborative efforts are often required

# National HPC competence centre

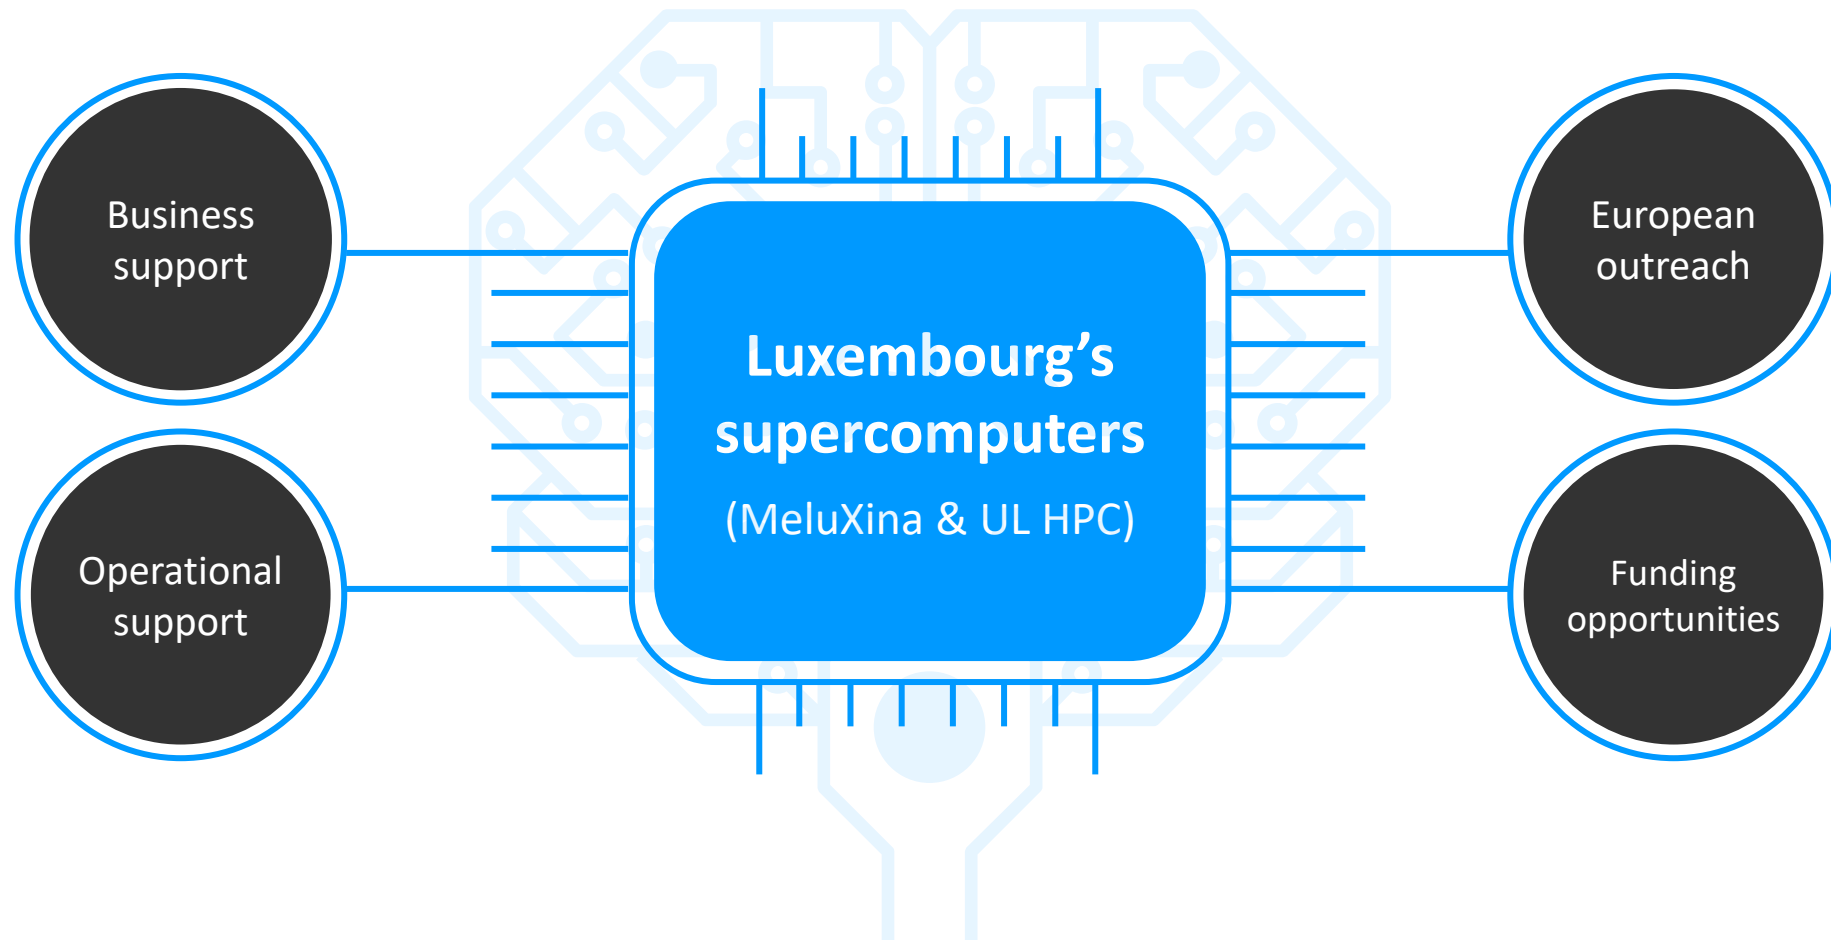

**Luxembourg's** contact point for  
**high performance computing**  
and **data analytics**

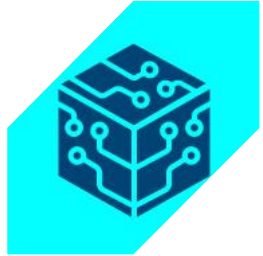

Set up a **network of national  
competence centres in HPC**  
across **Europe**

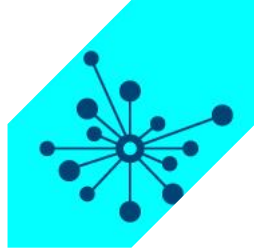

# Foster HPC ecosystem in Luxembourg

# What to do with HPC?

**SIMULATIONS &  
MODELLING**

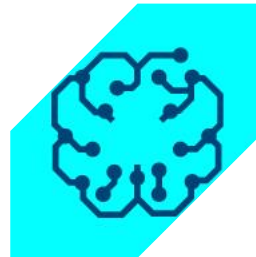

**BIG DATA ANALYTICS &  
VISUALISATION**

**PREDICTIONS &  
FORECASTING**

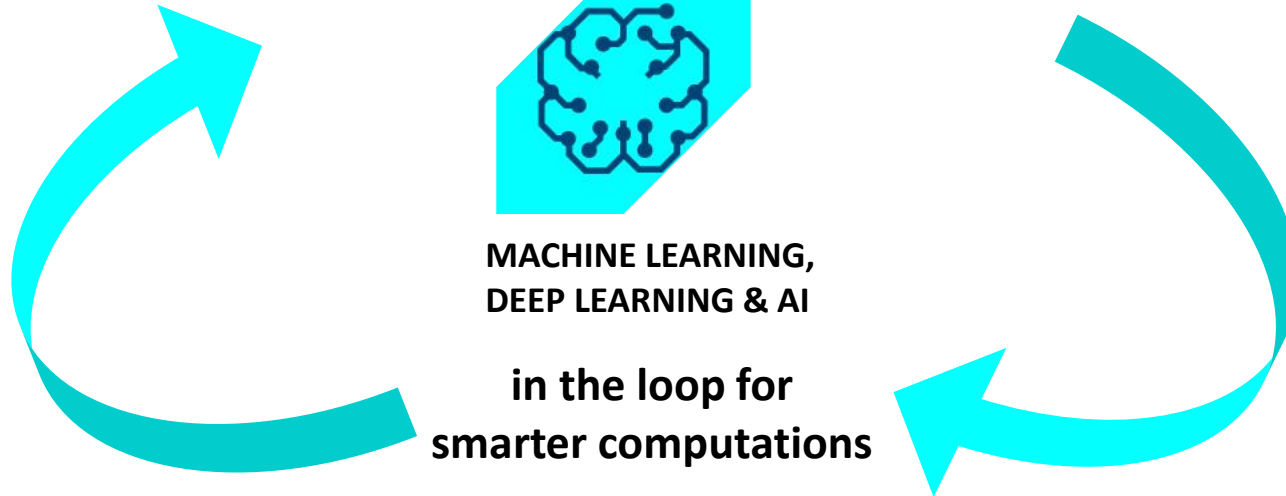

**VIRTUAL TESTING &  
OPTIMISATION**

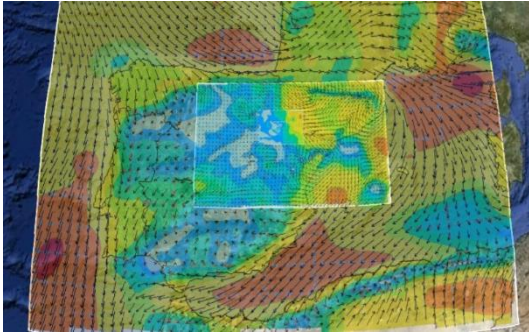

**MACHINE LEARNING,  
DEEP LEARNING & AI**

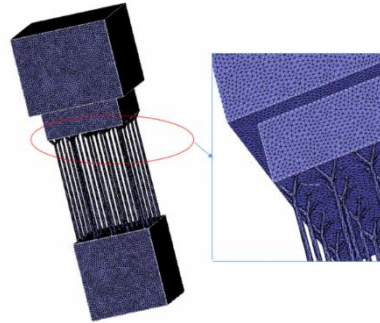

**in the loop for  
smarter computations**

# HPC use cases examples

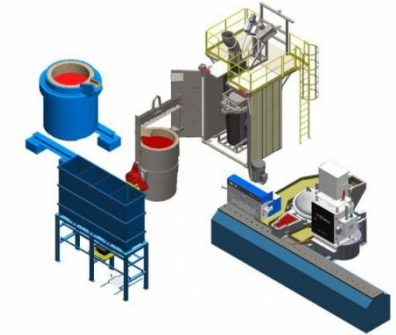

Best position for small wind turbines or solar panels

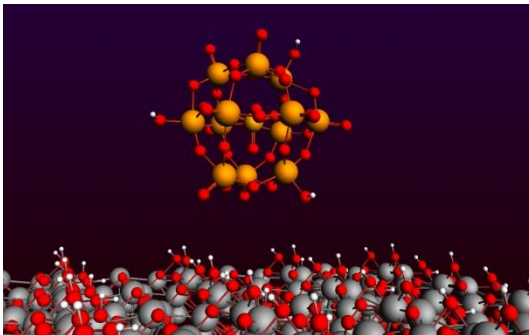

Simulation of additive manufacturing process

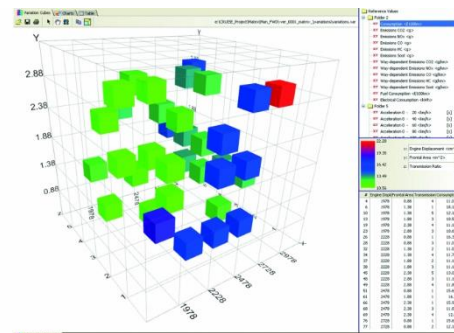

Optimise logistic choices

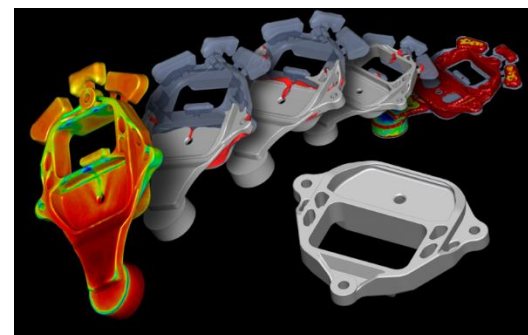

Reduce waste rate in production processes

Simulation of the thermodynamic properties of chemicals

Reduction of CO2 emissions in the design of vehicles

Simulation of metal casting for moulds design

Smart Retail Recommendation Engine (AI algorithm)

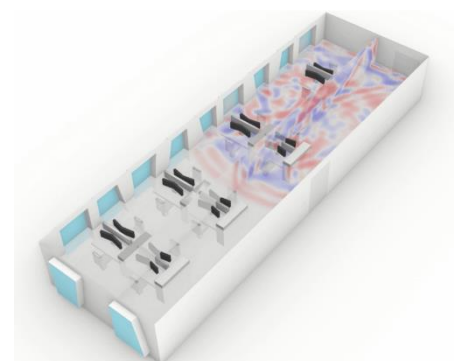

# HPC use cases examples

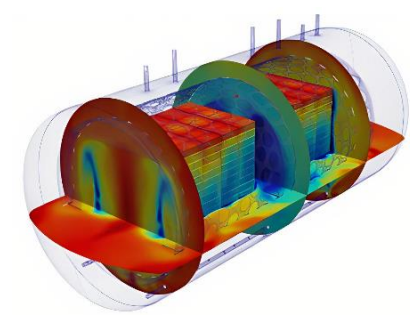

**Predictive maintenance of machines and tools**

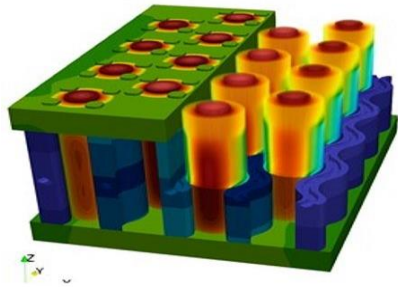

**Geospatial intelligence based on AI algorithms**

**Architectural acoustic simulation**

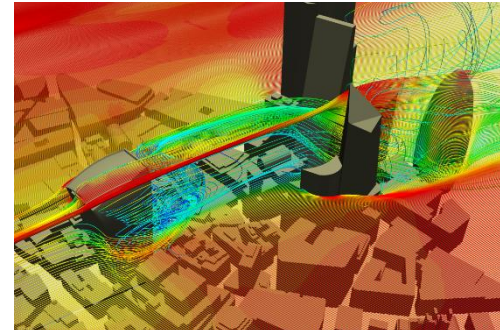

**Simulate canned food dynamics**

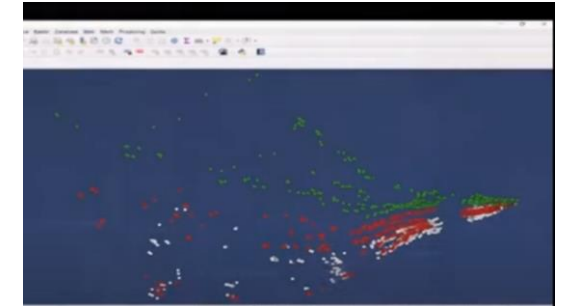

**Improved battery materials using molecular modelling**

**Reservoir monitoring through satellite data (AI algorithm)**

**Simulation of Pedestrian Urban Microclimate & comfort**

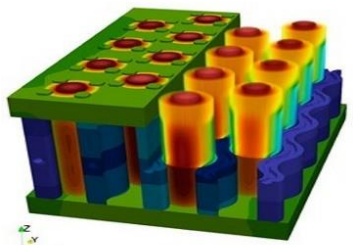

**Navigation system for maritime litter hunting**

# Joint Call High Performance Computing

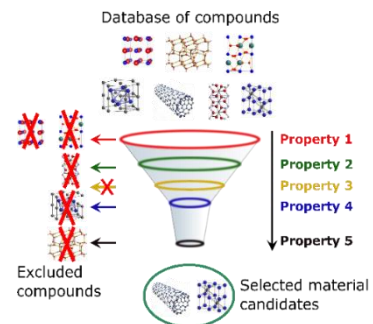

## Scope:

**Supporting consortia** to take advantage of high-performance computing (HPC) capacities in their research or business fields.

- **Integrating computer-aided engineering, design and analytics** as well as HPC into company's **internal innovation process**
- Implementation of **high quality** and **innovative** applied R&D projects based on HPC

Improved **battery materials** using **molecular modelling**

Workflow for **high-throughput computation**

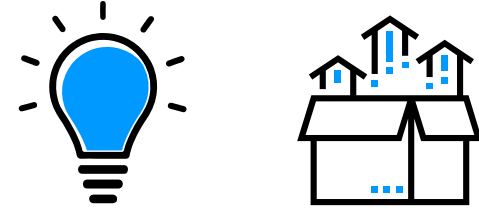

## Context:

HPC is an **innovation accelerator** offering enormous potential

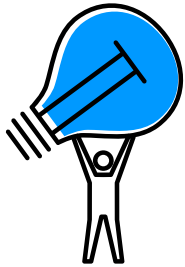

- Simulation and virtual prototyping
- Large and complex problems with many parameters
- Big data analytics and training of AI algorithms
- ...

# Call Objectives – in a nutshell

Facilitating **collaborative projects** between public research institutions and companies that are **based on HPC** and that are **valuable for both parties**

Increase the **company's expertise** in HPC applications (e.g. modelling and simulation, data analysis, virtual testing, machine learning, AI..)

Support **innovation** and **sustainable value creation** through **strong partnerships**

Encourage the implementation of innovative projects that contribute to the **development of Luxembourg's industrial and economic landscape** and are in line with **national strategic priorities**

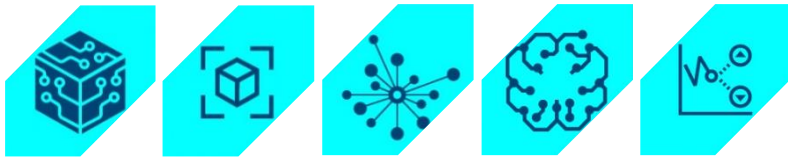

Increase the **attractiveness** of Luxembourg as an **innovation hub** based on **advanced technology research on HPC**

# Call Topics

R&D projects must address innovative problems that **require large allocations of computing and data storage resources**.

## HPC application fields

- Complex simulations with multiple parameters
- Virtual testing and optimization
- Big Data analytics and visualization
- AI and Machine Learning algorithms
- Predictions and forecasting of complex models

## Thematic areas

- Manufacturing
- Advanced engineering
- Materials
- Energy and environmental technologies
- Telecommunications

## Target companies

- Substantial expertise in computer-aided R&D, big data analytics, training of AI algorithms
- little or no expertise in HPC

➤ Industrial research and/or experimental development projects

# Eligibility Criteria

## Companies

---

Only **private enterprises registered in Luxembourg** are **eligible** for direct funding by the Ministry of the Economy.

The company:

- Must demonstrate its **viability and financial soundness** regarding its contribution to the project
- Shall demonstrate the **positive impact of the expected project outcome** on its growth and future assets

## Ineligible companies

---

### **Undertakings in difficulty**

**For all companies** (excluding SME < 3 year of existence), if more than half of subscribed share capital (share premium included) has disappeared as a result of accumulated losses.

Example of an **undertaking in difficulty**:

Own funds of €50k  
Share capital of €200k

# Eligibility Criteria

## Public Research Organisations

---

Research organisations must be eligible under article 3-(2) of the FNR statute (Loi modifiée du 31 mai 1999 portant création d'un fonds national de la recherche dans le secteur public) and be registered at the FNR.

- Public institutions performing research in Luxembourg
- Non-profit associations, societal impact companies ([SIS](#)), and foundations engaged in research in Luxembourg and accredited by the Ministry of Higher Education and Research

The PI must be employed by one of the public research institutions in Luxembourg with a work contract covering the full duration of the project

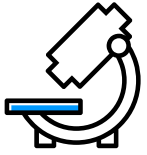

If an established co-ownership agreement between the public institution and the industrial partner exists, there should be a commercialization agreement put in place

In general, FNR BRIDGES General guidelines to be followed – [Link](#) (section 2)

Other public research inst. ....

# Funding Conditions

R&D grants for public research organisations

Max 400k EUR per project  
(collaboration with  
companies)

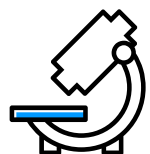

Aid rates up to 100%

Project eligible costs –  
[FNR financial regulations](#)

**24 months to 36 months**

---

# Funding Conditions

## R&D grants for public research organisations

Max 400k EUR per project  
(collaboration with  
companies)

Aid rates up to 100%

Project eligible costs –  
[FNR financial regulations](#)

**24 months to 36 months**

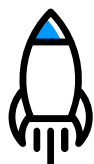

## R&D aid schemes for companies

LE GOUVERNEMENT  
DU GRAND-DUCHÉ DE LUXEMBOURG  
Ministère de l'Économie

## Aid intensities

35% upfront  
payment  
(call specific)

Max 700k EUR per project  
(collaboration with  
research institute)

Aid rates up to 80%  
of eligible costs

## Experimental development

- *Development of a solution*

## Industrial research

- *Acquisition of new knowledge*
- *No direct commercial application*

| Maximum aid intensities  | Large company | Medium company | Small company |
|--------------------------|---------------|----------------|---------------|
| Experimental development | 40%           | 50%            | 60%           |
| Industrial research      | 65%           | 75%            | 80%           |

# Submission and Evaluation Process – Call Timeline

15.09.23

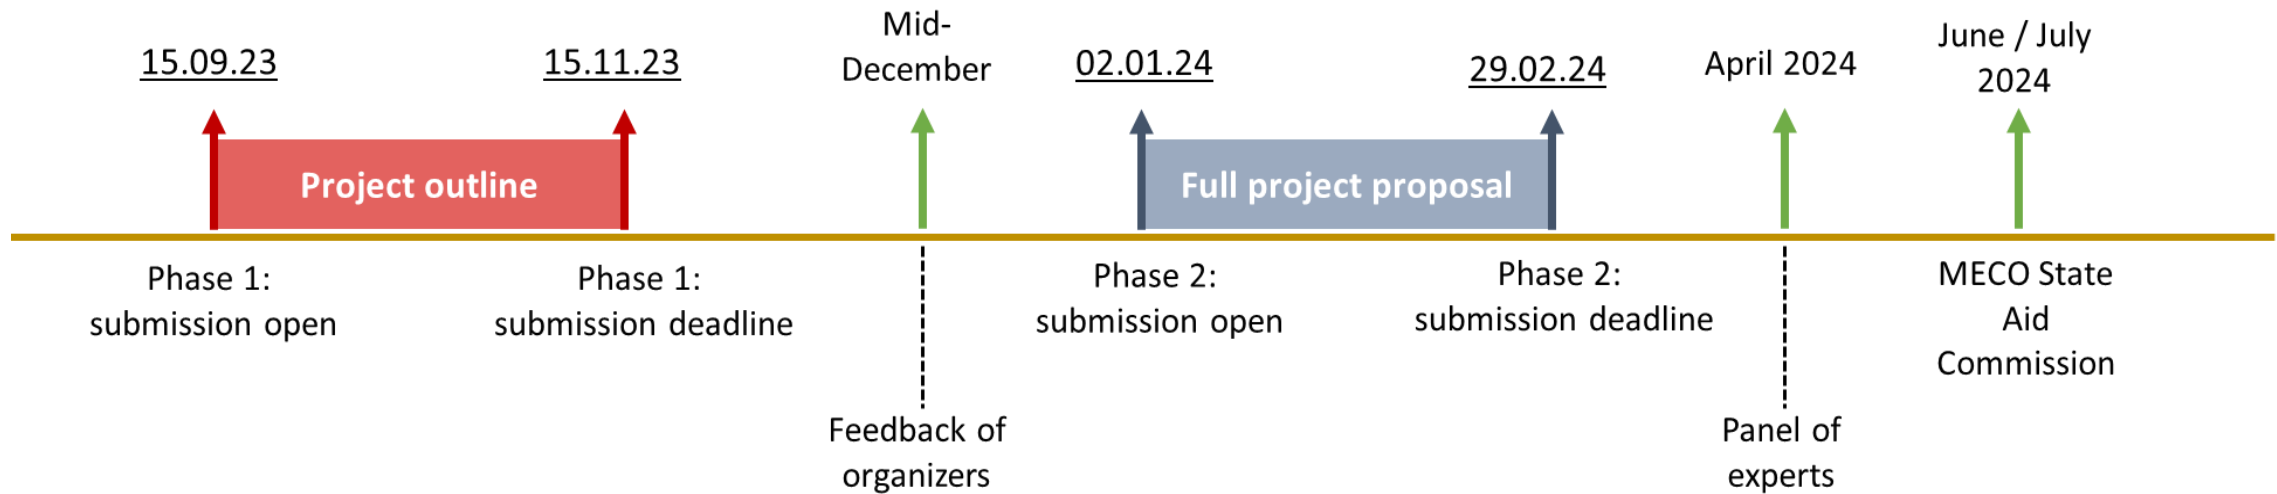

15.11.23

02.01.24

29.02.24

| PHASE-1 Project Outline (PO)                                      |   | PHASE-2 Full Project Proposal (FPP)  |  |
|---|---|--|--|
| Submission  | Evaluation  | Submission   | Evaluation   |
| (1) PO submission on the research-industry collaboration platform | (1) PO review by granting authorities                                       | (1) Coaching by LXI for companies  | (1) Review by Independent expert panel (IEP)   |
|   | (2) Eligibility and financial viability check by LXI                        | (2) FPP submission on<br>- MyGuichet (companies)<br>- FNR grant system platform (research organisations) | (2) Recommendation on projects for award decision  |
|   | (3) GO/NO GO decision, including potential recommendations, towards PHASE-2 |  | (3) State aid Commission for company projects<br><br>(4) FNR/MECO Joint Funding decision |

# Submission and Evaluation Process – Call Timeline

# Submission and Evaluation Process:

## Qualification for PHASE-1

### Pre-selection criteria

#### **All**

- If the project is in line with the call objectives and call topic
- Completeness of compulsory information

#### **Companies**

- State aid eligibility
- Co-funding capacity

Ensure that the **project costs** are **adapted** to your **co-funding capacity**

### Compulsory documents (annexes on platform)

#### **All**

- Project description, HPC related information and cost estimation (on platform)
- CVs of principal investigators (ORCID ID or LinkedIn Public Profile)

#### **Companies**

- Organigram - full visibility on the shareholder structure (up to the ultimate beneficial owner)
- 2021/2022 accounts of the applicant(s) and the linked entities
- Cash-flow forecast

(check the full list in the [call text](#))

# Submission and Evaluation Process:

## Evaluation in PHASE-2

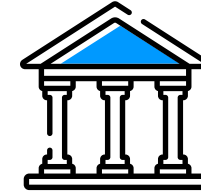

Full project proposal  
(FPP) submitted to  
MECO and FNR

Review of all FPP by  
an independent  
expert panel (IEP)

Recommendation  
on projects to be  
awarded

State aid commission  
consultation

Funding decision  
/ project start

Evaluation criteria  
of the joint call for  
projects (next slide)

# Evaluation & Submission process:

## IEP Evaluation in PHASE-2

Complete list of evaluation criteria can be found in the [call text](#)

### **Relevance**

- Project idea clarity and pertinence of the objectives
- Level of innovation and soundness of research approach
- Scientific and technical maturity

### **Implementation: quality and efficiency of the project plan**

- Coherence and effectiveness of the work plan, including appropriateness of the allocation of tasks and resources
- Competences, experience and complementarity
- Level of ambition of the collaboration and commitment of the participants

### **Impact**

- Economic and societal added value of the proposed R&D project
- Strengthening of the competitiveness and growth of the company involved
- Contribution of the project to the advancement of knowledge in the field of HPC
- R&D projects involving new innovations and processes rather than improvements to existing technologies and core business activities

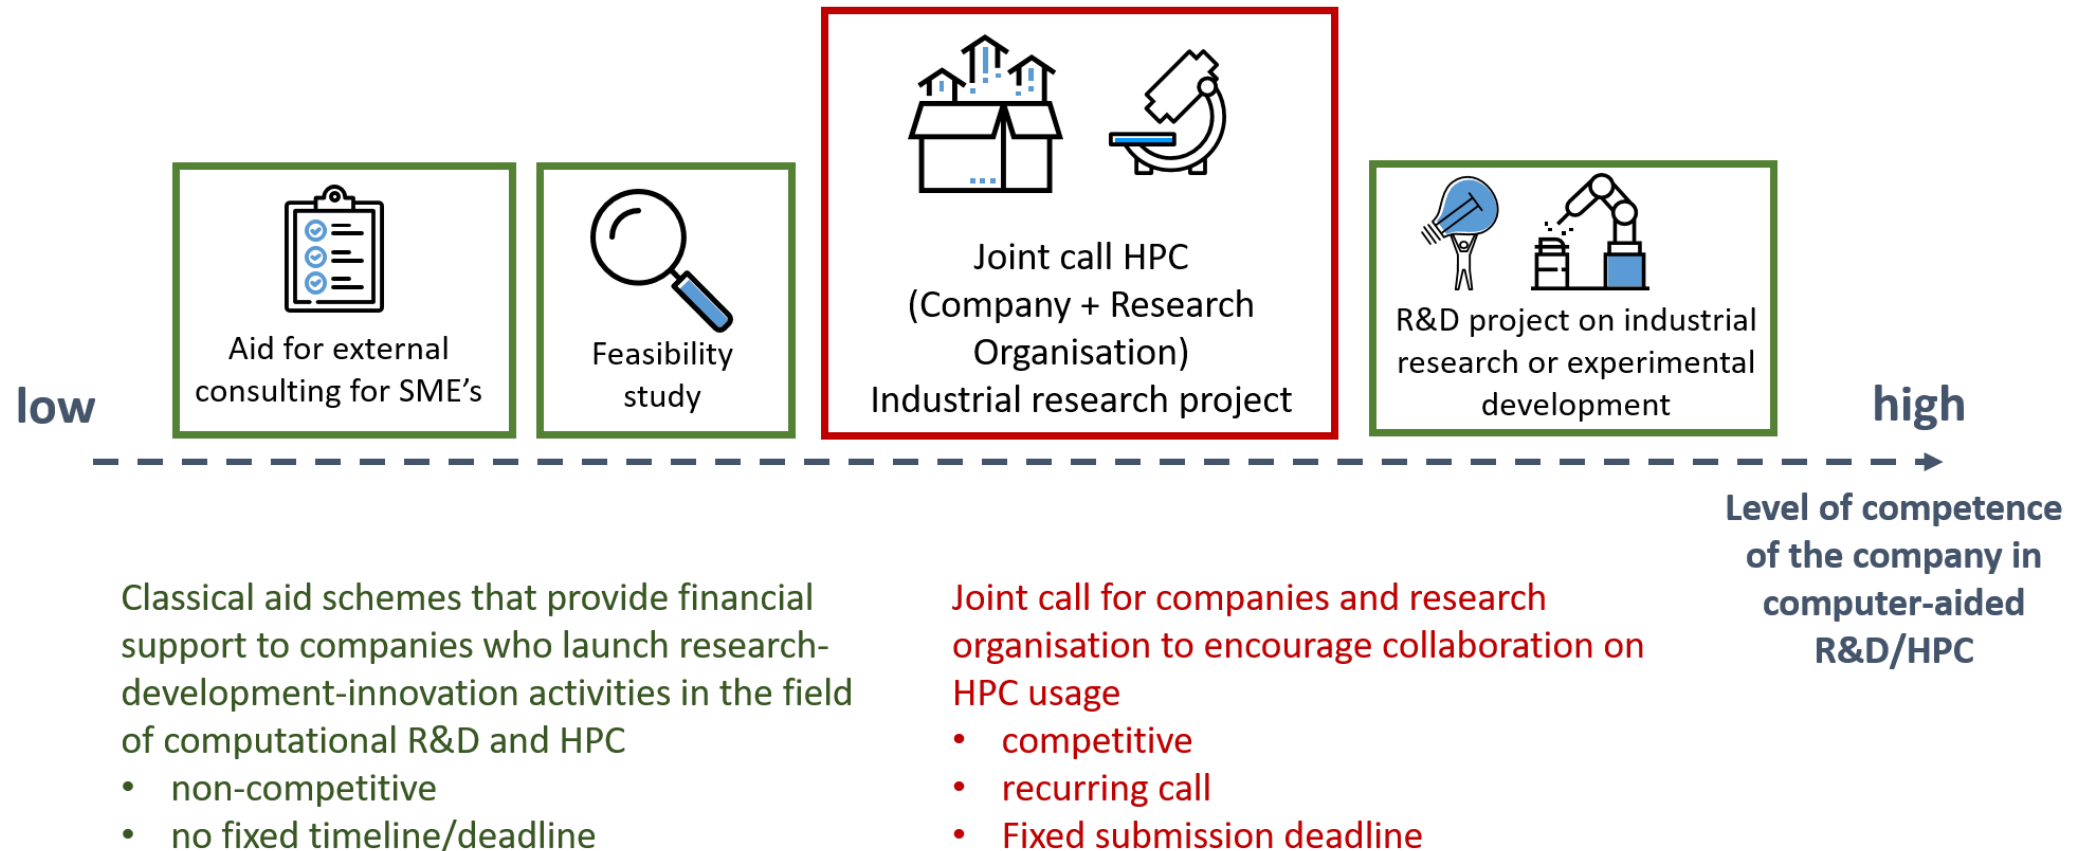

# Joint Call HPC Initiative

Various aid schemes to foster computational R&D and HPC usage

# Joint Call HPC Initiative

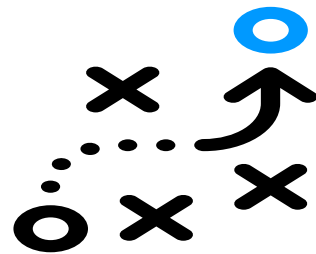

## Various aid schemes to foster computational R&D and HPC usage

# Luxinnovation support

## Phase-1

- Awareness raising on eligibility and financial viability checks
  - Q&A sessions
  - Completeness check

## Phase-2

- Stress test (company / project)
  - innovative nature
  - business model / exploitation plan
  - financial capacity of the company
  - (eligibility criteria)
- Accompanying project measures
  - intellectual property
  - project scope and structure
  - competences and relationship building
  - project financing (subsidies, loans, etc.)

# Luxinnovation support – save the dates

## **Q&A session 1: Main eligibility criteria and the eligible project costs for the Joint Call HPC**

- Shareholder structure and accounts – what to prepare?
- Co-funding capacity – how to assess your own capacity with regards to the total project costs?
- Q&A

## **Q&A session 2: Completeness check of the application before the submission for the first phase of the Joint Call HPC**

- Required attachments
- Q&A

**Step: 3**

# Joint call High Performance Computing 2023

The Ministry of the Economy, the National Research Fund (“granting authorities”) and Luxinnovation have again joined forces to offer companies and research institutions a funding opportunity that supports consortia to take advantage of high-performance computing (HPC) capacities in their research field.

Starting date  
15 September 2023

Application deadline before  
15 November 2023

View all the ideas  
being explored

To have access to all the ideas  
already proposed, you need to log  
in.

[Browse ideas >](#)

Browse existing  
project ideas

Do you have a project  
idea you would like to  
explore?

Tell us about it! We will help you to  
get in touch with the right partners  
for the realisation of your idea.

[Share an idea >](#)

Find partner for  
your project idea

Do you have a concrete  
project you would like  
to start?

Do you have a project idea and  
have already identified project  
partners? Apply right now.
