

Anthesis MERO

REPORTING & COMPLIANCE

MERO simplifies ESG reporting for organisations.

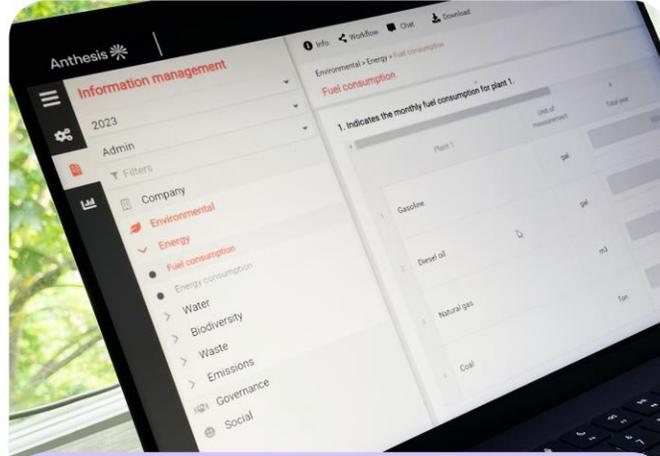

Managing scattered sustainability data from across your organisation can be overwhelming, especially with ever evolving compliance needs. That's why MERO exists – to turn sprawling data into streamlined reports, and in the process, reveal insights to propel your organisation forward.

Anthesis MERO

MERO is a cutting-edge platform for managing sustainability data, simplifying ESG reporting for organisations. It transforms scattered data into concise reports, offering valuable insights for progress.

MERO ensures superior data quality, seamless compliance across different frameworks, and precise monitoring of sustainability initiatives. Its intuitive interface, expert support, and adaptability make it a cost-effective solution, reducing manual efforts and expenses.

Trusted by over 200 organisations worldwide, MERO streamlines sustainability data management, empowering organisations to drive meaningful change confidently.

What is MERO?

→ **Get a handle on your data**

A unified platform for your organisation's sustainability data – simplified management, superior quality.

→ **Streamlined, so you can work faster**

Easy uploads, quick data validation, and automated reporting across frameworks.

→ **Compliance at a click**

Transforms your data into reports ready for multiple frameworks, ensuring compliance with ease and certainty.

→ **Easy integration, with everything**

Captures all data; seamlessly integrates with your systems; aligns with your assurance providers; scales with your business; and embeds expert support from Anthesis at every step.

→ **Better insight, better decisions**

Connect dots, understand obstacles, and track progress to grow your sustainability initiatives with data-driven precision.

→ **Fully secure, for peace of mind**

Full control and traceability of your data. ISO-certified, with high-security cloud storage and 24/7 availability.
