

Pixi[®]

Ceramic Fountain

Tech meets modern classic

More information

Craftsmanship with feline traits

Made of thick, white, beautifully glazed ceramics, the Catit PIXI[®] Ceramic Fountain provides cats with an ergonomically raised source of clean water. In addition to being timeless, ceramics are a hygienic, dishwasher-safe material that is perfectly gentle to a cat's sensitive skin - reducing symptoms of chin acne.

Arching water flow with spout

Bubbling top with stream

1.7L reservoir with triple action filter

Despite its compact footprint, the Catit PIXI[®] Ceramic Fountain can hold up to 1.7L (57.5 fl oz) of water. The fountain is compatible with Catit PIXI[®] Filters to help keep your cat's drinking water nice and crisp.

Time to refill

There's no window in the ceramic exterior, but the fountain will tell you when it's time to add more water. If you peek down into the fountain as you walk by, the built-in LED will flash red in case the water level is low and needs topping up.
