AudioCodes One Voice for Microsoft 365

Suitable for Any Skype for Business or Microsoft Teams Deployment Scenario

MICROSOFT TEAMS

Microsoft has announced that Teams, its vision for intelligent communications, designed to transform calling and meeting experiences for individuals and organizations around the world, is expected to evolve as the primary client for intelligent communications in Office 365. AudioCodes' One Voice for Microsoft 365 offering includes products and services that let you plan your future Microsoft Teams deployment with confidence, leveraging our market leadership in voice enablement for Microsoft unified communications from OCS, through Lync and Skype for Business.

- Forward compatible with Microsoft Teams
- Leverage experience with Microsoft OCS, Lync and Skype for Business
- Design your Skype for Business network with the future in mind

SKYPE FOR BUSINESS SERVER

AudioCodes offers a wide range of Microsoft-qualified end-to-end voice elements, services and extensive expertise to help implement and enhance Microsoft Skype for Business voice services. Whether you wish to maintain full control with a fully on-premises implementation or start offloading some workloads to the cloud with a hybrid implementation, AudioCodes' connectivity appliances, user lifecycle software, end-point devices and management tools will empower you to adopt the architecture of your choice and manage it with a low TCO.

- Full PBX replacement features
- Coexistence with current IP-PBX solution if desired
- Simple migration tools with no need for PowerShell scripting
- High quality certified IP phones drive quick adoption

AudioCodes One Voice for Microsoft 365

Suitable for Any Skype for Business or Microsoft Teams Deployment Scenario

SKYPE FOR BUSINESS ONLINE

AudioCodes' One Voice for Microsoft 365 offering helps companies ensure a smooth transition to cloud communications based on Skype for Business Online. Whether you are already using Skype for Business Server or are a greenfield customer (migrating from another UC platform), One Voice lets you migrate your users to Microsoft's Phone System, providing the required connectivity equipment, end-point devices and tools to do so gradually, securely and simply. Where external calling via Microsoft Calling Plans is not available or required, AudioCodes CloudBond 365 CCE appliances deliver local connectivity with PSTN and SIP trunk services.

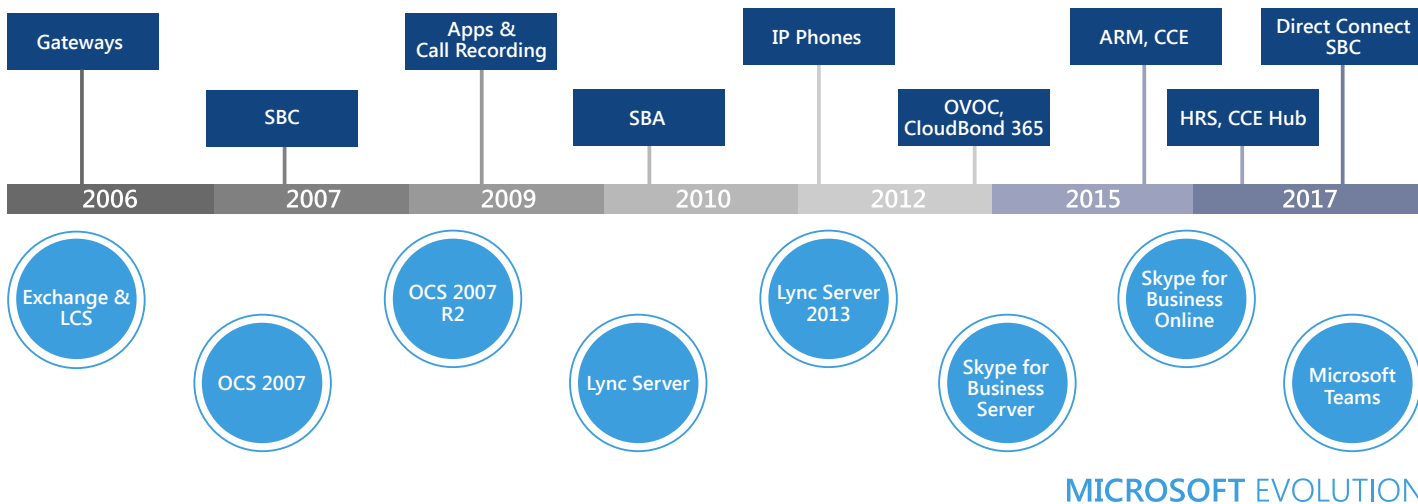

- Gradual migration to Cloud PBX in coexistence with on-premises IP-PBX
- Simple migration with no need for PowerShell scripting
- High quality certified IP phones drive quick adoption
- Maintain current PSTN/SIP trunking service provider
- Forward compatible with Microsoft Teams

HOSTED SKYPE FOR BUSINESS

AudioCodes One Voice for Microsoft 365 includes a wide range of Microsoft-qualified end-to-end voice elements, services and extensive expertise to enable service providers to offer Skype for Business as a hosted service. AudioCodes also offers software tools that facilitate multi-forest integration and the synchronization needed to support hybrid environments in conjunction with Office 365. The AudioCodes solution enables service providers to standardize, simplify and demarcate their customer offerings.

- Enrich private hosting services and reduce TCO with AudioCodes' easy-to-use user management tools.
- Standardized, cost-effective, scalable infrastructure gives service providers a competitive edge
- Leverage existing sales, operations and helpdesk teams to reduce ramp-up and operations costs
- Partner with one strategic vendor for hardware, software and services
- Build new capabilities on top of existing hosted infrastructure

Product Portfolio

SBCs and Media Gateways | Scalable, reliable solutions to provide connectivity between Skype for Business, the PSTN, SIP trunks and legacy on-premises platforms and devices.

IP Phones and Room Solutions | High definition, feature-rich desktop devices that simplify user adoption of Microsoft UC, offer high definition voice quality and provide built-in support for Skype for Business presence and meetings.

CloudBond™ 365 and CCE Appliances | Integrated appliances offering simplified connectivity between cloud-based Skype for Business services and on-premises solutions.

Survivable Branch Appliances (SBAs) | Delivering uninterrupted voice services for branch offices even when connectivity with central Skype for Business servers is lost.

Voice Applications | Software solutions delivering productivity-enhancing functionality that complements the core Skype for Business feature set.

SmartTAP Call Recording | Microsoft-qualified call recording solution for compliance, regulatory and other purposes.

One Voice Operations Center (OVOC) | Centralized device management and quality monitoring solution, simplifying operations and reducing OPEX.
