

Thales in collaboration with WIMI presents:

RESTRICTED

THE ALL-IN-ONE COLLABORATION SUITE THAT
EMPOWERS YOUR TEAMS TO WORK
SMARTER AND FASTER

Hosted on TrustNest R-Cloud

THALES
Building a future we can all trust

WIMI is a collaborative suite that brings together everything your organization needs in terms of collaboration (*collaborative edition on office software*), advanced document management (*storage, access, sharing*), project management and communication (*chat, visio*) to streamline the work of your teams and your relationship with external partners or customers.

In addition to the existing WIMI service available on the public cloud, Thales and WIMI joint forces and introduce **WIMI Restricted**, a dedicated instance hosted on Thales TrustNest R-Cloud. Already accredited for Diffusion Restreinte (DR) and soon for EU-Restricted (EU-R), it ensures the highest level of protection for your most sensitive projects.

With this unique innovative solution, partners on projects handling information defined as Diffusion Restreinte (*DR*) in France or classified as European Union Restricted in Europe (*EU-R*) can host their data and use collaborative applications that were previously unable to provide the necessary security assurances.

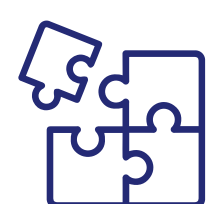

KEY BENEFITS

Available immediately
“as-a-service” and DR accredited

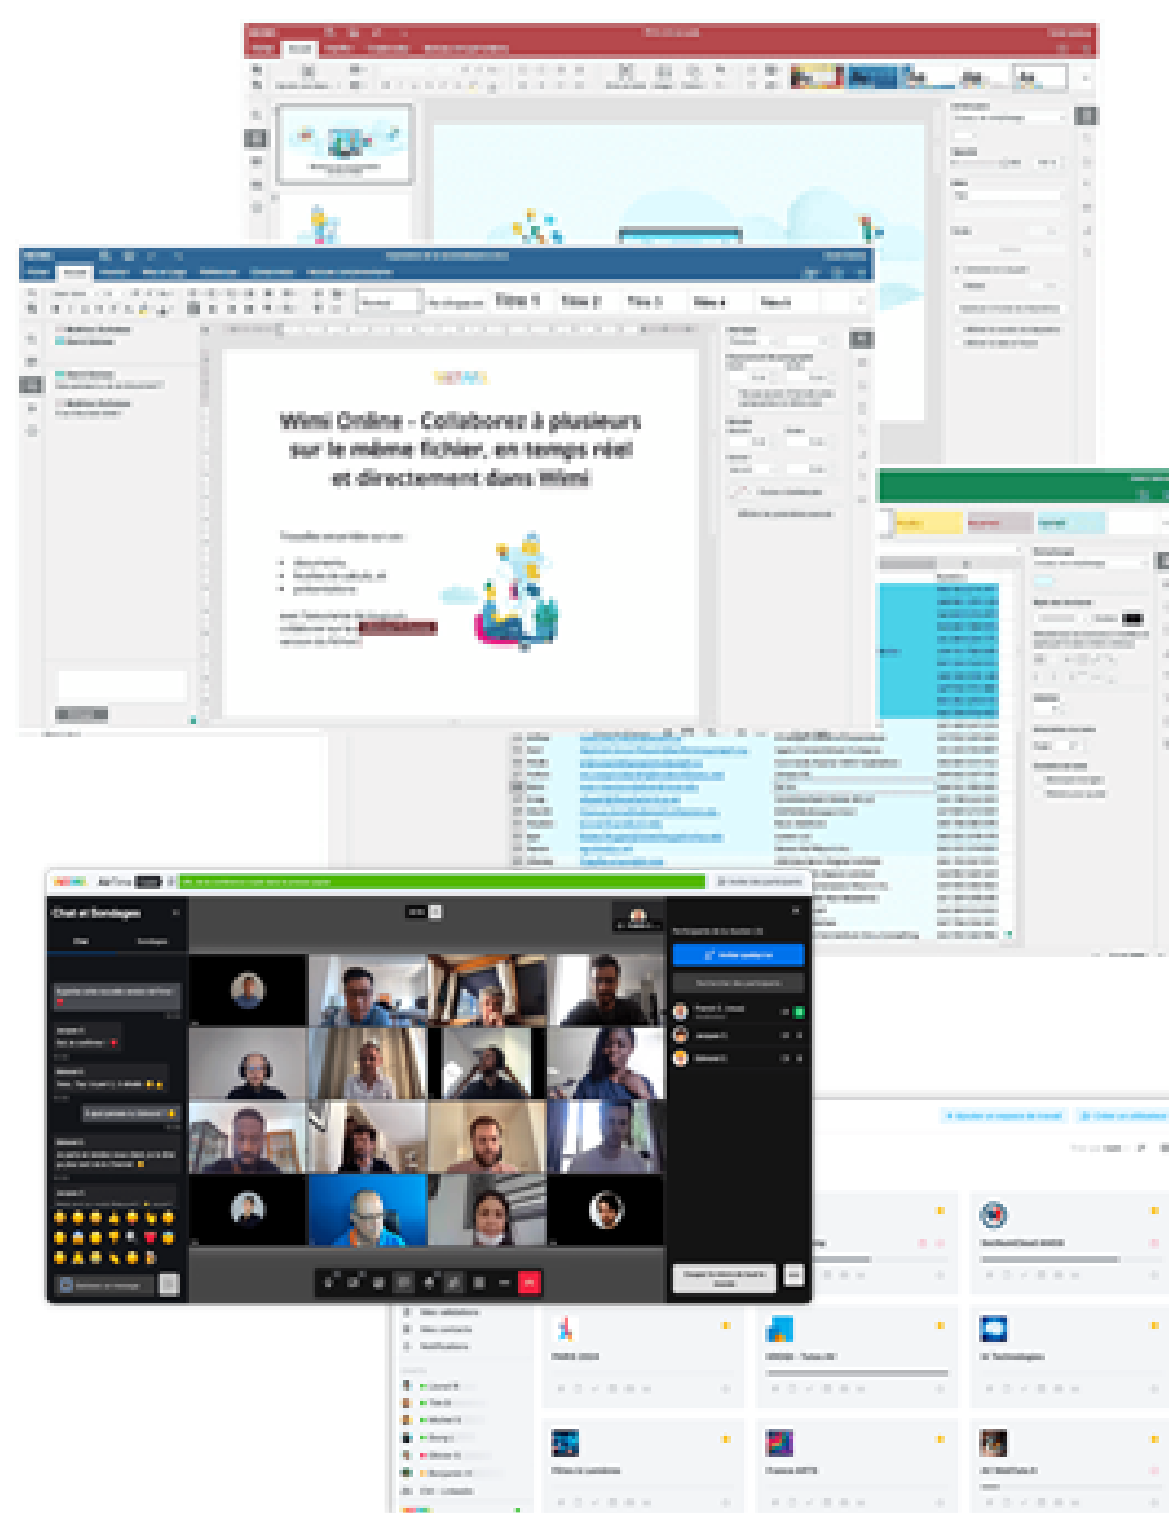

All-in-one multi-function
software suite

Ideally suited for **collaborative projects with** multiple entities

A modern UI for the best customer experience

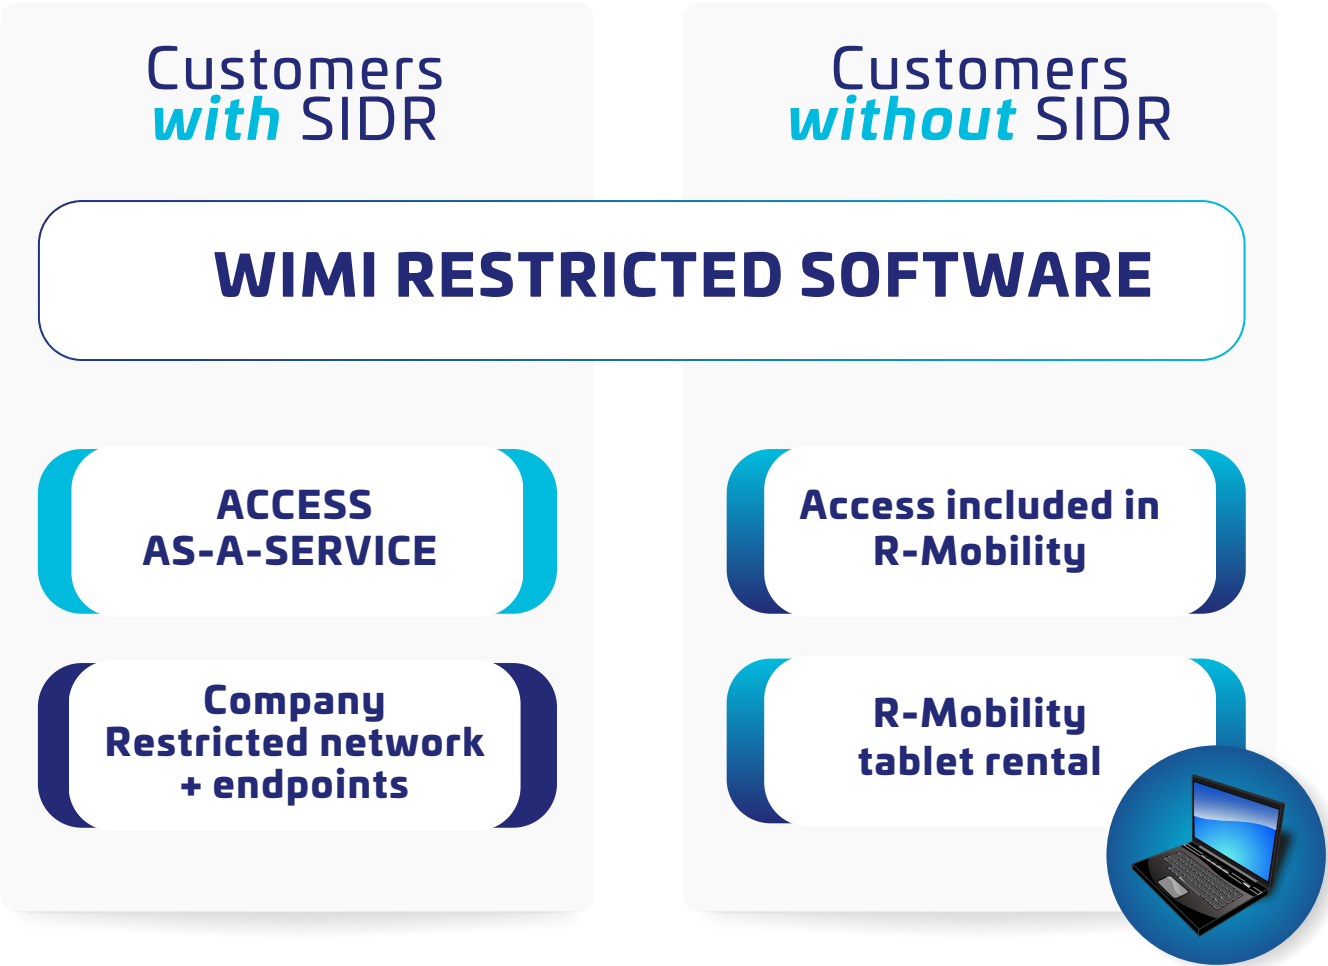

AVAILABLE FUNCTIONALITIES

WIMI Restricted is a web-based software, always up-to-date and running without installation on your PC or laptop.
