

OUR BESTSELLER, NOW UNSCENTED!

This unscented variety of Catit Go Natural Pea Husk litter is ideal for cats and owners who prefer a fragrance-free option. It offers all the benefits of natural, plant-based clumping litter without any added scents, making it gentle on sensitive noses while still effectively reducing odors.

GO NATURAL®

UNSCEATED

PEA HUSK CLUMPING CAT LITTER

Catit Go Natural® unscented pea husk litter is wonderfully dust-free, and clumps tightly and quickly, so less litter is used and a box lasts you longer. As the litter contains plant-derived particles, it feels nice and soft to cats' sensitive paws. Perfect for a carefree litter box routine!

FACT SHEET

2

UNSCENTED PEA HUSK CLUMPING CAT LITTER

In creating Catit Go Natural® Unscented Pea Husk Litter, we use pea husks that would otherwise be discarded. We recycle empty pea husks and mix in raw, food-grade materials such as starch, corn powder, and guar gum as natural clumping agents. The result is a strong-clumping cat litter!

99.9% Dust-Free

Catit Go Natural® Unscented Pea Husk Clumping Cat Litter is 99.9% dust-free, making it a great choice for cats and people with allergies. You can breathe easy while pouring and scooping.

Absorbency ratio of up to 300%

Our litter pellets are only half as thick as most of our competitors', which makes for a much larger absorptive surface.

Odor control

Thanks to their porous structure, the litter pellets quickly and naturally lock in unpleasant odors.

Unscented

No added fragrance, just great litter you and your cat can count on.

Strong clumping & effortless scooping

This litter forms tight clumps without sticking to the litter box or the scoop. This makes for easy scooping and cleaning.

Highly efficient

The litter clumps using less litter, so a single box will last you longer. Great for your budget and for nature, too!

Low tracking and no dusty paw prints

You can stop looking for dusty paw prints around the house, because you won't find any! Our litter doesn't stick to your cat's paws or coat either.

Flushable and soluble

This litter can be flushed down the toilet since its clumps dissolve in water.

Escape the dust

Why is dust harmful for your cat?

NO DUST. NO WORRIES.

Did you know that the allergens in litter dust can cause allergic reactions in cats and people? As our litter is nearly completely dust-free, it's very suitable for those with sensitive eyes and noses. Even as your cat digs around in the litter box, the smallest litter particles aren't kicked up, but will gradually travel down to the bottom of the box. This means there's no hazardous airborne dust, and you can breathe freely while pouring and scooping the litter.

LOW TRACKING AND NO DUSTY PAW PRINTS

Good news for those of us tasked with keeping the house clean. With this litter, tracking is minimal, and since the pellets are practically dust-free, your feline friend won't leave behind any dusty paw prints either.

DUST-FREE TECHNOLOGY

catit®
CATIT.COM

ABSORBENCY RATIO OF UP TO 300%

Our litter pellets have a unique diameter of 0.06 inches (1.5mm), which together have a very large absorptive surface. Thanks to this feature, Catit Go Natural® Unscented Pea Husk Litter has the exceptional ability of absorbing up to 3x its own weight, that is an incredible capacity of 300%!

For optimal results, pour a layer (2-2.7 in. / 5-7 cm) of Catit Go Natural® Unscented Pea Husk Clumping Cat Litter into the litter box and keep the litter at this level at all times.

TIP A wide scoop with large openings makes scooping lightweight litter easier.

DON'T COMPARE APPLES TO ORANGES

STRONG, NATURAL CLUMPING AND EFFORTLESS SCOOPING

We've composed our litter to clump strongly and quickly, but non-aggressively. This makes for an easy-to-clean litter that won't stick to the litter box or scoop. Additionally, scooping is simply effortless, since the smooth pellets sift right through the scoop. The perfect mix for a carefree litter box routine!

HIGHLY EFFICIENT

Thanks to our litter's unique pellet size and natural clumping properties, it produces tighter clumps using less litter. This means you'll get more use out of a single box, which is a win-win for nature as well as for your savings!

One box will last about 60 days for the average cat.

In comparison to standard pelletised litter (left), Go Natural® Unscented pea husk litter (right) absorbs a lot more, using far less litter.

LIGHTWEIGHT LITTER

Catit Go Natural® Unscented Pea Husk Clumping Cat Litter is very easy to handle thanks to its light weight - one liter of litter only weighs 0.8 pounds (400 grams). Our litter is vacuum sealed to take up 30% less space, which reduces CO₂ emissions during transportation and warehousing.

ODOR CONTROL

A layer of pea husk litter consists of thousands of pellets, which all have a porous structure that naturally seals in unwanted odors. This helps keep your cat's litter box smelling fresh.

Our unscented pea husk litter controls odors without added fragrance. It's a clean, effective choice for cats and cat parents who prefer scent-free.

PLEASANT, NATURAL FEEL

Similar to sprinkles, our litter consists of smooth, cylindrical pellets that are soft and easy on your cat's sensitive paws.

FLUSHABLE AND SOLUBLE

We recommend disposing of cat droppings in the garbage can rather than flushing them, though our litter can be flushed as it clumps naturally and dissolves in water. Check catit.com for more info on flushing the litter.
